

## REVOLUTION FOR CENTRAL AMERICA

Periodical Uprising to Take Place in Five States About November 1.

### JUNTA COLLECTING FUNDS

PEOPLE OF THE LITTLE REPUBLICS ARE DISSATISFIED AND WILL TAKE ACTION SIMULTANEOUSLY.

#### [Publishers' Press]

New Orleans, Sept. 5.—Existence of an alleged junta which is said to be collecting funds and supplies for a revolution to be begun simultaneously about Nov. 1, in the five Central American republics, Costa Rica, Honduras, Salvador, Nicaragua and Guatemala, was announced here.

Don Angel Ugarte, who says he is a cousin of Policarpo Bonilla, brother of the president of Honduras, said in an interview: "I am informed that there is to be a general uprising in the five republics. My mission is to collect funds for a revolution in Honduras, where Policarpo Bonilla, my cousin, will lead the insurgent forces. The people of the five republics in Central America are all dissatisfied with their rulers."

Ugarte added that he believes an attempt at revolution in Salvador will be a failure, but that he hopes for success in the other republics. Ugarte came here a few days ago from Mobile, and the hotel at which he is stopping, there, have been several conferences of men from Central American republics.

So persistent are the reports about such a junta that Tobias Zuniga, who was temporarily exiled from Costa Rica about a year ago, after being defeated as a candidate for president, took occasion to deny publicly that he has any connection with the alleged revolutionary movement. His name was connected with the reports because he is on the point of going to Bluefields, Nicaragua.

Both engines were badly smashed.

Baron von Weisbach, discoverer of the incandescent mantle, has invented a device by which when the gas is turned on a shower of brilliant sparks lights the gas.

#### Are Ministers' Sons Bad?

A bishop marked the names of those whom he deemed worthy of remembrance for some service performed in religion or politics or literature or science or art or commerce or philanthropy or warfare, or some other aspects of the various life of the nation. Of such names he found 1,270 who were the children of clergymen or ministers, taking no account of those who were grandchildren of clergymen or more remote descendants. Of the children of lawyers, there were 510, and of doctors 350. The sons of clergymen who became themselves clergymen were 350. He further asserts that the superiority which the clergy enjoy in respect to their children to the other professions lies beyond dispute. The superiority has been not of numbers only, but of degree. From clerical homes have sprung more distinguished sons than from the homes of any secular profession.—Leslie's Weekly.

#### VALUE OF SEaweeds.

##### The Use of Irish Moss as a Food and Medicine.

Irish moss is used as a foundation for many desserts in the dietary kitchens where especial dishes are prepared for invalids. An authority on the question of seaweeds states that scurvy, the dread of sailors, caused by the absence of potash in the salt meat which forms a part of every ship's provisions, would be ameliorated by the liberal use of sea moss jelly, which is rich in potash. Irish moss has always a place in the medicine chest of the old fashioned housewife, who pins her faith to its healing properties for colds, sore throats, etc. On the coast where the moss is gathered and also in the majority of Irish families the moss is boiled, strained, boiled again with lemon juice and sugar, until it is of the consistency of sirup. It is taken hot, a teaspoonful at a time, and is said to be a very good remedy for the maladies referred to. The Indians use the ashes of seaweed for granular swellings. It is also used by the Chinese, and so highly is it prized by them both as a medicine and a food that it is gathered in some parts of the Pacific coast, principally at Monterey, and sent back to China.

The supply of seaweed of every description seems inexhaustible, as that pulled or reaped from the rocks is replaced by another and a more luxuriant growth the following year. On the Atlantic coast it is harvested only during the months from June to August, but at Monterey it is gathered every day all the year around.—Leslie's Weekly.

Miss Gertrude Quinlan has been engaged by Henry W. Savage for the eastern "College Widow" company. She will be seen in the role of Flora Wiggins, which she originated.

One of the most stirring numbers in the new Herbert Doty-Kerker musical comedy, "The Social Whirl," is a boot ball chorus, in the course of which the shoes of ten attractive young women are properly shined.

E. H. Sothern and Julia Marlowe have arranged to give a series of special performances, the proceeds of which will be used for endowing a chair of dramatic art at the George Washington university, Washington.

Bida Johnson Young, who wrote "Brown of Harvard," is a native of Baltimore. Her first connection with the stage was her appearance there in an amateur performance of Louise Molloy's melodrama, "A Woman of War."

#### The Water Lily.

Several specimens of water lilies have the very curious peculiarity of blooming all day and at evening closing their blossoms, and by retracting the stem, drawing the flower entirely under water. There is no more singular fact in the history of flowers than this oddity of the water lily.

#### A Lively Paper Cutter.

Here is a little story which the English papers tell and any one is at liberty to believe if he will. No affidavits go with it. When Lord Dufferin was viceroy of India the maharajah of Indor paid him a visit and asked as a memento an ivory paper cutter belonging to Lord Dufferin. He consented, the Indian left, and the viceroy never saw him until some months later when the maharajah introduced a fine young elephant into the room. A pile of newspapers lay at Lord Dufferin's side. The animal went up to them, cut them neatly with his tusks, which had been purposely sharpened, and laid them in a neat heap on the floor, ready for perusal.

#### THE SOUTH.

With or without immigration, land values in the south have been steadily advancing during the last year or two. But much of the best land is still cheap enough to be very attractive to a man with a small capital who knows a good investment when he sees it.—St. Louis Republic.

In the race for wealth the southern farmer is abreast of the western granger and the northern manufacturer. He is no longer hampered by poverty and a tradition. From all over the south come reports of expanding industries. It is computed that farm properties in the eleven states that once seceded from the Union have risen in value more than \$1,000,000,000 in two years.—Philadelphia Press.

### EARTHQUAKE SCALDS FISH

Violent Shock in Hawaiian Islands Cuts a Queer Caper—Beach Lined With Dead Fish.

#### [Publishers' Press]

Honolulu, Sept. 5.—An earthquake shock of exceptional violence was felt at Hilo. Soon after the disturbance the beach was lined for miles with dead fish, apparently scalded to death. This is a very unusual phenomenon in connection with earthquakes and is regarded as showing conclusively that the disturbance was a submarine volcanic eruption, and that it occurred within seven miles of Hilo.

#### THE PAINTERS.

Amelie River is an artist; her husband, Prince Troubetzkoy, is a painter, but "She is greater than I" is the compliment he pays her.

W. D. Murphy, a New York artist, has completed a three-quarter length portrait of Admiral Dewey, which is pronounced by all of the latter's acquaintances to be the best portraiture of him ever made.

Tade Styka had two of the most striking pictures in this year's Paris salon. He is fifteen and the son of a Polish painter. He has been an accepted exhibitor since 1903, when he had a portrait of Tolstoy accepted.

Alfred East, A. R. A., who succeeds the late Sir Wyke Bayliss as president of the Royal Society of British Artists, was born at Kettering, where he earned his first five shillings at the age of seven by drawing a mammoth for an itinerant lecturer. He learned the rudiments of art while earning his living in a Glasgow counting house.

#### THE ROYAL BOX.

Emperor William recently raced in his automobile with an express train, beating the latter by nine minutes.

When King Victor Emmanuel visited Ancona to lay the cornerstone of a hospital he was attended by 280 detectives, 600 policemen, 800 carabinieri and 9,000 soldiers.

Princess Louise Augusta of Sleswick-Holstein recently paid a surprise visit to the labor home of the church army in Marylebone, London. She saw and chopped wood, worked the firewood bundling machine and was greatly interested in the process.

Queen Alexandra enjoys the distinction of being the only sovereign in modern times to wear the leek as a floral emblem at a state function. The wild leek has long been regarded as the national emblem of Wales and it was as such that Queen Alexandra wore it at a drawing room which she held on St. David's day.
