They are made by covering a linen collar or cuff with "celluloid" and are the only waterproof goods made with an interlining, consequently the only ones that will stand wear and give perfect satisfaction. Try them and you will never regret it. Always neat, and easily cleaned. When soiled simply wipe off with a wet cloth or sponge. Every piece of the genuine is stamped as follows:

Ask for those so marked and refuse any imitations, as they cannot possibly please you. If your dealer does not keep them, we will send a sample direct on receipt of price. Collars 25c. each. Cuffs 50c. pair. State size and whether stand-up or turned-down collar is wanted.

The total number of pounds of milk received in December was 103,683 about one third as much as the June delivery. The Elgin market, which governs the price in Chicago, has ranged about 22c and is still in that vicinity. The company is holding some of its product for a better market. He was jogging along at a comfortable pace when old 'Spot' chanced to lurch violently to lar-board and fall out, striking directly on her spinal column in the virgin snow. At sight of the poor beast lying by the roadside with her heels up and kicking great long rents in the atmosphere, the horses became frightened and ran for a distance of about two miles before they were stopped. Mr. Yoder who was thrown from the sled at the same time that the cow went over-board escaped, as we above stated, without injury.—Morocco Courier.

### Sleep, Justinian, Sleep.

The law has decided that Zimri Dwiggins took nothing from the commercial bank. The books show he did. Now can the law sustain her point by telling us where the money is, and if Zimri didn't keep it, when did he bring it back? The depositors would like to have \$40,000 applied to their credit. As stated some time since two boys drove off an \$8 shoat. They became fugitives from the strong arm of the law. Moral: It isn't how much you take but the way you take it.—Fowler Leader.

The strike of the ice harvesters at Cedar Lake has been won by the men, who were being paid 65c and board for an eleven hour day. The bosses have now agreed to pay \$1.15 and board or \$1.50 without board. It is probable that were it not for the shortness of the season the company would have been able to hire good men for 25c a day without board. The labor market was sufficiently congested last winter to reduce labor on the streets of Chicago to the minimum, two bowls of soup a day, and applicants were turned away.

### Goodland Electric Light.

"Goodland has been forced to exchange their 600 light dynamo for a 1200 lighter, as the town could not supply the number of people wanting the lights. They are already pulling 700 lights with their small dynamo, which is more than it will easily stand. The commercial rate in Goodland is 30 cents, residence lights 20 cents. Their indebtedness, including the annual bond, is \$800; interest on same, \$480, cost of coal, \$400; engineer's salary, \$600. Total, \$2,280 per year. Their receipts at present from the 700 lights, would be in a year, \$2,100. They also have 22 arc lights on their streets which on the above basis costs the town but \$128. They have 100 more lights spoken for and when they are on, this will increase the revenue of the plant at least \$350 more, which will allow them to pay off their debts as they come due and leave \$122 for incidental expenses and repairs. Goodland has her electric plant on a paying basis and will pay for it without any additional tax on her citizens, besides the city being lighted for practically nothing. The least thing the people there can do would be to give a vote of thanks to their town board who have so well and economically managed the business. Their action stands out in bold relief when placed against the record of another town board we might name, and we also notice in their expense account that the town paid the expenses of its board when they went any place to inspect electric plants or apparatus. There were no favors to return and Goodland got the best."

The above is taken from the Oxford Tribune, which paper strongly intimates that Oxford has been badly swindled in the installment of its plant, and charges incompetency of management in fixing rates so high that but a small portion of the citizens are patrons, causing a heavy deficit in operation. A new management is at the helm now and promises to put the plant on a paying basis. There is not a valid reason why a city cannot operate such public institutions as economically and more satisfactorily than private corporations.
