

The People Believe

What They Read About Hood's Sarsaparilla

Their Faith in This Medicine is Grounded on Merit

They Know It Absolutely Cures When Other Medicines Fail

Hood's Sarsaparilla is not merely a simple preparation of Sarsaparilla, Dock, Stillingia and a little Iodide of Potassium. Besides these excellent alteratives, it also contains those great anti-bilious and aperients, Mandrake and Dandelion. It also contains those great kidney remedies, Uva Ursi, Juniper Berries, and Pineweed.

Now, of these all, Other very valuable aperientive agents are harmoniously combined in Hood's Sarsaparilla, and it is carefully prepared under the personal supervision of a regularly educated pharmacist.

Knowing these facts, is the bidding truth, the people have in Hood's Sarsaparilla a matter of surprise? You can see why Hood's Sarsaparilla comes when other medicines fail.

"My little girl was afflicted with convulsions and fits for seven years. She was attended by physicians and tried many different kinds of medicine without relief. After taking a few bottles of Hood's Sarsaparilla she was cured!" Miss EMMA FRANKLIN, Homewood, New York.

Hood's Sarsaparilla

Is the Best in the Country. True Blood of the Earth. 81 St. Louis, C. I. Hood & Co., Manufacturer.

Hood's Pills \$1.50

The proposition to spend \$120,000 for a new state asylum at Columbus is not worthy of consideration and the legislature should not waste its time on the bill.

The so-called reformers did not cut much of a figure in the Cincinnati primaries. It is claimed that George Cox made the nominations, and it is admitted that they are good ones.

Commander Bob Evans, the fighting commander of the battle-ship Iowa during the late war, declared in an interview at Hamilton, Ohio, yesterday, that Admiral Dewey is a "woolly headed Repub." —

Calamity croakers would do well to put the following Association Press dispatch from Pittsburg in their pipes and smoke it:

The greatest wave of prosperity that has swept over this city for years struck Pittsburg this week, and it is not a sign of idle men. Every mill and factory is overcrowded with orders and the manufacturers in general are compelled to make extensive arrangements to supply the demand. Orders are being sent to all customers in foreign cities and using every means possible to induce the manufacturers to ship their orders first. The manufacturers say that never in the history of the gigantic iron and glass center were the demands for iron and glass so great. Dealers are rapidly advertising and orders filled and in many instances it is said are offering better prices for material in order to induce prompt shipment.

THE BUNCO GAME

Worked on a Fair Sized Crowd at the Phillips Last Night.

Of all the rank fakes that have ever appeared on the stage, the show at the Phillips last night was the rankest; it was positively the worst "that ever happened," and the police should have stopped the show on account of getting money under false pretenses, if for nothing else. The company as far as is known, is composed of three or four w. m. and one man, the former looking like the last rose of summer. They are as bad as a magician and humorist, and as both he could not have been worse. The latter part of the show was unbearable, and before the closing number, which consisted of a cake walk by one of the damsels, the entire audience was in an uproar and leaving the hall in disgust.

If a book is announced as bad it is a good advertisement, as people will buy it who would never otherwise touch it. This is the plan this farce show goes on, and a good sized crowd hit at the tuneo game. No such show however, should be permitted to appear in town.

While the show was "bunco," it was not as "bunco" as the company wanted to make it. The aggregation had been recommended to the local opera house as a respectable one, and when the members of the company wanted a pad or something like the world's fair mid way, the management of the Phillips sternly forbade anything improper which accounted for the very brief and flat performance. That sort of "show" is not "good" with the Phillips management.

Is the Steam Locomotive Doomed?

Men who say that in the next ten years steam locomotives will disappear and electric motors will supplant them. They also say that with the new motive power trains will run along at a minimum speed of 100 miles an hour. This will prove a blessing to those who wish to go quickly from one point to another, but no more so than Hostetter's Stomach Bitters have proved a blessing to those who wish to go quickly from one point to another. The Bitters act at once upon stubborn cases of dyspepsia, indigestion, biliousness and liver complaint. They improve the appetite, quiet the nerves and induce sound, refreshing sleep. The trial of a bottle will afford convincing proof. Sold at all drug stores.

MILK LABORATORY.

One to Be Established in Indianapolis if Dr. Hurty Can Have His Way.

Physicians of the city have conversed with Dr. J. N. Hurty, secretary of the state board of health, says he in Indiana Journal, concerning the establishment in that city of a milk laboratory similar to those which are said to have been organized in other cities. At such laboratories milk is either sterilized or pasteurized and thus made entirely wholesome. In addition milk is mixed as to contain food products in proper proportions for the wants of various classes of infants. Dr. Hurty says, a new born child cannot assimilate new Jersey milk, as it contains too large a proportion of fat. In these laboratories milk is mixed to contain just the right proportion of fat, sugar and other ingredients suitable for an infant of any age, just as a physician may prescribe. An infant a year old can drink one and a half per cent of fat, twice as much as when it is a week old. So on through the calendar. With a laboratory dispensing milk of proper ingredients for the needs of individual infants, just as drug stores dispense medicines that are prescribed, Dr. Hurty believes that a large proportion of infant death should be prevented, beside which the little ones could live a healthful, lively, account of milk food. The secretary of the board says that a milk laboratory could be established without much expense. The physicians with whom he has discussed the idea look upon it with favor. Parets with children needing cow's milk could secure it at the laboratories without much greater cost, and would be at the proper price for the needs of the child, when the proper combination had been prescribed by the family physician.

Don't Experiment.

When grip attacks a person of nervous temperament there is usually a great depression of spirits, the patient is plunged in despair, and no amount of argument or railing has any effect on his misery. The man or woman whose nerves become so shattered that it is a torture to remain in bed, and the sight of his wife who attempts to give a little sleep is on the way to nervous prostration, in sanity and death. There is no time than to experiment with new and tried remedies. Neglect or delay in this respect may prove a fatal mistake.

Dr. Miles' Nervine is the best of all medicines for the nerves, tried out against the victim of the grip just as it is the best remedy for all other maladies and diseases of the nervous system. It attacks the minute germs of impurity clustered in the blood and thoroughly roots them out of every hidden corner of the body.

I was extremely nervous, and although I coctored with several physicians I could not gain strength. My nerves became so completely untrusty that I could scarcely sleep at all, and I thought I should die. Dr. Miles' Nervine and less than a week I was feeling very much better. After taking six bottles I was completely restored to health.

C. E. HACKETT, Green, N. Y.

A trial of Dr. Miles' Nervine is a good investment for the health.

Most Medieval Race.

The Spaniards are not the most medieval of races. The Spaniards, who live in the inaccessible mountain range between the Black and Caspian seas, are probably the most people in the world who have made no advance toward civilization in 2,500 years. It is their invariable rule to observe hollow days four times a week, with saints' days as extras.

Stone Telegraph Poles.

The messages between Milan and Switzerland, by way of the Simplon pass, pass over a telegraph line with stone poles. This line runs along the military road which skirts the west side of Lake Maggiore. The poles are of gray lime, and average about 10 inches square and 25 feet high. They are in use for a distance of 30 or 40 miles.

The Morn W y

Commands itself to the well informed, to do its work effectively which is formerly done in the crudest manner and disastrously as well. To cleanse the system and break up colds, headaches, and fevers without unpleasant after effects, use the delightful liquid laxative remedy, Syrup of Figs. Made by California Fig Syrup Co.
