

IT'S NOT YOUR HEART; IT'S YOUR KIDNEYS

Kidney disease is no respecter of persons. A majority of the ills afflicting people today can be traced back to the kidneys.

The kidneys are the most important organs of the body. They are the filters of your blood. If the poisons which are swept from the tissues by the blood are not eliminated through the kidneys, disease of one form or another will claim you as a victim.

Kidney disease is usually indicated by weariness, sleeplessness, indigestion, constipation, backache, stomach trouble, pain in loins and lower abdomen, gall stones, gravel, rheumatism, sciatica and lumbago.

All these derangements are nature's

signals that the kidneys need help. You should use GOLD MEDAL Harriet Oil Capsules immediately. The Harriet, healing oil stimulates the kidneys, relieves inflammation and strengthens the glands which have caused it.

Go to your druggist today and get a box of GOLD MEDAL Harriet Oil Capsules. In twenty-four hours you should feel health and vigor returning.

After you feel somewhat improved continue to take one or two capsules each day in order to keep the first-class condition and ward off the danger of other attacks.

Ask for the original imported GOLD MEDAL brand. Three sizes. Money refunded if they do not help you.

Before Becoming a Soldier.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet.

A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

PALESTINE LAND OF BEAUTY

Everywhere Nature Seems to Have Expressed Determination to Make the Country Lovely.

Palestine, in its endless variety of Nature, seems like a miniature land God made himself, a tiny epitome of the whole world. Or is it a lovely woman with a lovely soul?

Under a dazzling sky it curves in swift changing beauty through hill and valley from the river to the sea. Eve's mystery lurks in the sand stretches of Shun. Feminine lure is in the purple-tinted mountains of Moab, a virgin calm in the Lake of Galilee under its misty veil. Jewels shine in Palestine's bosom, the emerald Garden of Gethsemane and the sapphire sea that clasps the fast-flowing Jordan by breathless Jericho.

In the spring the land is decked in garlands of orange and almond blossoms amid myriads of tiny, vivid-hued flowers. And the indomitable will of Judea speaks in the low, stony, rounded hills with their determined tufts of growth. It is as if Judea said of the world: "No ravager can despoil me. I WILL bloom."

Palestine is ageless running the gamut of the years in budding Galilee, in fertile Sharon, and touching eternity in the hoary loveliness of Jerusalem where the century-old crevices are as beautiful as a mother's wrinkles to her son.

Many people express opinions, but few form them.

Some folks take an awful risk when they act natural.

STIRRED IRE OF BOY SCOUT

Youngster Properly Rebuked Woman Who Threw Sacred Flag Into a Rubbish Receptacle.

Here is a pretty boy scout story. H. S. Hera of Germantown told it to Edward Bok, who passes it on to me.

"One thing I have always admired about the scouts," said Mr. Hera, "is that they are eager to reach the etiquette of the American flag.

"Some time ago I heard a woman storekeeper say that she had thoughtlessly thrown away a small American flag, and it somehow found its way into some rubbish about to be collected by the street cleaners.

"But only a short time after a box with waste, containing that soiled flag, had been put out on the curb, a wee little scout came into the store, saluted in grand military style and said:

"Madam, I found this flag out there in your rubbish. Don't you know that you should not insult the American flag that way? Then he handed the woman the flag and told her please not to let that occur again."—Philadelphia Ledger.

As It Were.

"The movies educate one in many matters."

"Right off the reel, so to speak."

The most manifest sign of wisdom is continued cheerfulness.—Montaigne.

This Drink Doesn't Change Its Price

Its quality doesn't vary, and it doesn't start a headache.

The Original

POSTUM CEREAL

is pure and drug-free. It will agree with you, and its rich, robust flavor makes it a big favorite.

Postum is a real part of any meal for old and young.

"There's a Reason"

FARM STOCK

PREVENT HORNS ON CALVES

Either Caustic Soda or Caustic Potash Without Other Substances is Satisfactory.

(Prepared by the United States Department of Agriculture.)

When circumstances are favorable, as in the case of farmers who build up their herds by raising the progeny, the horns may be prevented from growing by a simple and practically painless method, and the custom of preventing the growth of the horns is becoming more popular and more generally practiced under all conditions except in the case of calves dropped on the open range. The calf should be treated not later than one week after its birth, preferably when it is from three to five days old. The agent to be used may be either caustic soda or caustic potash, both of which may be procured in the drug store in the form of sticks about the thickness of an ordinary lead pencil and 5 inches long. These caustics must be handled with care, as they dissolve the cuticle and may make the hands or fingers sore. The preparation of the calf consists in first clipping the hair from the parts, washing clean with soap and warm water, and thoroughly drying with a cloth or towel. The stick of caustic should be wrapped in a piece of paper to protect the hands and fingers, leaving one end of the stick uncovered.

Moisten the uncovered end slightly and rub it on the horn buttons or little points which may be felt on the calf's head, first on one and then the other, alternately, two or three times or even allowing the caustic to dry after each application. Be very careful to apply the caustic to the horn button only. If it is brought in contact with the surrounding skin it will cause pain. Be very careful also not to have too much moisture on the stick of caustic, as it will remove the skin if allowed to run down over the face. After treatment, keep the calf protected from rain, as water on the head after the application of caustic will cause it to run down over the face. This must be carefully avoided.

Either caustic soda or caustic potash alone, without the admixture of other substances, answers the purpose satisfactorily. Some years ago, however, certain preparations or "dehorning compounds," composed largely of one or the other of these caustics, were generally used, and as inquiries are still occasionally received concerning such preparations, the following formula is given: Combine in an emulsion 50 per cent of caustic soda,

Custom of Preventing Growth of Horns Is Becoming More Popular.

25 per cent of kerosene, and 25 per cent of water. The caustic soda is dissolved in the water and heated to the boiling point, then removed from the fire, and the kerosene added gradually, while the mixture is vigorously stirred. This emulsion is applied in very much the same manner as the stick caustic, except that it is necessary to employ a short, stiff brush. Sometimes a meat skewer is used, the large end being mashed to form a stubby brush. Two or three applications should be made to each horn button, as in the case of the stick caustic, with intervals to allow it to dry.

In the very young calf the horn button, or point that will ultimately develop into a horn, has scarcely any attachment to the skull, and may be felt as a small button embedded in the skin. In this early stage it may be easily removed with a sharp knife or a pair of curved scissors, but even then caustics should be applied to kill any remaining cell life belonging to this germ point; otherwise there may be some subsequent irregular horn growth, which is more or less of a disfigurement.

SHIPPING SWINE IN SUMMER

Proper Care Should Be Taken Not to Load Too Heavily—Most Common Cause of Loss.

When shipping hogs in warm weather care should be taken not to load too heavily. Too heavy loading is one of the most common causes of loss in shipments of hogs.

Imitations Are Dangerous.

AN OHIO druggist writes to "The Practical Druggist," a prominent New York Drug Journal, as follows: "Please furnish formula for Castoria. All the formulas I have worked with are either ineffective or disagreeable to administer."

To this "The Practical Druggist" replies: "We do not supply formulas for proprietary articles. We couldn't if we wanted to. Your experience with imitative formulas is not surprising, but just what is to be expected. When Castoria is wanted, why not supply the genuine? If you make a substitute, it is not fair or right to label it Castoria. We can give you all sorts of laxative preparations for children, but not Castoria, and we think a mother who asks for Castoria would not feel kindly toward you if you gave her your own product under such a name."

No mother with a spark of affection for her child will overlook the signature of Chas. H. Fletcher when buying Castoria.

Exact Copy of Wraps.

Children Cry For

Fletcher's

CASTORIA

Mothers Must Use Care.

Why do we so often call your attention to imitations of Fletcher's Castoria? Because it is a baby's medicine and imitations are always dangerous, particularly imitations of a remedy for infants.

Your druggist may not keep an imitation but they are to be found on drug-store shelves. Reliable druggists think only of the welfare of their customers. The other kind only of the greater profit to be made on imitations.

Your own judgment tells you that Fletcher's Castoria having for over thirty years at great expense held up its reputation, must jealously guard it. Then, it follows that this company must use the very best of material. Must employ experts in the selection of the herbs. Must retain skilled chemists in its manufacture.

Your same good judgment must tell you that these irresponsible imitators are trading on your credulity and the reputation built up by Mr. Fletcher, during all these years, for his Castoria.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

Bears the Signature of

Some fingers that are tampering with sonatas were intended by nature for the typewriter.

If you use Red Cross Ball Blue in your laundry, you will not be troubled by those tiny rust spots, often caused by inferior bluing. Try it and see.

We know a man who thinks his wife never made a mistake in her life. He's been married a week.

Being funny is the most serious kind of work.

An Oily Life.

John D. Rockefeller attributes his long life to olive oil, says a dispatch. Our notion is that kerosene oil also has had a little to do with it.

A lot of men will criticize a person blonde and then turn around to straighten their toupee.

No Worms in a Healthy Child.

All children troubled with worms have an unusual color which indicates poor blood, and a rule there are no intestinal disturbances. Grove's tasteless chili tonic given regularly for two or three weeks will check the bugs inside the organism and act as a General Strengthening Tonic to the whole system. Nature will then throw off or dispel the worms, and the Child will be in perfect health. Pleasant to take. 60c per bottle.

Hard cash is not hard to get rid of.
