BIG PROFITS ON Small Investments.

Returning prosperity will make many rich, but nowhere can they make so much within a short time as by successful speculation in Grain, Provisions and Stock.

\$10 SYSTEMATIC PLAN OF SPECULATION

It is a well-known fact that there are thousands of men in all parts of the United States who by systematic trading through Chicago brokers, make large amounts every year, ranging from a few thousand dollars for the man who invests a hundred or two hundred dollars up to \$50,000 to \$100,000 or more by those who invest a few thousand.

It is also a fact that those who make the largest profits from comparatively small investments on this plan are persons who live away from Chicago and invest through brokers who thoroughly understand systematic trading.

Our plan does not risk the whole amount invested on any trade, but covers both sides, so that whether the market rises or falls it brings a steady profit that piles up enormously in a short time.
