THE PILL THAT WILL**THE PEOPLE'S PILOT.**

BY F. D. CRAIG, (Lessee).

PILOT PUBLISHING CO., (Limited.) Proprietors.

THE PEOPLE'S PILOT is the official organ of the Jasper and Newton County Alliances, and is published every Thursday at

ONE DOLLAR PER ANNUM

Entered as second class matter at the post office in Rensselaer, Ind.

It is reported that the year 1896 is thus far one of the most profitable in the history of insurance companies. There have been both increased rates and decreased losses. The losses for the eleven months ending Dec. 1, 1896, are reported about \$12,000,000 less than for the corresponding period of 1895.—Indianapolis Sentinel.

The increased earnings are in keeping with those of all the great trusts.

The next legislature of Indiana will probably consider a bill for the abolition of the "quart shop." It is an institution that no community wants, and is now always able to flourish in localities where the regular saloon is forbidden. While the solons are about it, we would suggest that the drug store bar be given attention, and possibly treated like other saloons; that back doors to all saloons be forbidden; that the regular licensed saloon be protected from all illicit competition, and that every patron of a saloon be obliged to take out a license to drink.

Gigantic trusts continue to be formed with reckless abandon that is gradually bringing the citizens of the country to a realization that there is great danger in sight for the small manufacturer. The latter are gradually being wiped out of business existence, as the many failures reported each day testify. Wages of employees are being rapidly reduced by the trusts, and then with another stroke of the pen the selling price of commodities manufactured by them are increased all the way from 20 to 50 per cent.

Fraternal societies are also beginning to complain of the slowness with which assessments are paid, and it is claimed that men are now asking for charity whose names two years ago were published among the lists of philanthropic people as contributors to aid the destitute.

License Saloon Patrons.

There is no charge for this suggestion; that in the revision of the saloon law this winter by the Indiana legislature, provision be made for licensing patrons of saloons. This would relieve the saloonkeeper of a great deal of responsibility. He would have no fear of selling to habitual drunkards, minors or other ineligible classes, for each patron would be obliged to produce his license before his glass would be filled. Nor would the law interfere with any man's personal liberty, because no one would be forced to take out a license; it would simply restrict the saloonkeeper to selling only to licensed drinkers. Of course there would be a little expense attached to this plan, such as advertising the application the same as in applying for a saloon license, mere incidentals in so important a matter.

The more we consider this proposition the greater its possibilities appear. Think for a moment what a splendid source of revenue this opens up for the public treasury. Why even at the nominal fee of \$25 a year it would soon establish gold-cure sanitarians in every county seat,

build a high school in every township, gravel every turnpike in Indiana, and pension every disabled and aged person. Why the people could dig canals bigger than Gifford's all over the state; they could equip an army large enough to whip Spain and free Cuba, all with the revenues from this grand scheme.

There would be no trouble at all about the fees being paid, for if there is any one special purpose for which people can raise the wind, it is above all other things for liquor. And should there be any good customer in temporary embarrassment, why the saloonkeeper could help him get his license just the same as the breweries now often help the saloonkeeper get his license. In fact it might pay, in the case of a first rate customer, to bear the whole expense of keeping up his license. It's a grand, glorious, triumphant Cuba libre.

The Income Tax.

The success of the income tax is only a question of time. We venture the prediction that this feature of the democratic platform of 1896 will be incorporated in the declaration of principles in 1900. A scientifically constructed income tax, carefully graded, offers the best solution of the problem of equal tax burdens. It is a reform which must come. The fact that the declaration for such a tax is still drawing the fire of the republican press and leaders is evidence that it is regarded as an issue that was not permanently disposed of by the results of the recent election.

It will be well to remember the language used by Associate Justice Harlan in his dissenting opinion on the decision of the supreme court. "The practical effect of the decision," he said, "is not only to disregard great principles of equality in taxation, but the further principle that, in the imposition of taxes for the benefit of the government, the burdens thereof should be imposed upon those having most ability to bear them. The decision, in effect, works out a directly opposite result, in relieving the citizens having the greater ability, while the burdens of taxation are made to fall most heavily and oppressively upon those having the least ability. It lightens the burdens upon the large number in some states subject to the tax, and places it most unequally and disproportionately on the smaller number in other states. Considered in all its bearings this decision is in my judgment the most disastrous blow ever struck at the constitutional power of congress."

The adverse ruling of the supreme court practically excluded any recourse to incomes from real estate and personal property for the purpose of raising revenue to meet the wants of the government under any circumstance. It was a decision that exempted wealth from its rightful share of the tax burden. Such a decision cannot always stand, and it is the duty of the democratic party to continue its warfare upon what only can be regarded as a concession to wealth and a discrimination against the masses.

Two Silver Champions. Doubtless many of our readers, who appreciate the importance of the restoration of the bimetallic standard, would like to subscribe for and support a farm paper which while unsurpassed in its agricultural, household and other departments, at the same time has been the leading exponent of the bimetallic principle of finance. With a view to supplying this want, we have made a liberal clubbing arrangement with the Farm, Field and Fireside of Chicago. For many years this great paper has been pointing out to the farmers that low prices were the result of a contraction of standard money to the gold basis and urging them as a patriotic duty of self defense to vote for the restoration of silver.

So effective has been its work, especially during the late campaign, that Chairman Jones acknowledged to Wm. J. Bryan that it had done more towards the restoration of bimetallism than any other single agency.

As will be seen by our combination offer on another page, we can give this paper in combination with the People's Pilot, both one year, for the low price of \$1.60. This offer also includes twenty packets of the best seeds in the market from the Farm, Field and Fireside's free seed distribution, where 10 cents extra is

paid for postage and packing. The Farm, Field and Fireside and the People's Pilot are two papers which Mark Hanna's boodle could not influence in the late campaign.
