Some of the property owners on Laporte street between Center and the railroad are signing a petition to the common council for a forty-foot pavement instead of the thirty-foot plan now contemplated by the ordinance. The argument is that the street is essentially a business thoroughfare and the amount of traffic it carries, together with the requirements of the hotels, express office, depot and church for standing teams, demands a pavement of full width. A majority of the lot owners favor the wide street.

A Horrible Death.

By the explosion of a barrel of whisky in a freight car at Logansport Saturday two men lost their lives and two others are badly injured. Lawrence Beeson died immediately after being taken from the car and William Ekeken lived a few hours longer. John C. Moors will probably recover but there is some doubt about Carl B. Neff.

The men were engaged in repairing a car in which the whisky was stored and were pounding a bolt with a heavy hammer when a spark was struck and the liquor was exploded. The car took fire and hemmed the victim's in, two of whom succeeded in getting out and jumping into the canal to extinguish the flames in their clothing.

The theatrical season of 1901-02 in Plymouth will be opened in August and will include a larger list of attractions than any former season. The bookings begin with "A Star Boarder" and continue with Denton's "Nightingale" company, "A Jolly Lot," Robinson's "Humpty Dumpty," "Old Dan Tucker," "Casey's Wife," "Si Plunkard," Marie Corelli's, Thelma, Fanny Rice, J. H. LaPearl's combination, "Si Stebbins," "The Deemster," "Where the Laugh Comes in," "The Wall Street Brokers," and "A Breezy Time."

Most of these companies, carry their own music and many of them are already known in Plymouth.

Concerning Gas

(From South Bend Tribune.) INDIANAPOLIS, June 24.—State Geologist W. S. Blatchley gives the opinion that there is a huge reservoir of undischarged oil somewhere in the bowels of the earth in northern Indiana and while he thinks that sooner or later it will be discovered and somebody will get rich he says the people of St. Joseph county have little to hope for along this line.

"I think," said he, "that the chances for finding oil in paying quantities in the neighborhood of South Bend are very slim. Any oil that might be found near South Bend would be of the same quality as that found at Medaryville, Jasper county, in the corniferous limestone. The Medaryville oil is good for lubricating purposes, but is too thick to make good illuminant. There is no oil in the vicinity of South Bend, or very little at most, neither is there any natural gas. Should any oil be discovered at Argos it will be of the corniferous limestone variety. There are but three places in the state where this kind of oil is now found—Terre Haute, Logansport and Medaryville. The ordinary commercial petroleum comes from Trenton rock.

"The main body of residual oil is still left in the gas belt. While over 32,000, 000 barrels of oil have been taken from the earth in Indiana in the last 10 years, only a relatively small portion of the gas field has yielded oil and I am satisfied that in time more than half of the field will be oil-producing territory. My opinion is that this body of oil will be discovered in Grant, Madison and Delaware counties especially. I have no expectation that gas or oil will be found in paying quantities at Berrien Springs, Mich., where there is oil excitement at present.

Where to Celebrate the Fourth.

The only place in Northern Indiana where the Fourth of July will be celebrated formally is at the enterprising city of Mishawaka, where a successful celebration is assured. Among the numerous attractions offered are: a monster parade, bicycle and other races, orations, sports, ball game, balloon ascension, illuminated bicycle parade, and a magnificent display of fireworks. Special trains on all roads, special coaches on regular trains, reduced rates. 3211
