## NATIONAL LEAGUE

**NATIONAL LEAGUE STANDING.**

	Won.	Lost.	Pct.
Chicago	31	15	.675
New York	28	15	.651
Pittsburgh	26	16	.619
Philadelphia	26	20	.565
St. Louis	21	25	.456
Brooklyn	17	27	.386
Cincinnati	18	29	.383
Boston	12	32	.272

Boston 1; Brooklyn 3.  
Cincinnati 4; St. Louis 2. (First game.)  
Cincinnati 0; St. Louis 3. (Second game.)  
Chicago 4; Pittsburgh 1.

[Publishers' Press]  
Brooklyn, June 3.—Donovan's rejuvenated Brooklyn Nationals made it four straight from Boston this afternoon, winning a well played game by a score of 3 to 1. McIntyre injured his back trying to pick up Needham's grounder in the third inning and Scanlon relieved him. Maloney's batting brought in all three runs for the locals. The score:  
R. H. E.  
Boston . . . 0 0 1 0 0 0 0 0—1 5 1  
Brooklyn . . . 2 0 0 0 0 0 0 1—3 6 0  
Batteries—Pfeiffer and Needham; McIntyre, Scanlon and Bergen.  
Umpire—Johnson.

**DRUHOT'S REVENGE.**  
Cincinnati, June 3.—Cincinnati and St. Louis divided a double header here this afternoon. In the first game errors by the visitors helped the locals and in the second Druhot held the locals to one hit. The second game was called in the seventh to permit the St. Louis team to catch a train. The scores:  
First Game—  
R. H. E.  
Cin. . . . . 0 0 0 0 0 0 3 1—4 6 1  
St. L. . . . . 0 0 0 0 0 0 0 2—2 9 2  
Batteries—Weimer, and Livingstone; Umpires—Conway and Emslie.  
Second Game—  
R. H. E.  
Cin. . . . . 0 0 0 0 0 0 0 0—0 1 4  
St. L. . . . . 2 0 1 0 0 0 0 0—3 8 3  
Batteries—Ewing and Schell; Druhot and Grady. Umpire—Emslie and Conway.

**PFEISTER IN FORM.**  
Chicago, June 3.—The Chicago Cubs walloped the Pittsburgh Pirates today before a big crowd, the score being 4 to 1. Pfeister, the new left hand twirler for the home team, was in great form and kept the men on Clarke's team guessing over his delivery from start to finish. At times the Cubs batted Philippi hard. Score:  
R. H. E.  
Chi. . . . . 0 2 0 0 0 2 0 0—4 9 2  
Pitts. . . . . 0 0 0 0 0 0 0 1—1 7 1  
Batteries—Pfeister and Moran; Philippi and Phelps. Umpire—Hurst.

**RECORD BREAKING CROWD SEES GAME**  
Giants Triumph Over Fairview Team for the Second Time This Season.  
GAME WAS A GOOD ONE  
HARRIS PITCHED WELL FOR HIS TEAM, STRIKING OUT TWELVE MEN AND ALLOWING BUT SIX HITS.

Before one of the largest crowds that ever witnessed a ball game in this city, estimated at between 2,500 and 3,000 people, the Giants took a second game from the Fairviews yesterday afternoon at Athletic Park. The game was close and exciting and the crowd was worked up to a great tension from the first inning to the close of the game. The colored rooters supported their team with a vim and the white fans yelled their lungs out for the Fairviews. Devinney played a great game in the field and at the bat for the Giants. In the second inning with two men on bases he lined out a beautiful two bagger, scoring both men. Lally, recently released by Marion, played at third base for the Fairviews and made two two base hits. Harris pitched a great game, striking out 12 men. Dennison mowed down six Giant batters. **Tamerlane the Winner.**  
[Publishers' Press]  
Hamilton, Bermuda, June 3.—The tiny cockleshell yacht, Tamerlane, owned by Frank Maier, of New York City, is the winner of the \$1,000 cup offered by Sir Thomas Lipton, the Irish baronet, for a deep sea race from Sandy Hook to Hamilton, she having arrived here late Sunday after a somewhat uneventful voyage.

**Big Trials To Begin.**  
[Publishers' Press]  
Kansas City, Mo., June 3.—This is to be a busy week in the U. S. court here. The Armour, Swift, Cudahy and Nelson Morris packing companies are to be tried for alleged violations of the interstate commerce law in receiving concessions from the Burlington railway in rates on shipments to New York for export. After the packing companies cases have been disposed of, the Burlington is to be tried for granting the concessions.

**A Lady Bountiful.**  
Tramp—Kin you give a poor feller a cold bite, mum? Housewife—Yes. On your way out you'll find some ice cream on the gate.—Woman's Home Companion.  
**The Clever Ones.**  
Griggs—Some men are born great, others achieve greatness. Briggs—Yes; and others simply have the trick of making other people think they're great.  
**I have lived to know that the great secret of human happiness is this: Never suffer your energies to stagnate.**—Adam Clark.  
**Curiosities of Woman.**  
Women pin from left to right; men from right to left. Women button from right to left; men from left to right. Women stir from left to right (their tea, for instance); men from right to left. Women seldom know the difference between a right and a left shoe, and if a housemaid brings up a man's boots she will nine times out of ten place them so that the points will diverge. Can these peculiarities be explained?—London Truth.  
**Cash Your Checks.**  
It is not well to keep checks locked up in your desk. Cash them. It is security for yourself, if the drawer is not entirely reliable, and a favor if he is. "Stale" checks are an annoyance to bank officials and a general hindrance. Cash your checks!  
**Sarcasm.**  
Softly—I'd have you to understand, str, that I'm not such a fool as I look. Sarcasm—Well, then, you have much to be thankful for.  
**Bind together your spare hours by the cord of some definite purpose.**—Taylor.  
**How to Get Bath.**  
It is said that earthworms can be found anywhere by simply wetting the ground with a solution of cupric sulphate (blue vitriol)—ten grams to a quart of water—which will bring them out in surprising numbers almost immediately. Soapuds have the same effect.  
**Pianos.**  
The first pianoforte was invented by a German named Backers, about 1767. There is still in existence the name board of a piano inscribed, "Americus Backers, Inventor, Jermyn Street, London, 1776."

Chicago 0; Cleveland 2.  
St. Louis 1; Detroit 6.  
[Publishers' Press]  
St. Louis, Mo., June 3.—Mullin for the Detroit Americans held the St. Louis aggregation down to four hits this afternoon and the visitors won a handy game. The score:  
R. H. E.  
St. L. . . . . 0 0 0 0 0 0 1 0—1 4 4  
Det. . . . . 0 1 2 0 0 0 2 1—6 13 2  
Batteries—Peltz and O'Connor; Mullen and Schmidt. Umpires—Conolly and Evans.

**SOX LOSE TO NAPS.**  
Chicago, June 3.—Cleveland's heavy sluggers were just good enough today to pull a victory out in a tight game with the White Sox, the score being 2 to 0. Pitcher J. J. had a good day and kept the Sox well in hand all the way. Hahn, of the Sox, made three of the four hits. Score:  
R. H. E.  
Cle. . . . . 0 0 0 0 1 0 0 1—2 6 1  
Chi. . . . . 0 0 0 0 0 0 0 0—0 4 3  
Batteries—Joss and Bemis; Walsh and Sullivan. Umpire—O'Loughlin.

**SAMPSE BREAKS WORLD'S RECORD**  
Indiana Pole Vaulter Clears Bar at Height of 12 Feet 4 7/8 Inches.  
TRIED IT EVEN HIGHER  
ON THIRD ATTEMPT HAD GONE SAFELY OVER BUT HIT BAR WITH HAND COMING DOWN—GREAT OVATION.

In the Western Conference track and field meet held Saturday at Evanston, Ill., Sampse, the great little athlete from Indiana University, broke the world's pole vault record clearing the bar at the height of 12 feet 4 7/8 inches. Describing this wonderful performance the Chicago Inter-Ocean printed the following yesterday:  
The crowd remained until the finish of the pole vault, which came long after the other events were swept off the board, and cheered the plucky Hoosier to the echo. He was given the greatest ovation ever tendered a college athlete by a Western crowd.  
When Sampse was trying the great heights and it became apparent that he was about to do something sensational, the spectators rose as a man and cheered him in every attempt. When he would fail to clear the bar a great groan would arise, but when he was successful then a mighty roar would go up that would startle quiet, sleepy Evanston.  
**Crowd Went Wild.**  
When Sampse soared over the bar at the tremendous height the crowd went wild. Staid men rose and cheered with the college boys, who gave their yells ending with Sampse's name. Pretty college girls stood up and gave vent to all sorts of inarticulate ejaculations in their efforts to cheer the wonderful Indiana vaulter.  
It was then seen that the game little Hoosier intended to set the bar even higher and put the record far beyond the reach of aspiring vaulters for years to come. He was cheered again and again. When he failed the first time a deep groan went up; again on his second failure at 12 feet 7 inches the great crowd showed its sympathy in no unmistakable manner.  
The third time he rose gracefully and was over the bar by a small margin. A roar that made the others weak in comparison, burst from the excited throng, but instantly changed to a cry of distress when he caught the bar on his way down and it fell to the ground. The spectators, who had remained for nearly an hour after the other events were finished, slowly filed out of the field, and the one topic of conversation was Sampse's wonderful work.  
**New Cure for Epilepsy.**  
J. B. Waterman, of Watertown, O., Rural free delivery, writes: "My daughter, afflicted for years with epilepsy, was cured by Dr. King's New Life Pills. She has not had an attack for over two years." Best body cleansers and life giving tonic pills on earth. 25c at A. G. Luken & Co.'s drug store.

**Horn's Great Pitching.**  
"Casey" Horn, the well known Richmond boy who is doing the twirling act for Marion, in the Interstate Baseball league, led Saginaw town with three hits Saturday and the Marion team won, 6 to 1. Horn is showing up in better form than he did last season.

**STARR PIANOS STILL WINNING**

Palladiums	0	5	.000

**RESULTS SATURDAY.**  
Starr Pianos, 19; Palladiums, 5.  
Panhandles, 15; Kibbeys, 3.  
The Starr Pianos, the league leaders, crossed bats with the tallend Palladiums Saturday afternoon at Athletic park, with the usual result—a victory for the musicians. It was not an easy victory despite the lop sided score, as the Newsboys gave the lead early in the first six innings. At the opening of the seventh the score was six to four in favor of the Starrs. Pitcher White, who had been twirling fine ball for the Pals up to that time, went up in that inning, six hits being made off of him. Runs were rained in from that time on to the close of the game. The Pals played a good game until the fatal seventh. The usual consistent game was put up by the Starrs. Lichtenfels, the big first baseman of the Starr team, played a bang up game despite a painful "charley horse." His fielding was clean and fast and at the bat he made a single, double and triple out of five times up. Score:  
Starr Pianos AB R H PO A E

Hit by Pitcher—Cook.  
Umpire—George Reid.  
**KIBBEYS BUMPED AGAIN.**  
The Panhandles introduced a new pitcher, Ridge, in their game with the Kibbeys Saturday afternoon and if he pitches as good ball against the other four teams in the league as he did against the Cravat Clerks, there will be an awful shrinkage in betting averages. He twirled the first six innings and only two hits were made off his delivery. Weeks bagging both of them. The Kibbeys played a sloppy game and were never in the hunt from start to finish. Lancaster had an off day, giving ten bases on balls. He was taken out of the box and Eggemeyer, the lanky German guardian of the first sack, took his place. He pitched a nice game, the few innings he was in the box, the Panhandle batters being dazzled by his sunny smile. The score:

Everybody's friend—Dr. Thomas' Electric Oil. Cures toothache, earache, sore throat. Heals cuts, bruises, scalds. Stops any pain.

## MUSIC AT SEA.

**Conditions Under Which Ships' Sails Sometimes Sing.**  
Some curious facts have been noted with regard to the sound conducting qualities of ships' sails. When rendered concave by a gentle breeze, the widespread sails of a ship are said to be excellent conductors of sound.  
A ship was once sailing along the coast of Brazil, far out of sight of land. Suddenly several of the crew, while walking along the deck, noticed that when passing and repassing a particular spot they always heard with great distinctness the sound of bells chiming sweet music, as though being rung but a short distance away.  
Puzzled by this phenomenon, they quickly communicated the discovery to their shipmates, but none of them was able to solve the enigma as to the origin of these seemingly mysterious sounds which came to them across the water.  
Months afterward, upon returning to Brazil, the crew determined to satisfy their curiosity. Accordingly they mentioned the circumstance to their friends and were informed that at the time when the sounds were heard the bells in the cathedral of San Salvador, on the coast, had been ringing to celebrate a feast held in honor of one of the saints.  
Their sound, wonderful to relate, favored by a gentle, steady breeze, had traveled a distance of upward of 100 miles over the smooth water and had been brought to a focus by the sails at the particular locality in which the sweet sounds were first heard.  
This is but one of several instances of a similar kind, trustworthy authorities claiming that this same music is often heard under somewhat the same circumstances and especially in a moist laden atmosphere.—London Tit-Bits.

**English Regard For Teaching.**  
If there is one occupation which Englishmen are unanimous in condemning as degraded and degrading it is that most fascinating, most difficult, delicate and important work, the training of the mind. In what are humorously called "the higher walks" of teaching there are respectable salaries to be earned and agreeable rooms or houses for occupation. Here, purged of the dross of utility, a man may once more take rank as a gentleman, and if he becomes head of a house the supreme uselessness of his position commands universal and silent respect.—Nineteenth Century.

**Gentian Root.**  
Gentian root, often used as a tonic, is considered in many material countries a remedy against intermittent fever. Especially is this the case in Corsica, in that section of the island near the town of Aleria, which is infested with malaria. The inhabitants recently protested violently against the introduction of quinine on the part of the medical authorities, declaring that they would not abandon the remedy which had been used among them for centuries, the gentian root, either powdered or simply masticated.

**Quite the Contrary.**  
"After all, my friend," began the solemn stranger, "life is but a dream, a . . ."  
"Not much, it ain't," snorted the hard headed man. "In nearly every dream I ever had I was gettin' more money than I knowed what to do with."—Philadelphia Press.

**Frenchmen and Spanish.**  
French people find it difficult to speak Spanish properly. Victor Hugo boasted that he was the only Frenchman who could really speak Spanish, something of Spain being mingled in his ancestry.  
But for some trouble and sorrow we should never know half the good there is about us.—Dickens.

**Simplon Tunnel Post Cards.**  
Collectors of picture post cards will be interested in the inauguration card of the Simplon tunnel. On the one side is a design showing Baron pointing the way to Commerce and Agriculture. On the address side is a frieze bearing a laureated head and the inscription, "In laore pax." In the lower part of the frieze are the words, "Inauguration of the Simplon." Of this card 500,000 copies will be struck and the block then destroyed.  
A man who has so much money that he doesn't have to spend to prove it might as well be poor.  
When a man has successfully deceived himself he makes it a matter of pride to deceive others.

**Suppose She Is Next!**  
Oh, womanizer, consider this thing. You listen to our fairy tales. And you believe them, every word. Unless our intuition fails. That is, you seem to think them so. For anything that we can see. But do you to yourself remark. In undertone. "That sounds to me?"  
With such a large, good natured smile You listen as our yarns we spin And go in rapture over them. As you appear to take them in. But after we have gone our way And you have thought the stories o'er, Then do you chuckle and observe. "I wonder what he takes me for!"  
The stories of our bank account. Our triumphs in the market place. You hear, and not a sign of doubt. Is written in your girlish face. But do you often long to say. When being handed tales like these, "I thought it would be quite polite. 'I'm from Missouri; show me, please!'"  
But man, the tall and blooming chump. He never guesses you are wise. And so he swells up like a toad And dishes out artistic lies. But while you sit there wonder eyed, If not intent, at least resigned, Say, how he'd jump and hit the pike If he could only read your mind!

**The Rhinoceros.**  
The rhinoceros is the thickest skinned quadruped, its hide being tough enough to resist the claws of a lion or tiger, the blows of a sword or the balls of an old fashioned musket.  
**Corsets.**  
Women have worn corsets from the earliest times. The mummy of an Egyptian princess who lived 2,000 years before Christ was discovered in 1872, and round the waist was a contrivance closely resembling the modern corset.

**Control of Energy.**  
Is It Possible For the Human Race to Avert Extinction?  
The only conceivable way in which the human intelligence can ever succeed in averting the "procession of the great year" is not by postponing the issue, but by reversing the process. The question is this: While energy is being dissipated in accordance with the natural law, can we so manipulate things as to accumulate energy, making the unavailable available—notwithstanding the fact that cosmic processes seem to be essentially irreversible? Now there is assuredly no inherent reason why we should not accomplish this. It is true that hitherto all the energy evolution that has been observed is atomic disintegration. We may speak now, indeed, of the analysis of the elements. But so it was, we may remember, that the older chemistry began, and yet analytic chemistry was the precursor of synthetic chemistry. We began by breaking up compounds, but now we can make them—can, indeed, make compounds hitherto unknown in nature. Similarly, it is more than probable that we shall ere long learn to achieve the synthesis of the elements as well as their analysis. No energy is ever lost. Even when the radium atom, itself the child of the uranium atom, breaks down and dissipates its energy, ending, it is supposed, as the dull atom of lead, the original energies are not destroyed. Why should they not be gathered up again and thus again become available? Are matter and energy to go on their way, ultimately destroying the human race? For myself, I incline to the view that victory will rest at last with "man's unconquerable mind."—C. W. Salsbery, F. R. S., in Harper's Magazine.

**Not Always Rude.**  
"Well, I have exploded one superstition."  
"Yes."  
"I just asked the old gentleman for his daughter's hand."  
"Did he kick you downstairs?"  
"No; he acted as though I were doing him a favor."  
**Thinking of Her.**  
"He doesn't believe in reform spell-ing."  
"Perhaps it comes natural to him."  
"No. He can't spell at all, but he wants his stenographer to earn her money."

**Finding Money.**  
There was a young girl of Dubuque, Who married a wandering duque. He found she'd no money. And murmured: "How foney!" The duque in Dubuque makes a duke.

**CONTROL OF ENERGY.**  
Is It Possible For the Human Race to Avert Extinction?  
The only conceivable way in which the human intelligence can ever succeed in averting the "procession of the great year" is not by postponing the issue, but by reversing the process. The question is this: While energy is being dissipated in accordance with the natural law, can we so manipulate things as to accumulate energy, making the unavailable available—notwithstanding the fact that cosmic processes seem to be essentially irreversible? Now there is assuredly no inherent reason why we should not accomplish this. It is true that hitherto all the energy evolution that has been observed is atomic disintegration. We may speak now, indeed, of the analysis of the elements. But so it was, we may remember, that the older chemistry began, and yet analytic chemistry was the precursor of synthetic chemistry. We began by breaking up compounds, but now we can make them—can, indeed, make compounds hitherto unknown in nature. Similarly, it is more than probable that we shall ere long learn to achieve the synthesis of the elements as well as their analysis. No energy is ever lost. Even when the radium atom, itself the child of the uranium atom, breaks down and dissipates its energy, ending, it is supposed, as the dull atom of lead, the original energies are not destroyed. Why should they not be gathered up again and thus again become available? Are matter and energy to go on their way, ultimately destroying the human race? For myself, I incline to the view that victory will rest at last with "man's unconquerable mind."—C. W. Salsbery, F. R. S., in Harper's Magazine.

**Suppose She Is Next!**  
Oh, womanizer, consider this thing. You listen to our fairy tales. And you believe them, every word. Unless our intuition fails. That is, you seem to think them so. For anything that we can see. But do you to yourself remark. In undertone. "That sounds to me?"  
With such a large, good natured smile You listen as our yarns we spin And go in rapture over them. As you appear to take them in. But after we have gone our way And you have thought the stories o'er, Then do you chuckle and observe. "I wonder what he takes me for!"  
The stories of our bank account. Our triumphs in the market place. You hear, and not a sign of doubt. Is written in your girlish face. But do you often long to say. When being handed tales like these, "I thought it would be quite polite. 'I'm from Missouri; show me, please!'"  
But man, the tall and blooming chump. He never guesses you are wise. And so he swells up like a toad And dishes out artistic lies. But while you sit there wonder eyed, If not intent, at least resigned, Say, how he'd jump and hit the pike If he could only read your mind!

**The Rhinoceros.**  
The rhinoceros is the thickest skinned quadruped, its hide being tough enough to resist the claws of a lion or tiger, the blows of a sword or the balls of an old fashioned musket.  
**Corsets.**  
Women have worn corsets from the earliest times. The mummy of an Egyptian princess who lived 2,000 years before Christ was discovered in 1872, and round the waist was a contrivance closely resembling the modern corset.
