He is a professor in the department of Anthropology, Columbia University. He graduated from the University of Indiana in 1897.

PRINTERS' QUEER ERRORS.

(From Tit Bits.)

To the many instances given of the typographical errors, which, like the poor, are always with us, we add the following:

Horace Greeley was noted for his wretched writing, which puzzled many a printer. Once he wrote, "Tis true, 'tis pity, and pity 'tis true," quoted from Shakespeare. It appeared the next day.

"Tis two, 'tis fifty, 'tis fifty 'tis fifty-two."

A paper printed this extraordinary piece of news in connection with a great demonstration: "The snouts of ten thousand people rent the air." Of course the reporter had written "shouts" instead of "snouts."

Bishop W. A. Candler was once advocating a more liberal loosening of the purse strings, and told his audience that several years ago he sent an article to a paper, in which, he said: "We pray too loud and work too little." The compositor, consciously or unconsciously, perpetrated a little joke, for when the article appeared it read: "We pray too loud and work too little." "I let it go at that," said the bishop. "The fact is, I believe the printer was right, and I never ventured to correct him."

New Telephone Company Organized in Preble County.

(New Paris Mirror.)

Last Friday Greenville capitalist incorporated the "El Dorado and West Manchester Telephone Company." The incorporators are Col. W. D. Rush, J. U. Reis, F. C. Conkling, C. R. Leftwich and Conrad Ripp. These gentlemen are the owners of the Greenville company and sometime ago built lines to New Madison, El Dorado and Manchester. An exchange has been established at El Dorado. The object in organizing the new company is to separate the El Dorado and Manchester business from that of Greenville and make the two exchanges independent of each other.

The Pennsylvania lines west have just doubled their sleeping car and dining car service with the installation of the schedule which took effect yesterday. Thirty-five new sleeping cars between St. Louis and New York and Pittsburgh and Chicago. The Pennsylvania people claim that no road in the country can boast a better sleeping car and coach equipment than the Pennsylvania lines west.

POPULAR LECTURE

Of Rev. Madison Swadener to Be Given Here.

The ladies of the parsonage committee of the First M. E. church have arranged with Rev. Madison Swadener, D. D., to give his popular lecture, "A Parson's Philosophy of Life," Wednesday evening, June 8, at the church, Fourteenth and Main streets.

The ladies are pleased to present this most inspiring and enjoyable lecture which has elicited such complimentary expressions everywhere.

The Augusta (Ga.) Tribune says:

A cultured and appreciative audience had the pleasure of hearing Rev. Dr. Madison Swadener deliver a thoroughly enjoyable lecture, "A Parson's Philosophy of Life." A very happy philosophy it was, and everyone present felt the better for having heard it elucidated.

The lecture was not only rich in thought, but it fairly bubbled over in humor.

It was a rare mingling of inspiration, tender pathos and clean humor by a master hand. Rev. Dr. Swadener is an attractive personality and possesses the elements of an orator. His voice is powerful and pleasing. His utterances of last Friday evening indicated a man of broad intellectuality and a big heart.

The lecture was given for the benefit of the Epworth League and a generous sum was realized.

OBITUARY.

Nellie M., daughter of Archibald and Susan Hinshaw, was born March 17, 1885, near Williamsburg, and departed this life May 12, 1904, at the home of her parents, two and one-half miles southeast of Williamsburg.

The services were held in the Methodist church of that place, Rev. Trippier, of Economy, officiating. Nellie was of a kind and loving disposition, always ready to lend a helping hand to those about her, especially her invalid father, never tiring of administering to his wants.

Nellie expressed herself a number of times during her last illness, as being ready to leave her earthly home if the heavenly Father saw fit to call her to her eternal home. Besides

father and mother she leaves eight sisters and three brothers to mourn her loss, she being the first of twelve children to be called away. What is their loss is her eternal gain.

"Tis hard to break the tender cord when Love has bound the heart; 'Tis hard, so hard, to speak the word we must forever part; Dearest loved one we must lay thee in the peaceful grave's embrace, But the memory will be cherished, till we see thy heavenly face.

Card of Thanks.

The family desires to express their thanks to friends and neighbors for their kindness during the sickness and death of their daughter and sister.

STRIKING A BARGAIN.

A Case Where Money Did Not Cut Much of a Figure.

"Several years ago there was a boom in certain lands in Florida because of rich phosphate deposits," said a southern man. "A speculator asked one of those simple Florida folk what would be the lowest price he would take for some land which before the boom he had been unable to sell for \$500. The owner really didn't know. The speculator agreed to deposit in bank \$16,000 to the owner's credit for the land. But this amount of money in bank didn't mean very much to the native."

"He said he wanted a farm of sixty acres with a house on it, the whole to cost a few hundred."

"What else?" asked the speculator. "Can I have a horse and saddle and bridle?"

"Certainly."

"And a rifle?"

"Yes."

"And some provisions?"

"Yes."

"The eyes of the native began to bulge. There was a pause."

"What else do you want?" asked the speculator.

"'Gh, give me \$70 for the old woman to buy things for herself and children—"

"He then started to walk away."

"What else?" asked the speculator.

"Is there more yet?"

"Yes."

"Well, give me a plug of tobacco and set me down where the fish will bite all day, and you can have the rest."

"—Baltimore Sun.

Mike O'Neill.

"Mike O'Neill, with the St. Louis Cardinals, is a queer customer," says Fred O'Neill. "He has a couple of twisted fingers on one hand, and one day when he grew confidential at Montreal he said as he held up his digits, 'Only for them I'd have been prizefighter instead of a ball player.'"

—Philadelphia Press.

Before and After.

Friend—Why do you call your work a trade instead of an art? Artist—Oh,

I did call it an art before I began to make a living at it.—Illustrated Bits.

—Never meddle with a hornet or a man who is minding his own business.

ULLOA'S CIRCLES.

The White Rainbow and One Ocean When It Was Observed.

A wonderful atmospheric phenomenon, described by both Ulloa and Bonner, was first observed by the first named gentleman during the stay of himself and party in the Pinchincha.

One morning at daybreak the whole mountain top was covered with a dense fog. After a short while the atmosphere became tolerably clear with the exception of a few vaporous clouds. While the travelers were watching the gradual disappearance of the fog one of them turned quickly and perceived an image of himself distinctly mirrored on that quarter of the sky opposite the rising sun. The figure appeared to stand in the center of three concentric rings which were shaded with different colors, while around was a fourth and much larger ring tinted with but a single hue. The outermost edge of each of the interior rings was crimson, the next orange, with a shade of pale yellow, the innermost tint being of a brilliant green.

When first seen these rings were hardly circular in form, but they soon became perfect. But as they did so, which depended on the rising of the sun toward the zenith, the colors gradually disappeared until finally the whole apparition faded like a mirage from the gaze of the astonished scientists.

THE QUEER MANDINGOES.

In This African Tribe the Women Wear the Trousers.

The Mandingo, who inhabit a tract of country in Africa, are strict Mohammedans in religion; but, curiously enough, they still retain many of the superstitions of the negro races from which they sprang. Consequently their marriage ceremony is a mixture of the two, and, although it is performed by a marabout or holy man in the mosque, it contains one very ridiculous element. Next in importance to the marabout is the bridegroom's sister, and when the marriage ceremony reaches the point where the visible bond, usually typified in civilization by the ring, this sister steps forward in place of the ring presents the lady with a pair of trousers, which are immediately donned.

The ceremony is concluded by a very mournful song sung by the companions of the bride, who then conduct her again to the home of her parents, as, owing to the extreme probability of one or the other retracting at any moment by reason of an unfavorable omen, no house is built until the ceremony is completed. Polygamy is the rule, but each wife has her own house. They are the most tyrannical wives in Africa and, hating each other, band together against their husband and rule him with a rod of iron.

MOSAIC WORK.

How Paintings Are Reproduced In the Little Colored Squares.

In order to reproduce a painting in mosaic, the artists or artisans take a flat sheet of iron of the same size as the painting surrounded by a border about an inch high. This receptacle is then filled with plaster so as to obtain a perfectly flat surface. On this the outlines of the figures are drawn. The plaster is then cut up into small squares, which are to be removed and gradually replaced by as many small squares of mosaic of the same size. In the holes left empty when the plaster is taken away a new plaster made of travertine dust, lime and linseed oil is poured.

After three days this new plaster acquires the necessary consistency, and in this the artist sticks the little colored squares. When all the surface of the plaster is covered with these colored pieces of mosaic the whole is washed with sand and water until it becomes quite smooth. The colored pieces are made of mixtures of different minerals, like arsenic, lead, glass, etc. These minerals are placed in an oven, and the different colors are obtained by the different degrees of heat, and as many as 28,000 various colors can be obtained.

How Wood Lasts In a Dry Place.

In situations so free from moisture that we may practically call them dry the durability of timber is almost unlimited. The roof of Westminster hall is more than 450 years old. In Sterling castle are carvings in oak well preserved over 300 years of age. Scotch fir has been found in good condition after a known use of 300 years, and the trusses of the roof of the basilica of St. Paul's, Rome, were sound and good after thousand years of service.

A Chinese Secret.

When a Chinaman wants to have a tooth drawn he feels no nervous apprehension of pain, for the excellent reason that he knows his dentist will not inflict any, it is said. The latter simply rubs a secret powder over the aching tooth. After about five minutes the patient sneezes, and the tooth falls out. Many attempts have been made by Europeans to get some of this mysterious powder, but no one has yet succeeded.

Pinches All Round.

She—My new gown is just lovely. It's a perfect fit. He—Satisfied on that point, eh? She—Yes. I know it's a good fit because it pinches me so. He—Well, it doesn't pinch you half as much as it does my pocketbook.—Philadelphia Press.

—Philadelphia Press.
