Directors Meeting.

The directors of the Pilot Publishing Company are called to meet at the Nowels House, Rensselaer, Saturday, Feb. 20, 1897, at one o'clock p. m. There is business of importance to come before the meeting. D. B. Nowels, President, JAMES PIERCE, Secretary.

The trial of the State against John Poole in the Benton Circuit Court, was brought to an abrupt ending last week by the Court instructing the Jury to bring in a verdict of guilty, and finding that the defendant was insane when he committed the act. This action was necessitated by the fact that in 1893 Poole was adjudged insane by a court of inquiry and sent to the asylum at Indianapolis. His wife secured his release on parole, and investigation disclosed the fact that he had never been discharged from the asylum, and was therefore "officially" insane. The Review says this termination of the trial was very unsatisfactory to the people acquainted with Poole and the facts in relation to his recent murderous attack upon Quigley and dark hints were dropped to the effect that the Neilings procedure might be repeated. The sheriff hastened to land John in the asylum. Quigley, John's victim, is not yet out of danger, although it is believed that he will recover.—Goodland Herald

Your Boy Won't Live a Month.

So, Mr. Gilman Brown, of 34 Mill St., South Gardner, Mass., was told by the doctors. His son had lung trouble, following Typhoid Malaria, and he spent three hundred and seventy-five dollars with doctors, who finally gave him up, saying: "Your boy won't live a month."

He tried Dr. King's New Discovery and a few bottles restored him to health and enabled him to go to work a well man. He says his son's present good health to the use of Dr. King's Discovery, and knows it to be the best in the world for Lung trouble. Trial bottles Free at F. B. Meyer's Drug Store.

Reunion of Two Brothers.

At the home of Mr. and Mrs. Jas. Winters on the evening of Feb. 9th occurred the reunion of two brothers. Eddie Storrs, or Winters as he is known here, was taken several years ago by Mr. Winters to raise, from the orphan's home at Cincinnati. There were several children, two brothers and two sisters at least, and inquiry was made at the home of Eddie's brother and sisters. The brother was located at Goodland where he had been for ten years past and the two sisters are married one living at Marion. Mr. Green, superintendent of the orphan's home, came up and brought the two brothers together and will possibly at some future day see the four reunited after years of separation.—Wolcott Enterprise.

Farmers' Mutual Insurance.

From Wolcott Enterprise.

Editor Enterprise:—Some of your people have been writing inquiries in regard to the Farmers' Mutual Insurance Association that we have organized under a law passed by the General Assembly of the State of Indiana and in force Sept. 19th, 1881, legalizing such insurance associations, under which 10,000 more farmers can form themselves into incorporated companies for the purpose of mutually insuring their property against loss or damage by fire or lightning. Our company starts out with about fifty members. The business of the company is transacted by a board of six directors, one of whom acts as president of the Board and Association, and one acts as secretary and another is treasurer. There is one adjuster and as many solicitors as the board may choose. All applications for membership are made through the solicitor, the applicant paying the solicitor \$1 for making the survey, and ten cents on each hundred dollars insured, as premium, which amount goes into the treasury and can be paid out on any debt of the company. Policies are issued for from one to five years. Buildings are taken at two-thirds value, as also horses, mules and cattle.

The Greenings are not so attractive in appearance, but they have a firm hold on the English market for cooking purposes, more especially in the north. Good, clear, unspotted Greenings bring in the ordinary season from \$2.50 to \$3.50 per Canadian barrel, an extra price being paid for large apples. Special importance is attached to size in the case of Greenings; buyers willingly pay enhanced prices for large specimens, as a rule cooking them in the form of dumplings. Small Greenings would easily fall off a dollar a barrel in price, and thus render the shipment unremunerative.
