

Nusbaum's Pattern Dept.

has done a phenomenal business this, our first season. Sales more than three times what we expected.

Not a single complaint. Peerless Patterns are the best in the world.

The Price only 5c, 10c, and 15c.

Have you a kilt skirt? If you have not, it should be your aim to possess at least one of these smart garments that are so deservedly popular this season. Their adaptability to almost all fabrics is one of their chief attractions and the long slender lines are another favorable item. A stylish example is shown on page 2 and also at the figure on same page of the Peerless Fashion Sheet for August. Combined with an up-to-date shirt waist a stylish suit for traveling or general wear may be realized and since they need no decoration the cost is trifling. The old-time surplice waist is again in favor, but, of course, all the latest features are embodied in it. The new flounce skirts are also shown in this issue which is full of hints for midsummer and the wise woman will get one of these sheets, which are given free at the Peerless Pattern Department of

CITY FATHERS

(Continued From First Page.)

presented. There were no bids for the improvement of Northwest Second street and the alley north of Chestnut and Laurel streets. Contract for making cement walks on West side of South Ninth street and the north side of South F street. Contract awarded J. H. A. Schneider for cement walks.

Claim of Caroline Snyder was presented. She claims \$106.85 as money due Edward Snyder for non-use of license granted to sell liquor. Referred to city attorney.

Communication in regard to crematory was presented to council by the Dixon Garbage Crematory company. Referred to committee on Public Buildings and Pounds.

Specifications were presented for the improvement of the alley between Butler and Sheridan streets by constructing a sewer from School street to the river.

Specifications presented for improvement of east side of South Fourteenth by constructing a cement sidewalk from South C to E streets.

The Thirteenth street improvement acceptance was laid over until next meeting, owing to some defect in the work.

The improvement of the east side of South Seventh street from South H to South J streets was not accepted but laid over.

City Engineer Weber made recommendations in regard to gutters at intersection of North Eleventh and D streets. The building of stone curbs is a bad one. Recommended stone sewer.

Mr. Weber also recommended the removal of poles of the different companies about the city that are unused.

W. A. Dunham, crematory superintendent, presented his report for the month as follows: 240 yards of dry and 265 yards of wet. Twelve cats and nine dogs were consumed.

Flush tank inspector made his report for the month.

City commissioners presented a report for the laying out and opening of roadway running from East Second street to the alley between tracts 167, 168, 173 and 174.

A resolution that the alley between Eighth and Ninth from Main to the first alley south of Main be improved by constructing a cement roadway as shown by plans on file with the civil engineer. Carried.

The committee on slaughter houses made report that there was cause for complaint by the people living in the vicinity of them and recommended that the defects be corrected. It was adopted.

MAYOR'S ADDRESS

(Continued From First Page.)

streets are generally the best of any city in the State, some of them are costing too much to maintain. The remedy for this lies in building a street to suit the traffic it must sustain. The city engineer from time to time has given us much information in his annual reports, a reading of which will well repay each councilman. If we can make a saving by adopting a more permanent roadway we should heartily endeavor to do so. Our motto should be, "A thing worth doing, is worth doing well." Our object should be to always get the best improvement for the least outlay. To do this requires engineering and financial ability, to plan and carry out improvements that will make our city the "City Beautiful," without increasing our tax rate to a prohibitive limit. All civic improvements should be encouraged, and the city should join hands with the citizens and pay its pro rata share of the cost of all such work. The approaches to the Riverside Park should be jealously guarded and any fills in them should be made on a well devised plan so that the proper grades are attained and the roads in this proposed park the least or no expense. The street commissioner should consult with the engineer and see to it that this work is properly done. The destruction of any trees along the river bank should be prohibited as far as can be done by the city. The roadway along the river should be reopened and improved at as early date as possible. If one will observe the situation from either the Main street or Doran bridge, it can be seen how little will have to be done to realize our dream of the Riverside Park project. Our object should be the improvement of parks, streets and sidewalks in every way we can, and the public is invited to assist in the good work. If your walk needs fixing do it now. Fix up your town, quit talking about it, but do it. The Civic Improvement League can only furnish ideas. Only the city and individuals can act on these ideas. They are the parties who can really "fix things." I would like to see all our streets and alleys near Main street made of either brick or cement, but I trust the council will be careful and guard well the city's as well as the property owners' interests in the matter of improvements. I am still of the opinion that the present hose house in the City Building should be transferred to the south side, thereby giving the south end better fire protection, and would enable the city to make changes in the offices that would better accommodate the public, and give room for the Electric Light Plant to have an office in the City Building and save that much in rent. I hope each department will use as much economy as possible as they can in the way of improvements, etc.

I am still of the opinion that the city should own the water works, and I hope the time is not far off when we can see our way clear to purchase them, as it will not only be a good investment, but will be the means of giving the taxpayers water cheaper and will make it less to the city.

I am pleased to state that I find all the different departments in excellent shape and using their best efforts not to go beyond the estimates made for their expenses.

I thank all the city officers and also the police department for their valuable assistance in managing the affairs of the city.

Respectfully,
W. W. ZIMMERMAN,
Mayor.

"Mighty fine and fitten" better spend a dime for a red package of "Faultless Soda" and the "Goodness" will never be forgotten.
