STRANGE PETS

Texas Man Trains Tarantulas and Says Insects are Intelligent.

(Kansas City Star.)
David Goodin, of McKinney, Tex., who is visiting relatives here, probably is the only man living who makes pets of tarantulas. Mr. Goodin fondles the deadly insects with the same freedom from fear that the average person does a kitten. He has one of his pets with him. It is a healthy-looking specimen about the size of a mouse and seems possessed of an affable disposition. At Mr. Goodin's command it will approach strangers provided it can find any one who will stand long enough. It performs several other "stunts."

"I have been making pets of tarantulas many years," said Mr. Goodin. "I first began catching and training them after I had been told by a snake charmer that no one had ever done such a thing. I have been bitten once but not badly. The tarantula has two sets of fangs, one set in its mouth and one in its forefeet. The wound that it inflicts with its forefeet is the dangerous one. It scratches the skin, and then injects poison into the wound. The bite I received was from the mouth fangs. The tarantula will jump at a horse or a cow as well as at a man. It will bite anything at any time when it is wild and untamed. I have studied them so that I am not afraid to pick up any tarantula with my hands."

"The tarantula has more intelligence than any other insect. It is easily taught after you understand its habits. The tarantula that I now have has not eaten for several weeks. They eat only once every four or five weeks."

Are You Interested in the South?

Do you care to know of the marvelous development now going on in

The Great Central South?

Of innumerable opportunities for young men or old ones—to grow rich?
Do you want to know about rich farming lands, fertile, well located, a trunk line railroad, which will produce two, three and four crops from the same field each year? Land now to be had at from \$3.00 to \$5.00 an acre which will be worth from \$30.00 to \$150.00 within 10 years? About stock raising where the extreme of winter feeding is but six (6) short weeks? Of places where truck growing and fruit raising yield enormous returns each year? Of a land where you can live out of doors every day in the year? Of opportunities for establishing profitable manufacturing industries; of rich mineral locations, and splendid business openings?
If you want to know the details of any or all of these write me. I will gladly advise you fully and truthfully.
