## A PANICKY FEELING

in trade is the cause of our present good news. A manufacturer couldn't borrow any more money, had to sell the best of his goods and sell quickly. We were in at the buying, and you shall have the benefit.

There will be rare picking while it lasts. You'll need to come quickly, though.

THE PEOPLE'S PILOT.

## THE SILVER QUESTION

Something to be Read by every Subscriber to the Pilot.

We desire to make an announcement, and we want each and every person who is a subscriber to this paper to carefully peruse the same. We have quite a number of delinquent subscribers on our books. In order to induce them to pay up, and to those who are in the habit of letting their subscriptions run until the end of the year before paying it, we have decided to raise the price of subscription to the PILOT to \$1.25. To those who will pay the year in advance, the old price \$1.00 will still be given. But if you do not pay in advance the price of the PILOT is \$1.25 per year. This means a great deal to us. We now have near 1,000 subscribers and if each and every one pays up promptly, it means near \$1000 a year to the paper and will go a long ways towards helping to pay the expenses of the concern. As it is, there is a large number who are delinquent from one to two years, and we would be under many obligations to them if they would call and settle. Hoping this change will meet your approbation we would be pleased to see you call and help swell our treasury.

We have a set of young ladies, who are just budding forth into society, and who are doing some very unbecoming things. One of the latest which they have attached themselves to, is the abominable practice of smoking cigarettes. They do it because they think it a smart thing. It is bad enough to see boys and men sucking at such things, but when girls take it up it makes us blush for them. Parents, are you aware of these practices your daughters are falling into? If not, you had better investigate. Not long since, we witnessed a couple of these young "bloods" puffing away for dear life on these filthy things. Be ashamed of yourselves, girls.

Readers of reform literature who desire something interesting of this nature should send to the American Nonconformist and get a copy of Stockwell's "Bad Boy," and also a copy of Stockwell's "Government Ownership of Railroads." The arguments in both these pamphlets are of the most convincing nature and written in a style that makes the ideas as plain as a nose on a man's face. The price of these pamphlets is ten cents each.

Dr. Patten, the lecturer who was with the Kickapoo Medicine Co., presented us with a batch of his Mexican Pinon soap one day last week. He probably thought we were in need of something of the kind. We have used it according to directions, and we can freely say that we have never a better kind of that article than his soap. He had quite a sale of it during their stay here. The Makeever House took 100 cakes of it.

Mary Rhodes, the little girl who won the gold ring given by the Kickapoo Indian Medicine Co., as a prize to the prettiest baby in the audience, is the three year old daughter of Rev. J. C. Test your own cows by taking ordinary glass tumblers of equal size. Keep milk from each cow separate and strain, using a tumbler for each cow. Don't fill too full. Mark name of cow on tumbler. Set the tumbler in ice or spring water twelve hours. Take carpenter's rule having inches marked to sixteenths. With this you can measure cream and tell which cow gives the richest milk and which the poorest.

Little Fred was kept in the house one day when the ground was covered with ice. His mother told him that if he went out he would most certainly fall and break his neck. In the night a thaw set in, and the next morning, when Fred went to the door, he shouted joyfully to his mother: "Mamma, I can go out now, for the danger of breaking my neck is all melted off."

THE PEOPLE'S PILOT, at Rensselaer, announces to its readers that hereafter the price of the paper for one year not in advance will be \$1.25, otherwise it remains at the old price. That is right and just, and we have thought of making the same rule. We have stated time and again that \$1 in advance was the price of the Enterprise. —Wolcott Enterprise.

In blanketing horses, a writer in the Stockman thinks it is a bad plan to throw a blanket on a horse immediately on stopping, while he is wet with perspiration, for then the blanket becomes wet, and he has an icy covering; but, he says, let them dry off a little before blanketing.
