

# OCTOBER DAYS

...AT THE...

## PAN-AMERICAN

**A**T Chicago October was the great month in point of attendance at the World's fair. There is every reason to believe the same result will come to the Pan-American Exposition at Buffalo, where October is always a month of delightful weather. The Exposition in point of beauty and interest is at its climax, and the programme of special events is such as to attract and please. September started with great crowds, and only the tragedy in the Temple of Music, which stunned and shocked a world, halted an overwhelming success in that month. The Exposition management as a tribute of respect closed the gates for one day, Thursday, when the state funeral of the third martyred president took place. The crowds since then have poured to Buffalo. The Temple of Music, now hallowed and historic ground, has been the Mecca of thousands.

Buffalo has demonstrated her ability to care for great crowds satisfactorily, not only in hauling them to the Exposition by street car and steam railway at a fare of but 5 cents from any part of the city, but to house and feed them at prices in the reach of all. The stories of exorbitant prices were long ago shown to be fables, and every visitor who makes the slightest effort to get accommodation can do so wholly within his means.

The Exposition itself, with its beautiful buildings, its coloring by day, its magic lighting at night, its walks and courts, its canals and lakes, its fountains and statuary, its exhibits and its amusements, has been a delight to the 5,000,000 visitors who have already been to the Pan-American.

The Exposition Company opened up the month of October, beginning Monday, Sept. 30, with a Carnival week of splendid events, including a baby coach parade, with 3,000 school children singing in the procession, a monster pageant with the floats used in the New Orleans Mardi Gras and allegorical parade and the feature of the beautiful floral parade at Saratoga. These will take place on Thursday and Saturday, Oct. 3 and 5, but every day from Sept. 30 to Oct. 5 will be replete with interest. Special fireworks on the lake, with decorated and illuminated launches in a procession of fiery grandeur, will afford new and wonderful sensations to the visitors.

Thus October will be ushered in with a programme so arranged as to give the American public a delightful week. The life saving drill, daily, has become one of the great attractions of the Exposition. It tells the story of the work of the heroic men who guard the shores of ocean and great lakes, always on the alert to drag from death's brink the shipwrecked sailor or passengers. The model camp of United States marines, the seacoast guns, the ordnance and all the exhibits showing war's panoply and our defensive measures have been a great educator to thousands of visitors. Some military company is always encamped in the park, and that part of the grounds is never without interest.

With the magnificent exhibit of the United States Government and the South and Central American States' buildings every visitor can spend a day. No exposition has ever provided in so compact a space, with such beauty of architecture and with so

beginning Sept. 23 and continuing to Oct. 25, has proved an attraction for those interested, from every section from Maine to California and Canada. Among the states represented are Michigan, Indiana, Wisconsin, New York, Pennsylvania, Illinois, Vermont, Ohio, New Jersey, Texas and Missouri. Of the total number of flocks on exhibition twenty-seven have been sent here from the Dominion of Canada, most of the exhibitors being located in the province of Ontario. The province of Quebec is also represented. During

the course of the sheep show there will be held in the New York State building a series of meetings of prominent North and South American sheep breeders. The Buffalo Review of Sept. 24 said that "this ought to be a great time for the farmers to visit the Pan-American. Every farmer in New York State, not to mention those in other parts of the country, ought to see the attractions of the Rainbow City during the next three or four weeks."

"The cattle show last week was a big feature of the Exposition, and this week there is a great sheep show in progress. The New York State farmers and the sheep raisers from other states will find it most interesting to compare the South American breeds with those of North America."

"It will surprise many to learn that the pavilions for animals at the Pan-American cover ten acres and are capable of housing 35,000 animals."

The programme for October so far as made up at this time is as follows:

1. Mexican day, fireworks, free organ recital, John P. Lawrence, Washington.
2. 3. Free organ recital, W. B. Donley, Indianapolis, Ind.
4. Nebraska day, Toronto day, fireworks.

### Can Care For 250,000.

Director General Buchanan says the only problem now confronting the Exposition is how to find days enough within the closing weeks to adequately take care of the many attractions and features now being planned. He predicts a great attendance during the month of October and one far in excess of the highest estimates that have been made by the most sanguine. In answer to the inquiry as to whether or not Buffalo could take care of the crowds, he said there was no difficulty whatever in this regard; that Buffalo could easily care for 250,000 strangers every day comfortably and at reasonable prices.

### In the Music Temple.

The organ recitals in the Temple of Music are daily features of the Pan-American Exposition. Many celebrated organists are on the programme for October. Victor Herbert's famous orchestra will be at the Temple of Music from Oct. 14 to the close of the Exposition.

**Peculiarities of Footpaths.**  
Footpaths are what roads are not, natural productions, just as the paths made by hares, deer and elephants are. No one really makes a footpath—that is, no one improves it. What is true of central Africa is true of England.

"The native paths," wrote Professor Drummond, "are the same in character all over Africa. Like the roads of the old Romans, they run straight on through everything—ridge and mountain and valley—never shying at obstacles nor anywhere turning aside to breathe. Yet within this general straightforwardness there is a singular eccentricity and indirectness in detail. Although the African footpath is, on the whole, a bee line, no fifty yards of it are ever straight. And the reason is not far to seek."

"If a stone is encountered, no native will ever think of removing it. Why should he? It is easier to walk around it. The next man who comes by will do the same. He knows that a hundred men are following him. He looks at the stone a moment, and it might be unearthed and tossed aside; but, no, he holds on his way. It would no more occur to him that that stone is a displaceable object than that felp-spar belongs to the orthodox variety. Generations and generations of men have passed that stone, and it still waits for a man with an altruistic idea."—Spectator.

### The Right Arm and Left Foot.

The right arm is always a little larger than the left, but the left foot is almost always larger than the right, presumably because while nearly every man uses his right arm to lift a weight or strike a blow he almost invariably kicks with his left foot, while the longer stands on his left leg and lets his right fall easily, because he has learned by experience that this is the best attitude he can assume to prevent lassitude and fatigue.

This constant bearing of the weight on the left foot makes it wider than the right, and it often happens that a man who tries on a shoe on the right foot and gets a close fit has to discard the shoes altogether because he cannot endure the pain caused by the tightness of the left. If when riding on the street car you will take the trouble to notice, you will see that in laced shoes the gap is much smaller on the right foot than on the left, while with button shoes the buttons have to be set back ten times on the left shoe to once on the right.

### A Tussle With English.

The pitfalls of the English tongue to a foreigner are many. A Frenchwoman who has undertaken housekeeping in New York thought she had a good working knowledge of the language, but soon discovered her mistake.

One day she called a carpenter and planned with him to have some work done about the house in the way of putting up shelves, etc., and she went over the ground with him as carefully as possible to get from him an estimate of what it would cost.

After the work was done the bill submitted was considerably in excess of the sum first named. The Frenchwoman endeavored to remonstrate, but only succeeded in making the following remarkable statement to him:

"You are more dear to me than when we were first engaged."—New York Sun.

### Almonds.

The world's almond crop, exclusive of those raised in California and the west, comes from Italy, Sicily, Majorca, Spain, France, Portugal, Morocco and Algiers. The highly prized Jordan almonds come from Malaga, Spain, and not from the Jordan river, as many people suppose. The common almond is the most indigestible of all the nuts and contains very little nourishment. There are many ways, however, in which it is advantageously used as a desert or as a flavoring. One peculiarity about the almond tree is that its leaves contain prussic acid and are therefore poisonous, while the fruit may be eaten with impunity.

## CRASH!!

Goes the crockery and the waitress will probably be called clumsy and careless. Her plea of sudden dizziness is not allowed. "What right has she to be dizzy?" they ask. Women who are suffering from diseases peculiarly feminine are liable to sudden dizziness and faintness, and it is only by curing the womanly diseases to which they are subject that dizziness and other ills can be entirely relieved.

Dr. Pierce's Favorite Prescription makes weak women strong and sick women well. It cures irregularity, dries disagreeable, weakening drains, heals inflammation and ulceration, and cures female weakness. When these conditions are cured, backache, headache, dizziness, etc., are also cured.

"I suffered for twelve years with female trouble," writes Mrs. Milton Grimes, of Adair, Adair Co., Iowa, "which brought on other diseases—heart trouble, Bright's disease, and at times would be nearly paralyzed. Had neuralgia of stomach. I can freely say your medicine (nine bottles in all) of Favorite Prescription, four of Golden Medical Discovery, and two vials of Dr. Pierce's Pellets, have cured me. I can work with comfort now, but before I would be tired all the time and have a dizzy headache, and my nerves would be all unstrung so I could not sleep. Now I can sleep and do a big day's work, something I had not done for over eleven years before."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

Doctor Pierce's Pleasant Pellets are the most desirable laxative for delicate women.

## NEW SHORT STORIES

**Carnegie Pays an Old Debt.**  
Who would not be a creditor of Mr. Andrew Carnegie?

An American firm doing business in London recently asked its patrons to suggest ideas for the distribution of Mr. Carnegie's wealth.

Mr. Henry D. Lennox of Glasgow advised that the millionaire repay a loan of 11 shillings made by his aunt to aid the Carnegies to emigrate from Dunfermline in 1847. Mr. Lennox computed that at compound interest £9 was due.

Mr. Carnegie has investigated the matter and found that Mr. Lennox was quite right in his claim. The debt will not only be paid, but the children of Mrs. Lennox will be endowed with a sum sufficient to keep them in comfort as long as they live. Mr. Lennox said in his letter:

"When the Carnegies left Dunfermline, they were so poor that the mother had to borrow money to take them to the United States."

"My aunt, though a poor woman herself, helped them out to the extent of 11 shillings, but the promise to return the loan evidently escaped the memory of the beneficiaries, because they never repaid the sum borrowed."

"My aunt is dead, but she left two daughters, one of whom is the wife of a humble joiner in Dunfermline, while the other is a maiden lady engaged in a small drapery business in Edinburgh. 'Don't you think that if Mr. Carnegie knew this he would be willing to do handsomely by his mother's friends?'"

Mr. Carnegie called in person on the children of his benefactor and thanked them for the generosity of their mother.

From minus 11 shillings to plus £70,000,000 is a financial transformation that would have staggered the good genie of Aladdin's lamp, but Mr. Carnegie found it not overhard.—London Express.

### Weber's Ice Joke Coldly Received.

Joe Weber of Weber & Fields has many funny tales of impressions gained on his recent European trip. One of these is of a visit to a beer garden in Germany on the banks of the Rhine. He ordered a glass of beer and couldn't drink it because it was so warm, for Weber is used to the chilled beer of America.

"Ugh!" said Mr. Weber, with a disgusted expression on his countenance. "Bring me some ice."

"Ice?" inquired the waiter in surprise. "You must be mistaken."

"I want a piece of ice," demanded Mr. Weber.

The waiter departed and when he returned brought with him a towel gathered together at the ends. This he set

"YOU TAKE THAT TO THE OFFICE AND HAVE IT PUT IN THE SAFE."

down on the table carefully. He opened it slowly and cautiously and finally displayed a piece of ice about as large as a two carat diamond. Mr. Weber gazed at the infinitesimal particle of congealed moisture and then remarked to the waiter:

"You take that to the office and have it put in the safe. I want to take that back to New York and have it placed in a Tiffany setting."

The waiter couldn't see where any joke came in.—New York Times.

### Thunder and Lightning.

Dr. Lyman Abbott recently telephoned across New York city to have a suit case previously left at his office sent up to the West Forty-second street ferry to meet the train he intended to take that afternoon to his home at Cornwall-on-the-Hudson. The office boy commissioned with the errand was somewhat verdant and returned from the Grand Central station with the information that he could not find the doctor. Whereupon a telegram was dispatched to Cornwall:

"Boy made blunder. L. (a son) will bring case by late train."

When the dispatch reached its destination, it read (whether through ignorance or humorous intent on the operator's part is unknown): "Boy made blunder. Lightning will bring case by late train."

### A Modest Clergyman.

The Rev. Dr. Samuel McComb, until recently pastor of Rutgers Presbyterian church, is an excellent story teller. One of his anecdotes is that of a country clergyman whose custom it was to read his sermons. One Sunday morning he forgot his manuscript. He determined to take his congregation into his confidence, and he accordingly announced:

"My friends, this morning I have come without my sermon, so you must take what the Lord gives me. But tonight I will come better prepared."—New York Times.
