Fire was discovered in Milton Chipman's house Tuesday forenoon. By hard work on the part of the fire company and the citizens the flames were extinguished after burning through the roof. The damage was about \$100, with no insurance. It caught from a defective flue. Mr. Chipman went to work at once putting on a new roof. The household goods were damaged considerably by water and by removal from the building.

An epidemic of chapped hands has struck Rensselaer and the drug stores are doing a big business selling glycerine. It is noticeable that only those who bought soap of the electric belt fake are the ones so afflicted. After using the soap once or twice the hands become red and begin to smart and a constant use of same causes a rush for the glycerine bottle. Hundreds of boxes of this soap can now be had in Rensselaer at your own price.

Farmers are hereby notified to be on the lookout for two smooth tongued sharps who are going through the country appointing agents for a patent wire fence. The men are frauds and their scheme is to secure the signature of the agent to a contract which turns out to be a nice little bank note.

Perhaps it is not well to place too much confidence in the robin's song denoting that spring is at hand. The robin may be fooled, but when the mosquito strings up his mandolin, places the end on his knee and bursts forth into song, you can safely bring out your straw hat and seersucker suit.—Newcastle Democrat.

If any Jasper county real estate owners think they have any clay on their land that promises to be useful for manufacturing purposes, now is the time to have it tested. State Geologist Gorby invites all such to send him samples of the clay by mail in four-ounce packages properly marked with name and location and accompanied by any information that may be of use. It is hoped that this may be the means of developing large resources not heretofore utilized in this state.

Investigation proves that the story is without foundation, and that he is still confined in the penitentiary. The brief asking for a new trial has been filed before the Supreme court.—Kentland Enterprise.

The legislature is after the youthful users of tobacco, and passed a very strong law which will be a good thing if officials will look after its enforcement. Miss Frank McEwen, of Rensselaer, has been appointed deputy recorder of Jasper county. This we are pleased to hear as Miss McEwen is a deservedly popular young lady, and both from natural ability and business education is well fitted for the duties of the position. When Rensselaer gets her new postmaster we trust it may be the veteran editor, and Miss McEwen would officiate as her father's deputy in the service of Uncle Sam.—Lake County News.

Carpenters or anybody that can use hammer and saw are kept busy this nice weather.

It is said there was one new house built here last season and the grass was tramped into the ground for three blocks around by sightseers and people gazing at the wonderful structure—a new house. Not so with this season. New buildings are to be seen in all directions, the north and west part of the town claiming the most of them.

Here we will find J. R. Hardesty with a neat residence and barn; M. Gorden, barn.
