**Nasal
CATARRH**
In all its stages there
should be cleanliness.
Ely's Cream Balm
cleanses, soothes and heals
the diseased membrane.
It cures catarrh and drives
away a cold in the head
quickly.

Cream Balm is placed into the nostrils, spreads
over the membrane and is absorbed. Relief is im-
mediate and a cure follows. It is not drying—does
not produce sneezing. Large Size, 50 cents at Drug
stores or by mail; Trial Size, 10 cents by mail.
ELY BROTHERS, 53 Warren Street, New York

**Are You Looking
For a Farm?**
I have a number of desirable farms
for sale. All sizes and all prices—
Remember the name and place.

PORTO RICO IS PROSPEROUS

AMERICAN DOMINATION MAKES
INHABITANTS HAPPY

MARSHAL WILSON TALKS

About the Present and Future of Our
New Possessions—A Bright
Future.

E. S. Wilson, United States Marshal of Porto Rico is now in this country visiting his family and friends. He is an active illustration of the fact that an American, bred and born, can live in the tropics and physically thrive.

He states emphatically that he never has had an ache nor pain during his life on the island.

Mr. Wilson talked freely concerning conditions on the island.

"It is an ideal possession and one that will pour forth wealth in abundance," he said. "But it will take two or three generations before all things are working in harmony.

"The most encouraging feature is found in the rapid advance they are making along educational lines. Already there are 60,000 scholars in the public schools, and this army of youngsters is deeply interested in the work.

"They seem to realize the future will depend upon their efforts and they are absorbing information in a most commendable way.

"Excellent schoolhouses are being built at all accessible points as they are constructed."

Speaking of the political situation, Mr. Wilson displayed unusual enthusiasm.

"The Porto Ricans are loyal," he said. "They have no desire for separation nor for independence. They are proud to be members of the earth's greatest republic.

"They would like to have a territorial organization, but there their ambition ends in a way.

"Of course, there is an abundance of local politics, and, like the volatile Latin races, they are intensely in earnest, but they are never anti-American in any particular.

"In fact, they are entirely American in sentiment and practice.

"Commercially the islands are thriving. Americans with their natural enterprise are coming in. They note the opportunities for the investment of capital, and they are placing their money where it will give great returns before many years.

"For instance, take orange culture. Oranges have never been an article of export, but within a few years the groves now reaching a bearing stage will furnish a supply for the export trade which will be worth about \$3,000,000 a year.

"And as they grow, even if there is no extension of the number of orchards, the output will increase very materially.

"Coffee, too, is going to contribute greatly to the wealth of the island. It is excellent in quality and the production will be increased greatly under American methods of cultivation.

"Under Spanish domination the yield averaged about 250 pounds to the acre. Under the advanced methods it will reach 600 pounds and perhaps 700. Of course, the price at present is unusually low, but that is not a permanent condition.

"Money is going into pineapple plantations. That is a good opening, though they may not be exported largely.

"It is the intention of those engaged in this branch of tropical agriculture to can the pineapples right on the plantations and in this form ship them to the northern countries. "It can hardly fail, as the crops will not fail, and labor is low enough to satisfy the most particular employer.

"Even now the production of sugar is greater than it ever was in Spain's best days. It is increasing and will increase, but, as in the case of coffee, the price has not been encouraging.

"There have been some backsets,

as with coffee, when a cyclone in 1899 almost entirely destroyed the many plantations scattered over the islands.

"Yet the present crop will be three-fourths of a normal, and within a year or two it will reach record-breaking figures."

When asked as to the climate, tak-
en from year end to year end, Mr.
Wilson said:

"It is perfect. There is no better climate in the whole world. Our summers are just as pleasant as you have in the States and the winters simply delightful.

"At times the thermometer reaches 80 in summer and is as low as 70 in winter, but it is never really hot, as the trade winds from the ocean mitigate the heat of the land.

"My office opens out over the ocean, and on the hottest summer days the winds which sweep through the windows make conditions not only bearable, but absolutely pleasant.

"Perhaps the most encouraging feature in the whole situation is the perfect willingness shown to adopt American ways.

"For instance, they are making rapid advances in sanitary regulations and in a little while the leading cities and towns will be quite up to the American standard.

"It will not be long until the island will be looked upon as one of America's jewels."

Mr. Wilson will be in the States for about a month. Generally, his time will be spent with his family and friends in Ohio.

Cholera Infantum

This disease has lost its terrors since Chamberlain's Colic, Cholera and Diarrhoea Remedy came into general use. The uniform success which attends the use of this remedy in all cases of bowel complaints in children has made it a favorite wherever its value has become known. For sale by A. G. Luken & Co., and W. H. Sudhoff, Fifth and Main streets.

IMPURE FOOD

Chemical Laboratories to Be Placed
in Principal Ports.

Washington, Aug. 25.—An important extension of the war upon impure food imports is planned by Secretary Wilson, who will establish chemical laboratories at the principal ports for a closer scrutiny of and quicker action upon suspected cargoes. The first of these offices will be opened Sept. 5 in New York, with five expert chemists in charge. Congress will be asked for appropriations for similar laboratories in Chicago, Boston, Philadelphia, New Orleans and San Francisco.

The foreign pure food law has been in force more than a year, and is regarded as beyond the experimental stage.

Dr. H. W. Wiley, chief of the bureau of chemistry of the Department of agriculture, declares that it is the intention of the department now "to put the screws on." When the pure food law first was put into operation it was found that 78 per cent of the imports of foods and drinks were admissible under its provisions. Now the percentage is 85.

The Secretary of Agriculture has just granted the first request of an importer to destroy his cargo instead of reshipping it, after it had been condemned as impure, the cargo being olive oil.

The Secretary of Agriculture is awaiting an interpretation of a portion of the law which, it is believed, will exclude entirely the importation of sausages from Germany. The law excludes articles from entry into the United States from foreign countries which prohibit the importation of such articles. Germany is in this class.

Dr. Wiley declares that there is not a barrel of pure "Scotch" whiskey in the United States, and that the importations of this article are practically all connections and should be labeled "compound."

Sick Headache.

"For several years my wife was troubled with what physicians called sick headache of a very severe character. She doctored with several eminent physicians and at a great expense, only to grow worse until she was unable to do any kind of work. About a year ago she began taking Chamberlain's Stomach and Liver Tablets and today weighs more than she ever did before and is real well," says Mr. Geo. E. Wright of New London, New York. For sale by A. G. Luken & Co., and W. H. Sudhoff, Fifth and Main streets.

Nearly Forfeited Life.

A runaway almost ending fatally, started a horrible ulcer on the leg of J. B. Orner, Franklin Grove, Ill. For four years it defied all doctors and all remedies. But Bucklen's Arnica Salve had no trouble to cure him.

"There have been some backsets, as with coffee, when a cyclone in 1899 almost entirely destroyed the many plantations scattered over the islands.

"Yet the present crop will be three-fourths of a normal, and within a year or two it will reach record-breaking figures."

To Petoskey and return \$5.00 on September 13th, 10 day limit, on G. R. & I. \$6.00 to Mackinac Island.

A. L. Park's big excursion to Marion, August 26; cheap rate, \$1.25 for the round trip. See bills.

GLEN WILL BE A FINE PLACE

FOR THE CHAUTAUQUA TO BE
HELD

VERY POPULAR NOW

On Account of Its Cool Shade—Just
The Place For a Chautauqua,
Say All.

Glen Miller Park is proving one of the most popular places in the city during the present spell of hot weather, and every afternoon finds the park with picnickers, small parties that are enjoying the cool breezes, and matrons have come out with their children to spend the afternoon under the trees, in the cool shade. The lake with its pleasant boat rides, is a popular place and the boats are nearly always in use. The many cool seats on the hillsides, in the path of the breezes, afford pleasant resting places, and the picnic tables in the rear of the Glen are nearly all in use each day. Yesterday there were ten or twelve large picnic parties and many smaller ones that spent the evening in Glen Miller. That the Glen will be an ideal place for the Chautauqua to be held is not to be doubted.

The natural advantages that the Glen has for a place of this kind are many and will be appreciated by those attending the Chautauqua. The Glen is not a "ready made" park, but seems a bit of nature, without any "fixin's" that many of the other parks around the city have. The speakers and listeners, that attended last year's Chautauqua were greatly pleased with the place and many fine recommendations to it were given. One thing to be considered with a Chautauqua is the place in which it is held and those that intend to come this year may satisfy themselves that a finer spot for a Chautauqua can not be found.

Catarrh Cannot be Cured

with local applications, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription.

It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials free.
