*Dangers Menacing the Republic.*  
Draughon's Magazine for May.

If to-day there is danger ahead, it is not the first time that the American republic has faced it. The conditions of our national life invite danger. Security from invasion, natural resources, triumphs of invention and commerce, have led undoubtedly to an over confidence in ourselves. Americans are the most free handed, self-confident, generous, and confiding of peoples. They have gone so far in their spirit of trust as to even accept without much thought the tuition of scholastic economists. But the safety is that they are realizing it. Certain it is, that they will not in their concern turn to the tories for help. Great aggregations of capital have been permitted to develop until they menace the social order. This danger was foreseen even at the beginning.

**MYSTERIES!**

**The Nervous System the Seat of Life and Mind. Recent Wonderful Discoveries.**

No mystery has ever compassed with that of man life. It has been the leading subject of professional research and study in all ages. But notwithstanding this fact it is not generally known that the seat of life is located in the upper part of the spinal cord, near the base of the brain, and so sensitive is this portion of the nervous system that even the prick of a needle will cause instant death.

Recent discoveries have demonstrated that all the organs of the body are under the control of the nerve centers, located in or near the base of the brain, and that when these are deranged the organs which they supply are also deranged. When it is remembered that a serious injury to the spinal cord will cause paralysis of the body below the injured point, because the nerve force is prevented by the injury from reaching the lower portion, it can be understood how the derangement of the nerve centers will cause the derangement of the various organs which they supply with nerve force.

Two other classes of diseases are due to the imperfect action of the nerve centers at the base of the brain, not from a derangement primarily originating in the organ itself. The great mistake of physicians in treating these diseases is that they treat the organs, that is, the nerve centers which them being in fact contained in the body, and that the ordinary methods of treatment are wrong. All headache, dizziness, dullness, confusion, pressure, blues, malaise, melancholy, insanity, epilepsy, etc., are diseases of the nerve centers, no matter how caused. The wonderful success of Dr. Miles' Restorative Nervine is due to the fact that it is based on the foregoing principle. Dr. MILES' RESTORATIVE NERINE is sold by Dr. Miles' MEDICAL CO., Cincinnati, Ohio, on receipt of price, \$1 per bottle, six bottles for \$5, express prepaid. It contains neither opium nor dangerous drugs.
