WANTED--20,000 Pounds of Wool.

week and the putting on of the gravel (or sand) on Monday last.

The gravel that is being used on this road is secured from Mrs. Kannal's farm, commonly known as the Kannal sand bank, and has been extensively used here-

fore as plastering sand. The same was used in the construction of the college building for brick and plastering mortar.

The writer has visited the sand bank and does not say but what

there is some material that is fit

for road purposes, but he will

say that there is no practical

way of getting at it. You will

find upon examination, the grav-

el in veins from 3 to 5 inches

thick, and veins of sand from 8

to 12 inches. We voted for a

gravel road and want to see one

built, but if the people of Marion

township don't look to their

interests they will get a sand

pike that will be a public nuisance.

It is a matter of interest to

every tax payer, from the

fact that Marion township must

maintain it after it is built and

tax payers will be called upon

every year for repairs. So let

one and all be on the alert for

his interest and see that the

road is made according to the

required specification as voted

for. In this we believe the com-

missioners have over stepped the

line now. We understand they

have cut the specifications on

the slough grade from 32 to 25

feet, at the base. During the

Wakarusha ditch season, we

were told that no power on earth

or in heaven could change the

specifications an eighth of an

inch. Such moves as these de-

range our minds and we wonder

if the constitution has been

changed. TAX PAYER.

Common salt is one of the most valuable remedial agents the world contains. Used as a tooth powder alone or with a little prepared chalk, it whitens the teeth and makes the gums hard and rosy; it is a good gargle for sore throat, and if taken in time, will benefit if not cure the diphtheria. It will stop bleeding of the mouth, and in warm water is a good emetic and a remedy against several poisons. There is nothing better for sore feet or hands than salt and water, and for ordinary sore eyes, though a painful application, will often effect a complete cure.

An editor in central Indiana recently announced that in next issue of his paper he would begin the publication of a serial story entitled "The Prettiest Girl in Town." Over 100 girls have sent letters warning him not to use their names.

DeWitt's Sarsaparilla is prepared for cleansing the blood from impurities and disease. It does this and more. It builds up and strengthens constitutions impaired by disease. It recommends itself. A. F. LONG & CO., Druggists.

Owing to the inclemency of the weather, the Ladies' Literary Society did not meet last week, but will meet this week, Saturday, May 27th, with Mrs. Jenkins. The same programme will be given that was intended for last Saturday. AGNES COEN, Pres.

Another interesting feature has been added to B. F. Fendig's show window, in a complete set of World's Fair admission tickets. They are the property of Louie Wilcox, of Surrey, and he prizes them very highly. They are certainly valuable souvenirs of the world's greatest show.

Series of portraits of Cardinal Gibbons, Lord Rosebery and Richard Harding Davis will appear in the department of "Human Documents" in the June number of McClure's Magazine.

Every business house in Rensselaer should be closed next Wednesday afternoon during the Memorial services, as a respect for our honored dead, for whom the day is observed.

The inclement weather last Wednesday spoiled the field day exercises at St. Joseph College. A grand programme had been arranged, but the rain spoiled most of it.
