Apply or write to him at Francesville, Indiana. 2t

The enormous crop of oats in this county is now being threshed. The measured yield is very large, and they weigh out more than they measure. Some fields on the McCoy and Walter Porter farms, in Jordan tp., yielded over 50 bushels to the acre. Probably many fields in the county will do that well and some still better.

Rensselaer Wilkes did not get a place in the big trotting race at Cleveland last Friday. He being number six in the summary. He had some very fast horses against him, the race being made in 2:13½, 2:14 and 2:15. Wilkes was to have started yesterday, at Buffalo, in a \$5000 race, but the result had not reached Rensselaer at our time of going to press.

Henry Neihaus, a 17 year old Lafayette boy, addicted to the train-jumping habit, was cut to pieces and instantly killed, by a Monon freight train, at Lafayette, last Wednesday. This accident came just a week after the death of young Cearing, at Reynolds, under exactly similar circumstances. It is only a question of time when a like accident will occur among the train-jumpers of Rensselaer.

The Board of Directors of the Kentland Fair Association are making active preparations for the sixth annual meeting to be held September 11th to 14th inclusive. One of the new features will be the "Old Settlers Day" on Wednesday September 12. A number of old settlers have signified their intention to be present and make speeches. A new, accurate and right-up-to-date map of the town of Rensselaer has just been completed by Civil Engineer Bostwick, who is having copies of the same printed, and offering them for sale. The map is on a large scale, 200 feet to the inch, and shows accurately every street, alley, lot, and block in the town, including all the additions and subdivisions up to the very latest, such as Sunnyside, to the remote northeast, and Magee & Benjamin's on the far northwest.

A Japanese entertainment, will be given at the Opera House, Tuesday night, Aug. 7. There will be an exhibit of scenery, showing some of the most beautiful and interesting places, and people of Japan. The entertainment will close with a Japanese wedding, in which will be used five characters all dressed in native costumes.

The movement looking towards a joint re-union of the survivors of the 46th, 48th and 87th Indiana regiments, in Rensselaer, has succeeded, and the re-union now is a settled fact. It will be held August 29th and 30th. That the people of Rensselaer and surrounding country will do their full share to make the re-union a grand success, will go without saying. The people of Rensselaer are nothing of not hospitable, and not more hospitable than patriots.

A pleasant party met at the residence of the Misses Smith, in the north grove, one evening last week, the occasion being the eightieth birthday of Miss Julia, the elder of these most estimable, and, considering the number of their years, phenomenally active sisters.

The Rensselaer School Board has filled the two vacant positions in the list of teachers for the ensuing school year. For high school principal they have secured the services of Prof. A. H. Pardue, of Warrick county. He is a graduate of the State Normal School and has been a student at Purdue University and also graduated from the department of Geology at Leland Stanford Jr. University, last June. In this last science he is especially proficient. The vacancy in the sixth year room has been filled by the selection of Miss Alice Irwin, a graduate of the Rensselaer high school, and a well known teacher in the schools of this county.

Rumors have for some time been in circulation regarding a very serious trouble in which a former resident of this vicinity has become involved, in his present residence in Missouri. Nothing less serious, in fact, than a shooting affair, in which the opposing party was killed. The friends here of the ex-Jasperite are perfectly confident that a clear case of self defense can be proven in his behalf, and as he was always noted here for his peaceable and amiable disposition, we have no doubt but that their belief in that respect is well founded. The true inside facts in the case are only known to a very few persons, and will not be until the case comes to trial; at which time they will be given to our readers as they are then brought out.

A narrow tract of country in Barkley township was visited by a very heavy wind during the storm of last Saturday. It blew the roof off of one of Giffords dredge boats; unroofed J. N. Baker's barn, and blew down 13 apple trees, on the old Sam Wood's place, now the property of Mr. Gifford. Some of these trees were carried 100 yards by the wind, after being blown down. The boarding-sew accompanying the Gifford dredges broke loose from its moorings and started down the ditch at a tremendous speed, fully 13 knots to the week. It was finally brought to anchor however, without serious injury. The same storm also reached into parts of Gillam and Walker tps., turning over many haystacks, breaking down trees etc.

THE REPUBLICAN is now the proud possessor of one of those magnificent maps of our magnificent state, just published by R. Ryse, of Indianapolis, and some mention of which has previously appeared in this paper. The map is absolutely correct, the original for each county having been drawn by the county surveyor, thereof, from the actual official records. It is drawn on a large scale, four miles to the inch, and shows every section of land a quarter of an inch square. Besides showing the sections, it gives, of course the townships, civil and congressional. The counties are in different colors. The map is as large as a barn door, four feet by six, to be exact, and printed on very strong and heavy map muslin. It shows every town and post-office in the state that has a name, including such new places as Aix, Parr and Valma, and even such names without towns as Pembroke, northwest of Fair Oaks, and Forest City, west of DeMotte, in this county.

On the margin of the map the method of U. S. land survey is fully and clearly explained and illustrated. On the margin is also given the area, location, county seat and population of every county. The map is especially designed for the use of schools, and verily, it deserves a place in every school room in the state, where it would be an invaluable aid to the rising generation in acquiring that most necessary of geographical information, a thorough knowledge of the geography of their own state.

A sensational story was published last week, to the effect that Fred L. Chilcote, now of Albany, was likely to get into trouble, for mistakenly swearing a girl was 18 when she was a year younger. A friend of Fred's wanted a license to marry the girl. The old man in the case got his back up about it, but will probably soon come around all right.

There is no better and no abler all-around weekly newspaper on earth, than the New York Tribune. Its subscription price is one dollar, and it is worth many times that amount in any family. The Tribune and THE REPUBLICAN both one year for \$1.75. This is for our old subscribers, as well as for new. For those in arrears as well as for those in advance.

Our townsman, John W. King, well sustained the honor of Rensselaer at the big three day shooting tournament at Lafayette, last week. At which, however, owing to poor health, he only participated for two days. In every event that he contested, he had to shoot against a large number of the best shots in northern Indiana, and some of the best in the state. On Tuesday he got a share of the first money in three events; of second money in two, and of third in one or two. On Wednesday he was among the firsts in one event, and among the seconds in two, and had a good place in some others.

There were two games of base ball at Makemself Park, last Friday afternoon. The first was between the second nines of Monticello and Rensselaer, in which the Monticello boys came out on top, by a score of 23 to 15. The second game was between the Monticello first nine and the Rensselaer Models. This game resulted in favor of the Models, a score of 8 to 15. Both clubs used imported players; the Monticellos having secured four from Hammond and one from some other place. The Rensselaer boys got a tip as to what the other club was doing in time to send to Chicago for a pitcher, and a catcher, both being fine players and the pitcher especially so, he being the pitcher of the Atlas club which played here July 4th, and who was hit then only when he choose to be.

The presence of these two professionals was kept a secret, and they remained at the hotel until the last minute. The Monticello sports came over in large numbers; they thought they had a sure thing and they bet their "stuff" freely. The result was that if they had not had return tickets to Monticello they would have had to borrow their passage money or walked. They came after wool and went back fleeced. They came to skin and they went back "skun." Generally speaking we do not think this practice of working in hired professionals is the sportsman-like and honorable thing to do, in ball games between neighboring towns, but in this case the Monticellos began the practice, and they were justly beaten at their own game. The following is the score, by innings. The Models not playing the last half of the last inning.

Monticellos	1	2	3	4	5	6	7	8	9
Models	0	2	1	0	0	0	0	0	0
	5	3	0	3	1	0	4	0	0
