

CLOSING OUT... SALE

CLOTHING and Ladies Wraps..

We are obliged to close out our ready made clothing and ladies wraps to give room to other goods.

They must sell. If you are wanting anything in that line you can make big money by coming to see us. We are making prices to correspond with 16c corn. Do not fail to come in and see us.

C. D. NOWELS, Cheap Cash Store.

HERE'S YOUR OP- PORTUNITY.

A New Eight-volume En- cyclopaedia

At About Your Own Price.

Every one who has had occasion to consult the cumbersome old encyclopedias for some needed information, effectually concealed in some long article, will be glad to know of the appearance of a new general reference work built along different lines, so that any child who can read may successfully consult it.

Such a work is The New Standard American Encyclopedia in eight large quarto volumes, and which embraces the substance of all the other encyclopedias, besides a very large amount of new up-to-date matter none of them contain. It introduces a vast number of new words, names, facts, ideas, inventions, methods and developments. It treats, in all, over 60,000 topics, which is from 6,000 to 10,000 more than any other work. The publishers of the "Standard American" have also lavishly embellished the new work. There are over 3,500 illustrations, which cover every conceivable subject, lending new interest to the descriptions, and forming a succession of pleasing surprises. It also contains over 300 colored maps, charts, and diagrams, and constitutes a complete atlas of the world such as no other encyclopedia has undertaken to present. This feature will be found of the highest value in the education of the young, for the pictures and colored maps will have a distinct fascination for them, and thus prove an important incentive to reading and study.

The professional or business man, whose time is money; the teacher, who is called upon to at once answer all sorts of questions; the toiling student and inquiring scholar, at home or the desk, will find in the new work the most useful and practical library in the world for quick and ready reference on all subjects. One who owns it will possess the equivalent of a score of other reference books which would cost many times the price of this.

Another feature in which the new work stands absolutely alone, is in its very full appendices, which embrace over 100 subdivisions, including a Biographical Dictionary, a Dictionary of Technical Terms, a Gazetteer of the United States, Presidential Elections in the United States, Religious Summaries, State and Territorial Election Statistics, Statistics of the population of the world, and a veritable mine of information on thousands of subjects of universal interest and importance.

But it is in its treatment of recent subjects that the Standard American will be found of paramount value. All other encyclopedias are from five to ten years old, and are silent regarding hundreds of topics that every reference work should contain. Such, for instance, as "The X-Ray," "Argon," "Horseless Carriages," "The Atlanta Exposition," "Color Photography," etc., etc. It also gives biographies of hundreds of people who have lately become famous, such as Prof. Roentgen, discoverer of the "X-Ray," Ian MacLaren, Dr. Nansen, the explorer, Rudyard Kipling, etc., etc. On account of its lateness in all these matters, as well as its accuracy, it has become the standard in Schools, Colleges, Courts, Public Libraries, and wherever important questions come up for discussion.

It would therefore seem that no professional man, artisan, mechanic, teacher, pupil, or farmer, can well afford to be without this most useful, practical and latest of all encyclopedias, especially as its price has been so arranged as to make the work a great bargain, and render its possession possible to almost any one who earnestly desires to own it.

Detailed particulars regarding the work and how to secure it at practically your own price, may be found in an advertisement on another page of this issue.

Confidence.
To enjoy the confidence of the public, honestly won, is a priceless boon. The confidence reposed in John Eager by the people of this community is without doubt the chief reason for his great success in the grocery trade. His name and fame as a square dealer is familiar in every household. To say that an article came from Eager's is a guarantee of its purity and full weight. In his establishment a child gets the same quality of goods and the same correct, exact weights as the keenest, shrewdest buyer. He is a close, careful buyer and handles nothing in his line but the best goods which are always bought for spot cash and sold quick at a close margin. His success in business and in winning the confidence of the people is no secret, on the contrary, it is an open book that can be read by every business man with profit. It is simply to invite the best trade through the best known channels, keep the best quality of goods, sell them at fair prices, give honest weight and measure, and the battle is won. It is easy. Any business man can reach Mr. Eager's plane in the estimation of the public by imitating his straight-forward, many methods.

SONG OF THE BURDEN BEARER.

Over the narrow footpath
That led from my lovely door
I went with a thought of the Master,
As oft I had walked before.
My heart was heavily laden.
And with tears my eyes were dim,
But I knew I should lose the burden
Could I get a glimpse of him.

Over the trodden pathway,
To the fields all aborn and bare,
I went with a step that faltered
And a faint that told of care.
I had lost the light of the morning,
With its shimmer of sun and dove,
But a gracious look of the Master
Would the strength of morn renew.

While yet my courage wavered
And the sky before me blared
I heard a voice behind me
Saying a tender word,
And I turned to see the brightness
Of heaven upon the road
And suddenly lost the pressure
Of the weary, crushing load.

Nothing that hour was altered—
I had still the weight of care—
But I bore it now with gladness
Which comes of answered prayer.
Not a grief the soul can fetter
Nor cloud its vision when
The dear Lord gives the spirit
To breathe to his will amen.

—M. E. Sanger in Witness.

Wood Sawing 40c a Cord.

The Wood Brothers have a fine new outfit for sawing all kinds of wood; cord wood 40 cents per cord. They desire a share of public patronage. Leave orders at Pilot office.

The Coen & Brady elevator is now completed and ready to do business. It is equipped with the latest improved machinery and is the most modern elevator in the country. It has a level drive-way and platform dump.

That 832 Foot Bridge.
By the extension of a bridge north of Rensselaer, Jasper, county will have probably the longest wagon bridge in the state, the length being 832 feet.—Delphi Citizen.

The distinction of having the largest bridge in the state comes from the possession of two other state eclipsing specialties, viz., the greatest ditch building pirate and the only boneless backed board of county commissioners. Most any county can have an 832 foot bridge by running a drainage ditch so as to divert water from their natural course and then leave the outlet dammed up so as to flood a few thousand acres. All that is needed is a B. J. Gifford and a triangle court willing to build bridges instead of protecting suffering citizens by ordering the water removed. It might be remarked in this connection that the people of Jasper county will make matters so warm for some one that the flood now ruining many fine farms will be removed and there will be several hundred feet of bridge for sale on some bargain counter.

Bucklin's Arnica Salve.
The best salve in the world for Cuts, Bruises, Sores, Ulcers, Sgrt. Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25c per box. For sale by F. B. Meyer.

The leading Grocers,

Have both of their stores filled with Christmas goods, and more arriving daily, and nothing is more appropriate for a present than a nice piece of Furniture or China. We have the largest and finest line in town. Also we have not forgotten the children, as we have a choice selection of...

DOLL CARRIAGES, DOLL CRADLES, ROCKING HORSES, SHOE FLY ROCKERS, CHILDREN'S DESKS, Folding Tables and Chairs.

Special prices made to school teachers on candies and nuts....

LA RUE BROTHERS. Rensselaer, Ind.

TO SUBMIT TO TESTS.

Dr. Powell, Who Says He Has a Cure All, to Have a Sanitarium For His Theory.

Dr. Thomas Powell, who confidently believes that he has made discoveries in medicine whereby the whole science and practice of that profession will be revolutionized, has left Columbia, Mo., for Los Angeles, where he goes at the solicitation and expense of Chicago capitalists and scientists who are going to install the doctor in a sanitarium and give his theory a practical test.

Dr. Powell is exceedingly reticent in regard to his discovery and absolutely refuses to disclose the nature of the remedy, except to say that it is physiological and constitutional in character. He further states that he has explained its character to a few medical scholars, who agree with him in saying it is entirely practical. The preparation will immune from all dread diseases and is either in fluid or solid form. Contrary to general belief, it is not a serum.

Dr. Powell is a man about 60 years of age, being slight of stature and remarkably active for one of his years. He says he feels as young as he did 40 years ago. After graduating from the New York Medical college he came west to practice his profession, but all the while keeping up his studies. He located in Paola, Kan., and from there he went to Springfield, Mo., where he enjoyed an excellent practice and acquired a small fortune.

After studying for 12 years he began to investigate along the lines upon which his discovery was made. He became so engrossed in his investigations that he abandoned his practice, and for the last 15 years he has done comparatively nothing but work on his theory. He spent all his fortune, and at last he settled in Columbia to get the advantage of the medical library of the state university. With his fortune gone and nothing left but a set of watch repairing tools he went into the business of repairing watches and clocks, all the while keeping up his work of scientific research. It is said that he has gone four days without sleep.—St. Louis Post-Dispatch.

SUBMARINE WRECKING.

A Craft to Explore for Sunken Vessels to Be Built in Baltimore.

The Columbian Iron works of Baltimore have contracted to build a submarine wrecking boat, the first ever built for practical submarine engineering work. Simon Lake of Baltimore is the inventor of the craft, which, it is claimed, will always be under perfect control, rising to the surface and submerging at will, and capable of being propelled in any desired direction when on the bottom of the waterway.

It will be used principally for searching the bed of the ocean adjacent to coast lines and in finding and recovering sunken vessels and their cargoes. According to the specifications, the new boat will be about 54 tons displacement and will have a crew of six men. She will, Mr. Lake claims, be able to cruise around on the bottom for a day as a time before it will be necessary to ascend to the surface to renew the air supply and electrical energy.

On the boat there will be a powerful searchlight to light up a pathway in front of and on either side of the vessel as she moves along over the bottom. The hull is to be of steel and strongly ribbed and guaranteed by the contractors to resist the pressure of the water at required depths. The contract calls for the completion of the boat by March 1, 1897.

She Earned It All.

Melba has \$100,000 invested in gowns, it is said, one of them having cost \$15,000. Though \$15,000 is a good deal for a single dress, it is worth while to note that the wearer earned it herself.—Boston Globe.

The Same...

Old Sarsaparilla.

That's Ayer's. The same old sarsaparilla as it was made and sold by Dr. J. C. Ayer 50 years ago. In the laboratory it is different. There modern appliances lend speed to skill and experience. But the sarsaparilla is the same old sarsaparilla that made the record—50 years of cures. Why don't we better it? Well, we're much in the condition of the Bishop and the raspberry: "Doubtless," he said, "God might have made a better berry. But doubtless, also, He never did." Why don't we better the sarsaparilla? We can't. We are using the same old plant that cured the Indians and the Spaniards. It has not been bettered. And since we make sarsaparilla compound out of sarsaparilla plant we see no way of improvement. Of course, if we were making some secret chemical compound we might.... But we're not. We're making the same old sarsaparilla to cure the same old diseases. You can tell it's the same old sarsaparilla because it works the same old cures. It's the sovereign blood purifier, and—it's dyers.
