### HE IS NOT FIT

An Evening Post Opinion of Judge  
Parker.

(New York Evening Post.)  
We presume that Judge Parker's  
greetings in Georgia as "our next  
president" will not ruffle his judicial  
calm. Like the rest of us, he has  
seen too many next presidents a year  
before election.

They usually swarm like grass hop-  
pers in the July before the nominat-  
ing convention. But the Judge will  
be subjected in his Georgia address to  
a pretty sharp test of his fitness  
for president, next time or ever. Will  
he have the courage to speak a direct  
and wholesome word to the people of  
the south on the question which is  
rapidly becoming the leading national  
issue?

We mean, of course, the whole mat-  
ter of abridged suffrage, denied citi-  
zenship, refusal of equal treatment  
before the law, and the rerudescence  
of slavery, as affecting our negro popu-  
lation. The southern papers are full  
of it, and demanding that the south  
be "let alone" in its challenge of hu-  
man rights and disregard of the Con-  
stitution. Mr. Edward M. Shepard  
told the people of New Orleans that  
the south ought to be left to go its  
own way. But can a man named as  
"our next president" agree to such a  
local nullification of national laws?  
If he can, he is not fit to be president  
next year or any year.

(New York Evening Post, July 8, '03)  
For Judge Parker was speaking on  
a theme—the Fourteenth Amendment  
—which his hearers knew to be big  
with political consequences. Yet he  
never once alluded to them! For him  
the great bulwark of the suffrage,  
with the penalties laid down for dis-  
crimination against any class in its  
exercise simply did not exist. If  
wholly to avoid the burning question  
of the day is to show yourself a fit  
man for the presidency, then Judge  
Parker's address should have sensibly  
advanced his candidacy.

mittee was directed to co-operate with  
the Anti-Saloon league and similar or-  
ganizations.

### Catarrh Cannot be Cured

with local applications, as they can-  
not reach the seat of the disease. Cat-  
arrh is a blood or constitutional dis-  
ease and in order to cure it you must  
take internal remedies. Hall's Catar-  
rh Cure is taken internally, and acts  
directly on the blood and mucous sur-  
faces. Hall's Catarrh Cure is not a  
quack medicine. It was prescribed by  
one of the best physicians in this  
country for years and is a regular  
prescription. It is composed of the  
best tonics known, combined with the  
best blood purifiers, acting directly  
on the mucous surfaces. The perfect  
combination of the two ingredients  
is what produces such wonderful re-  
sults in curing catarrh. Send for tes-  
timonials free.

### MCKINLEY'S MAN

Described Kind of Man Needed in  
Philippines.

It is related that during the fall  
of 1899 the late President McKinley  
was traveling on a railroad train  
through northern Ohio. Several of the  
men who were in his confidence were  
about him, and the conversation nat-  
urally turned toward the Philippines  
which were just then a very promi-  
nent place on the map. Aguinaldo's  
army and organized government had  
disappeared before the fierce attack  
of MacArthur and Lawton, but had  
left in their track a condition of dis-  
content and disorder far more difficult  
to handle.

"If I had the right man," said  
President McKinley, "I should send  
him there now and put as much of a  
civil government right in under the  
military as the situation could stand.  
I should give them something to show  
for our promises to them, even if it  
were a risk."

In his enthusiasm he went on to  
describe the man.

"For," he said, "it is a question  
of the man. He must be a law stu-  
dent, a lawmaker, a law executor and  
a jurist. He must be young enough  
to take a big gamble and to be adapt-  
able enough to meet many a situation  
we can not foresee. He must be old  
enough to be well known in America  
and to have inspired confidence in a  
large way. He must be magnetic and  
a model in his private life. Moreover,  
he should be personally known to me,  
so that I can be sure of all these  
things."

Now, the gods who watch over such  
things had arranged that the youngest  
Judge and best known lawyer of his  
years in the United States had just  
left that train, and they must also  
have nudged the elbow of a certain  
adviser in ordinary.

"Perhaps you don't know," he  
suggested, "that you have described  
your young friend, Judge Taft."

The president saw it just that way,  
and before the train reached the next  
station he had promised that if Mr.  
Taft would accept the charge of it  
another commission would be sent to  
the Philippines.

You little knew when first we met  
That some day you would be  
The lucky fellow I'd choose to let  
Pay for my Rocky Mountain Tea.

Endless Apron**  
Manure  
Spreader.  
SPREADS all kinds of manure regardless of their condition, handles heavy manure that has been tramped so hard that it  
is as heavy as a brick, or a pile of fresh stable manure, containing wet or dry straw, corn stalks, etc. Old straw  
manure and fertilizers and does it quicker, better and more evenly than by hand. Spreads as much manure in one day as 15  
men can by hand. Spreads the largest load in 2 to 4 minutes. Makes the same amount of manure go three times as far and  
in 1/2 the time. **NON-BUNCHABLE RAKE** which forms a hopper and holds all hard chunks of manure in corn-  
tine until they are broken up. **ENDLESS APRON** is one continuous apron (Not a 1/2 apron) and therefore is always ready to load,  
reverse gears to cause manure to fall. **APRON** does not extend below axle. The combined  
keeps manure away from the axle while loading, prevents chocking of the axle when starting and acts as a hood and wind shield in  
spreading. Starts the manure in the right direction, therefore spreads more evenly. It has a graduating lever and can  
be regulated to spread thick or thin 2 to 25 loads per acre while in motion. It catches the poor spots  
with a **double draft** as it is nearly equally balanced on front and rear wheels. **END**. The team  
drifts shaft runs in a ball and socket bearing, therefore no friction. **HEATER** is 23 inches in diameter. Has a shipper  
that positively throws manure into and out of gear and holds it there. **SEAT**. Front and rear axles are same length and wheel track.  
Seat turns over when loading. Machine turns in its own length. **STRENGTH AND DURABILITY**. Our ma-  
chine is made so strong that it is almost impossible to break it. Every piece is made extra strong regardless of cost. Every gear and  
sprocket wheel is keyed on. We use no pins or cheap contrivances to come loose, get out of order, break and cause trouble.  
**GUARANTEE**. Should any part break, wear out, or get out of order, we will replace free of charge. **LARGE CATALOGUE** 10 by 12 inches, with 8 large  
and descriptive fully. Given 34 reasons why the Great Western Endless Apron Manure Spreader is the best and most
