THE MYSTIC FOR 1896.

Every part is made on honor and we guarantee it.

It is a model of beauty, strength and ease of management. We use only one class of material—the highest quality obtainable.

Our mechanics work by the day, and thus reduce poor construction to almost nothing.

Our improvements are all the most careful critic can desire.

We build for future reputation, not for the benefit of to-day.

Our bearings are dust-proof. Our tubing is the finest English tube made.

Our ends are case-hardened and made from our own designs.

Our chain is the easiest chain in the world. It is practically without friction, does not stretch, and needs no oiling. Our new small sprocket is cut to relieve the draft of the chain from the sprocket tooth by a device between the teeth. This chain and

sprocket is worth \$25 to any wheel, and yet we charge nothing extra for this construction.

Our large sprocket is changeable, and our handle bars can be adjusted to suit the rider.

Our wheel weighs exactly twenty-four pounds, but we challenge any twenty-pound wheel to run easier.

The reason why we make the wheel twenty-four pounds is, we know it will stand any country road. The Mystic costs to build 30 per cent more than job wheels. We can not compete in price with any wheel not made with the same care and accuracy.

Do not buy a low grade wheel, as it will be a poor investment.

Before you buy see a Mystic, and thoroughly examine its parts and general construction.

We court inspection. We take no back seat to any wheel made.

Our Exhibit at the Great Cycle Show at Chicago, January 4 to 11, is booth No. 103. Send for Catalogues. Write for particulars. Call for agencies.

A Fossilized Fly.
A workman in a limestone quarry at Maquoketa, Iowa, the other day found imbedded in the rock, twenty-five feet below the surface, a fly. The fossil is perfect. The feelers and legs and delicate wings, as well as the body, are as complete as when the insect alighted and stuck in the ooze away back in the upper Silurian period ages ago.

Steam Trenches at Constantinople.

A correspondent who lately visited Constantinople says that what impresses and pleases the passing tourist more than all is the appearance on the Bosphorus of the trim steam yachts or dispatch boats belonging to the em-bassies and lying close in shore.

NEW GOODS.

In the opening of this new hardware store and the establishment of a cash system, Antrim & Dean have carefully considered the undertaking. The stock which they offer for sale is paid for, and all the discounts which ready cash could influence in these hard times has been obtained. They were not hasty in purchasing, and took advantage of several opportunities to obtain lines of goods far below wholesale quotations, and they propose to give their customers, with cash, and equal opportunity to buy cheaply. They have a most attractive stock of goods, centrally located, and hope to have the public bestow a portion of their favors upon them, if they prove to deserve it. A first-class tinner is employed for all kinds of new and repair work, including roofing.
