ATTENTION, SUBSCRIBERS.

Something to be Read by every Subscriber to the Pilot.

We desire to make an announcement, and we want each and every person who is a subscriber to this paper to carefully peruse the same. We have quite a number of delinquent subscribers on our books. In order to induce them to pay up, and to those who are in the habit of letting their subscriptions run until the end of the year before paying it, we have decided to raise the price of subscription to the PILOT to \$1.25. To those who will pay the year in advance, the old price \$1.00 will still be given. But if you do not pay in advance the price of the PILOT is \$1.25 per year. This means a great deal to us. We now have near 1,000 subscribers and if each and every one pays up promptly, it means near \$1000 a year to the paper and will go a long ways towards helping to pay the expenses of the concern. As it is, there is a large number who are delinquent from one to two years, and we would be under many obligations to them if they would call and settle. Hoping this change will meet your approbation we would be pleased to see you call and help swell our treasury.

We notice among some of our exchanges, an account of a fellow making the rounds of the surrounding towns and taking orders for pants and suits of clothing. A careful and forehanded farmer keeps some old corn through the entire year, until the new corn is fit to grind again. Of course, the crib must be made vermin proof, to keep the grain with profit. This can be easily done by setting it on posts, with projections below, where the plates set on the caps. Neither mice nor rats will obtain an entrance to a corn crib thus protected.

The relative importance of the potato as a food crop may be judged by the fact that in Europe the crop for all the countries reported aggregates more than the combined bushels of the wheat and rye crop, and the crop of that continent exceeds in amount the whole wheat crop of the world. Germany is the greatest potato producing and consuming country in the world, with an average annual production of 900,000,000 bushels. The average crop of the United States is about 170,000,000 bushels. It would seem that there is room for an increase here.

A very interesting thing occurred at the Christian church, last Sunday evening. Before the church was built, the few members here borrowed \$1,000 of J. H. Brown, with which to complete the building. This occurred four years ago last Sunday evening. The occurrence was reminded to the audience by Dr. Washburn in a few well turned remarks, after which he took the note, which had been previously paid, and setting fire to it, allowed it to be consumed before the audience. The church is entirely out of debt and is in a flourishing condition at the present time.
