Ice cream establishments, wholesale as well as retail, are running at their capacity now and more of this cooling substance is being eaten this year than ever before.

William Dudley Foulke, of this city, will receive the degree of L. L. D. at Earlham College, commencement next week.

Bank Is Flourishing.

Some of the officers and directors of the First National Bank of Hagers-town, visited the bank Thursday evening and went over the affairs of the institution with the cashier, Mr. Hicks. The first year of the history of the bank has not yet ended, but it is understood that there will be enough profits to admit of a good dividend.

Mrs. W. A. Fiske left yesterday for Greencastle where she will attend the commencement exercises of De Pauw University, and spend two or three weeks visiting her parents.

JEWELRY JOTTINGS.

It is a fact of the season that flower pins should match the costume.

For unique effects that of wearing incut jewels, mounted as pendants or charms, is gaining favor.

A very pretty new bracelet is composed of squares of gold arabesques connected by three rows of chains, about an inch long, in rather heavy links, the whole being finished in Roman gold.

Pendants are still much in vogue and constant variations in outlines appear as well as in color schemes and treatment. A charming oval pendant is a good sized oval set in a wreath of small flowers and leaves carried out in elvines and diamonds and suspended from a diamond bow.—Jewelry Circular-Weekly.

LIZARDS OF BARBADOS.

They Can Change Color and Drop Their Tails at Will.

The green lizards which swarm on every tree certainly have the hardest life of any creatures in Barbados, since their flesh is so delicate that everything eats them which can catch them. Cats, fowls, birds, monkeys and snakes all devour the poor lizards, which have only two methods of defending themselves, both very inadequate for the purpose. One is their power of changing their color, whereby they can appear bright green at one moment on the leaf of an aloe and then dark chocolate brown on a piece of damp earth. If this does not conceal them from their enemy they drop their tails. The caudal appendage jumps from the ground and makes a frantic dance all by itself, and if the pursuer is deluded into seeing it the lizard avails itself of the chance to escape and grow another tail.

For the rest the poor lizards are harmless things, with pathetic eyes, in which lurks an expression of weariness and disillusion, as though they were as old as the world itself and had found it all vanity and vexation of spirit. They are fond of plaintive music and will enter at the open windows when a piano is playing and sit listening and nodding their queer flat heads and looking out of those wistful eyes at the player till he or she, if of an imaginative temperament, might fancy they were playing to an audience of transmigrated souls.—Chambers' Journal.

Show in a Notebook.

Years ago Bernard Shaw furnished a biographical sketch of himself to an English newspaper. It is said to be still correct except as to his bachelorhood, and it runs thus: "I am a bachelor, an Irishman, a vegetarian, an atheist, a teetotaler, a fanatic, a humorist, a fluent liar, a social democrat, a lecturer and debater, a lover of music, a fierce opponent of the present status of women and an insister on the serious in art."

As in Her Dream.

Says a recent news item in an English newspaper: "A Mrs. Howling of Penge dreamed that she saw her little girl washed up on Hastings beach and the body taken away on a tarpaulin. Two days later the child was knocked down by a pantechnicon and its wheels passed over her. Bystanders brought a tarpaulin, upon which the child was taken, to the Beckenham cottage hospital."

CONTROL OF ENERGY.

Is It Possible For the Human Race to Avert Extinction?

The only conceivable way in which the human intelligence can ever succeed in averting the "procession of the great year" is not by postponing the issue, but by reversing the process. The question is this: While energy is being dissipated in accordance with the natural law, can we so manipulate things as to accumulate energy, making the unavailable available—nothing standing the fact that cosmic processes seem to be essentially irreversible? Now there is assuredly no inherent reason why we should not accomplish this. It is true that hitherto all the atomic evolution that has been observed is atomic disintegration. We may speak now, indeed, of the analysis of the elements. But so it was, we may remember, that the older chemistry began, and yet analytic chemistry was as the precursor of synthetic chemistry. We began by breaking up compounds, but now we can make them—can, indeed, make compounds hitherto unknown in nature. Similarly, it is more than probable that we shall ere long learn to achieve the synthesis of the elements as well as their analysis. No energy is ever lost. Even when the radium atom, itself the child of the uranium atom, breaks down and dissipates its energy, ending, it is supposed, as the dull atom of lead, the original energies are not destroyed. Why should they not be gathering up again and thus again become available? Are matter and energy to go on their way, ultimately destroying the human race? For myself, I incline to the view that victory will rest at last with "man's unconquerable mind."—C. W. Saleeby, F. R. S., in Harper's Magazine.

Batteries—Hughes and Heyden; Hess and Clark. Umpire—O'Loughlin.

RAIN AT ST. LOUIS.

St. Louis, June 8.—Rain caused the postponement today of the game between the Philadelphia and St. Louis Americans.

How Are You Healed?

Mentality is marked on the heel. Only those with pronounced brain ability have lines there sharply seen. Others have them as mere markings. If there is a network of small lines upon the heel, it means great versatility. People who draw, paint, play and dabble in the languages have many heel lines. A smooth surface of heel denotes a placid, nonworking brain.

The Fashionable Dinner.

Eight men exclusive of the butler are required to serve a dinner of twenty-four covers, one being allowed for every three diners. Another is stationed in the pantry to "run in" the courses. Absolute order and silence reign among these men, who perfectly understand the butler's cabalistic signs. Electric signals pass constantly between chef and butler. From the eating of guests until the ladies leave not more than eighty-five minutes should elapse, for long dinners are considered bad form. Upon these occasions scarcely a member of the domestic corps escapes some special duty. The housemaids assist the pantry maid. After each course twenty-four silver plates and countless small silver must be carefully cleaned, wiped very dry and then polished with chamols before being put away. Nearly 200 pieces of engraved crystal ware must be washed and polished, and it is too costly and brittle to be hastily handled.—Everybody's Magazine.

He Knew.

The first witness called in a petty lawsuit in Cincinnati was an Irishman of whose competence as a witness opposing counsel entertained doubt. At their instance there was put to him before being sworn the usual interrogatory: "Do you know the nature of an oath?"

A broad grin spread over the face of the Irishman as he replied: "Indade, your honor, I may say that it is second nature with me."—Harper's Weekly.

THE LEADERS MEET TODAY

EAST HAVEN VS. STARRS

Boys on the West Side of the River Hope to Break the Winning Streak of the Musical Men—Two Other Games Are Scheduled.

Games Scheduled in City League.

Starr Planos vs. East Haven, at East Haven.
Palladiums vs. Pan Handles, at Athletic Park.
Pogue-Millers vs. Kibbeys, at Athletic Park.

What promises to be a most interesting game is the one between the Starr Planos and the East Havens, scheduled this afternoon at the East Haven diamond. The teams stand respectively first and second in the City League race. The East Havens have been coming at a fast rate the past two weeks and they claim that today they will put a crimp in the perfect percentage the Starrs have. As the Hospital boys are coming a little to close for comfort the Plano men will try their best to shove them back into the rack.

The Palladiums will tackle the Pan Handles at Athletic park this afternoon. The game will be called at 2 o'clock. The Printers will sport their new suits, which arrived Wednesday, and they are depending on them to break the hoodoo which has been at their heels since the first of the season. Two of the star pitchers of the league, White and Ridge, will face each other in this game. At 4 o'clock on the same diamond the Pogue-Millers and the Kibbeys will play.

BABIES IN ARABIA.

Their Charms and Perils and the Shaving of Heads.

Life has exceptional difficulties for the babies of Arabia, especially for those who are of sufficiently high rank to be brought up according to all the ancient customs of their race. A royal baby's first toilet there consists in winding a bandage about its body after it has been carefully bathed and perfumed.

If the child be a girl, on the seventh day of her birth, holes, usually six in number, are pricked in her ears, and when she is two months old heavy gold rings are attached to them, to be worn throughout her lifetime except during periods of mourning for relatives. On the fortieth day the baby's head is shaved, and the disposal of the hair is regarded as a very weighty matter. It must not be burned or carelessly thrown away, but buried, thrown into the sea or hidden away.

The fortieth day marks a turning point in the child's life. Heretofore it has only been seen by few, but now it may be seen by anybody and is regarded as fairly launched on the tide of existence. Several charms are attached to its body for protection against the "evil eye." Everything the child uses is perfumed and covered at night with jasmine and before it is used fumigated with amber and musk and sprinkled with attar of roses.

ELECTION STRATEGY.

An Incident of an English Parliamentary Contest.

In the days before the institution of the secret ballot, when the candidate with the longest purse usually won an election, a former Lord Dundonald, who refused to give bribes, contested Hamilton, but was beaten by an opponent who paid his electors at the rate of 5s a vote.

Then the unsuccessful candidate conceived this brilliant plan, says the writer of a history of the Dundonald family. He announced to his friends that he was quite determined to win the seat next time without bribery. Then he sent the town crier round the town to announce that all who had voted for him in this first election might repair to his agent, from whom they would receive £10.

As comparatively few people had voted for him, this was not a very expensive process. And at the next election Lord Dundonald was elected by an enormous majority. After the triumph several people came to him and delicately suggested that some reward was due to such loyalty.

"Not a farthing," was the reply.
"But, my lord, you gave £10 a head to the minority at the last election, and the majority have been counting on some of handsome on this occasion."
"Perhaps so," said the clever candidate. "My former gift was for their disinterested conduct in not taking my opponent's bribe of £5. For me to pay them now would be to violate my own principles."—Pearson's.

THEIR WEAK POINTS.

The Fears and Superstitions of Some Famous Men.

All great people have had their foibles, which is another way of saying that all have their weak points. Dr. Johnson, with all his philosophy, was not without a superstition. He was very careful not to enter a room with his left foot foremost. If by any chance he did so he would immediately step back and re-enter with his right foot foremost. He was terribly afraid of death, too, and would not suffer it to be mentioned in his presence.

Julius Caesar, to whom the shouts of thousands of the enemy were but sweet music, was mortally afraid of the sound of thunder and always wanted to get underground to escape the dreadful noise.

Marshal Saxe, who loved to look upon the ranks of opposing armies, fled and screamed in terror at the sight of a cat.

Peter the Great could scarcely be persuaded to cross a bridge, and whenever he placed his foot on one he would cry out with fear. Like the great man he was, he tried to overcome his weakness, but he was never able to do so. And Byron would never help any one to salt at table, nor would he be helped himself, and if any salt were spilled he would immediately get up and leave.

THE HALL OF FAME.

John Perugini, for many years identified with light opera as a singer, has become a Wall street broker.

George O. Starr has succeeded the late James A. Bailey as manager of the big Barum & Bailey circus. He is a former Philadelphia.

President Roosevelt is sitting for a portrait in oil to be made by Irving R. Wiles of New York at the suggestion of the emperor of Germany and others to be placed in the University of Berlin.

The Earl of Harrington was born sixty-two years ago and succeeded his father in the title in 1881. He is one of the peers who have dabbled in trade. In 1894 he opened a fruit shop in Parliament street in London.

The only negro officer of the army who is a West Pointer is Charles Young, at present on duty as military attaché at Port au Prince, Haiti. Captain Young entered the Military academy in 1884 and was graduated in 1889.

To Ralph Talbot, Jr., a second lieutenant of the Twelfth cavalry, belongs the distinction of being the youngest commissioned officer of the United States army. He was born in 1884 and was commissioned five days before his minority expired.

Richard Burke, the Englishman, has given up hunting and will sell his establishment and go to San Francisco to help in the reconstruction of his damaged property there. He is part owner of many buildings in San Francisco and is married to a wealthy American, Miss Donaghy.

Bennet Burleigh, the English war correspondent, has about recovered from a long siege of pneumonia. Mr. Burleigh is the oldest of war correspondents now on the active list, having first smelled gunpowder in the civil war over forty years ago. Since then he has served in half the countries of the world.

M. Jusserand, the French ambassador, since his residence in Washington has largely added to his reputation as an orator. He has always been known rather as a profound scholar and student, but in the speeches he has made in this country he has shown originality of research and a high degree of forensic ability.
