

Do You Want to Know What You Swallow?

There is a growing sentiment in this country in favor of MEDICINES OF KNOWN COMPOSITION. It is natural that one should have some interest in the composition of that which he or she is expected to swallow, whether it be food, drink or medicine.

Recognizing this growing disposition on the part of the public, and satisfied that the fullest publicity can only add to the well-earned reputation of the medical men, Dr. F. R. Pierce, Buffalo, N. Y., has "taken time by the forelock," as it were, and is publishing broadcast a list of all the ingredients entering into his leading medicines. The "Gilded Medical Doctor" is the popular title given to Dr. Pierce, and he is a physician, stomach tonic, blood purifier and heart regulator; also of his "Favorite Prescription" for weak, over-worked, broken-down, nervous and over-worn women.

The Dr. Pierce movement on the part of Dr. Pierce has, by showing exactly what his well-known medicines are composed of, completely disarmed all harping critics who have heretofore unjustly attacked him. A little pamphlet has been compiled from all the several medical authorities of all the several schools of practice showing the strongest endorsements by leading medical writers of the several ingredients which enter into Dr. Pierce's prescriptions. This little book is mailed free to any one desiring to learn more concerning the valuable, native, medicinal plants which enter into the composition of Dr. Pierce's medicines. Address Dr. Pierce as above.

Dr. Pierce's Pleasant Palace are the suggested anti-bilious gruelines. They regulate and invigorate Stomach, Liver and Bowels. Do not begin the pills but continue to take them on each day for a laxative and regulator, three or four for an active cathartic. Once tried always in favor.

50,000 GIVEN AWAY. In copies of Medical Adviser, a book that sold to the extent of 500,000 copies a few years ago, at \$1.00 a copy, was given away \$50,000 worth of the invaluable books. This year we shall again give away \$50,000 worth of them. Will you share in the benefit? If so, send only \$1.00 to cover the cost of mailing only for book in stiff paper covers, or \$1.00 stamps for rich-bound. Address Dr. F. R. Pierce, Buffalo, N. Y.

MUCH DAMAGE DONE THROUGHOUT SOUTH

Incessant Rains Have Ruined Crops in Many Parts of Dixie Land.

COTTON SUFFERS MOST

FIELDS OF CORN COMPLETELY FLOODED IN TENNESSEE—CLEANING UP PROCESS IN CITY OF MOBILE.

Asheville, Tenn., Oct. 3.—Irreparable damage is being done the crops of Tennessee by the incessant rains which have fallen during the past two weeks. It will be impossible for some time yet to accurately estimate the loss by reason of the excessive downpour, but Commissioner Ogilvie of the department of agriculture declares that it will simply be enormous. The rains have prevented the planting of wheat altogether, and should there be no more rains for a month it would be an utter impossibility for the farmers to sow the average wheat crop. In the lowlands of middle and west Tennessee, where the finest corn is grown, that crop has been knocked flat and is now rotting on the ground. Reports come to the commissioner from all the cotton sections to the effect that the seeds are sprouting in the bolls, the quality of the staple is being injured, and in other instances the plant is failing to the ground.

For eight days rain has been falling throughout the Mississippi valley, and reports coming in from isolated districts confirm earlier statements of heavy damage to cotton and corn. John W. Elfridg of Hillhouse, Miss., and Walter Clark of Clarksburg, Miss., president of the Mississippi division of the Cotton Growers' association, estimate the damage to the cotton crop in Mississippi at 25 per cent. Mr. Clark says: "The cotton is not only rotting in the ground, but on the stalk. On September 25, I estimated the Mississippi crop at 1,600,000 bales. Now, there is no man able to say what the crop will be, owing to the widespread damage."

Relief Work at Mobile. Mobile, Ala., Oct. 3.—Heavy rains along the lower part of the causeway caused some interferences with relief work, but all things considered the situation is well in hand, and all of the efforts are being well cared for. Contributions are steadily pouring in from the citizens of Mobile and from outside points. Shelter for those whose homes were wrecked is the thing most generally needed, and it is becoming evident that many of those who lost everything in the storm must have aid in rebuilding their homes.

Company to Be Prosecuted. San Francisco, Oct. 4.—The United Railroads company is to be prosecuted for its failure to put funds on the cars. Under the law the company is guilty of a misdemeanor for every car operated without a fund. The fine is \$500. The assistant district attorney has filed a complaint against the company.

Cold Wave in Colorado. Colorado Springs, Colo., Oct. 4.—Colorado Springs experienced its first snow storm of the season. Reports from the mountains indicate a snowfall of several inches. At Pueblo the temperature fell nearly 40 degrees in the past 12 hours.

Shot Fired Through Door. Minneapolis, Oct. 4.—Rome Shields, a negro, manager of a rooming house, was persecuted while sitting in a saloon. The shot was fired through an open door. The murderer escaped.

The *Minneapolis Journal* writes that in greater Minneapolis there are

RAIN AT PHILADELPHIA.

Philadelphia, Oct. 4.—Rain interfered with today's game between the New York and Philadelphia Americans.

The German government has taken possession of a short strip of track near Berlin and is planning to execute a unique series of railroad "accidents" made to order. Every variety of misplaced switch will be tested, every possible defect in wheels, axles and car equipment will be tried out, and the grand finale is to be an immense head-on collision of locomotives. These spectacular exhibitions are not planned by the government as national amusement. They are for the purpose of scientific experiment, so that the engineers and railway experts may study ways and means to prevent accidents of all kinds in the future.

Railroad disasters have been German with alarming frequency in the German empire. It is estimated that the German railways lose \$1,200,000 annually through damages. After the causes and effects of each variety of wrecks have been noted it will be the task of the government officials to devise safeguards.—*St. Louis Post-Dispatch*.

Denham may stand a chance of getting on the team as guard or tackle. Bruner and Hall are contesting for left guard, with odds about even. Bruner is quick and gritty, but Hall is heavier and a hard man to buck.

The entire squad was drilled in punting, signal practice and scrimmage last night. No team has yet been picked, but in all probability, the line-up of Earlham against Rose Polytechnic will be as follows:

Allee—Center.

Barrett—Right Guard.

Bruner—Left Guard.

Thistlethwaite—Right Tackle.

Hauck—Left Tackle.

Wann, Captain—Right End.

Guyer—Left End.

Birch and Elliott—Right Halfback.

King—Left Halfback.

Carey—Full Back.

Grimes—Quarterback.

DATE OF WORLD SERIES

FIRST GAME OCTOBER 9

White Sox and the Spuds Arrange for Contests to Be Played to Decide Championship in Baseball for this Season.

Chicago, Oct. 4.—The first game of the series between the Chicago National Baseball Club and the Chicago American League club for the championship of the world will be played Tuesday, October 9, on the grounds of the National League club in this city. The date was decided at a conference between President Charles W. Murphy, Charles Comiskey and Harry Pulliam.

Mine Owner Missing.

Glenour, O., Oct. 4.—J. Will Smith, owner of the Segalla mine here, is absent and claims to the amount of \$4000 have been filed against him. The mine has been attacked by the sheriff of Athens county and is now at a standstill. Smith purchased the mine a few months ago, agreeing to pay \$35,000 for the property.

EARLHAM FOOTBALL SQUAD AFTER PRACTICE

Coach Wilson is working hard with his squad of material which is largely made up of new men. The result of the first game with Rose Poly is anxiously awaited, as it will give the rooters a line on the team.

KEEP HANDS OFF
SAYS ROCKEFELLER

Oil King is Opposed to the Government Control of Large Corporations.

SUBMITS TO INTERVIEW

RAKES WILL HAVE TO BE PUT ON NATIONAL DEVELOPMENT, HE SAYS, IF WE LIMIT OPPORTUNITY.

Cleveland, Oct. 4.—An interview with John D. Rockefeller is published here, in which the oil king comments on the demand for government regulation of so-called private industries, and makes a strong plea for national development. Mr. Rockefeller is quoted, in part, as follows:

"If we limit opportunity, we will have put the brakes on our national development. Will the individual strive for success if he knows the hard won prize is to be snatched from his finger at the last by his government? We are still too young a nation to begin tearing down. We must build up, build up, for years to come. The very children in the schools should be taught the need of our development."

Mr. Rockefeller continued: "At this critical stage we are giving foreigners ammunition to fire at us. He is quick to seize this advantage. Take the attack we made on our own packing business, for instance. I know none of the men in the beef trade. But it is safe to assume from the proportions of their industry that they are round business men. And it is safe to assume, too, that no business could have been built to such proportions on such false principles, or by such unsound methods, as they were charged with. I was in Europe when the attack was made at home on these men and their industry, and I could watch the effect of it there at close range. Those fellows abroad snatched at our own charges against our own business with the greatest glee. I do not believe there was a line of American goods sold abroad that was not injured."

Referring to a subpoena recently issued, requiring him to appear in court in an action against the Standard Oil company, Mr. Rockefeller said: "While I was in active business, I used to always respond. But now I am not in a position to give these inquiring people the information they want. They know that as well as I do. If they really wanted information it is other men they would summon, the men who have the information they want."

For Home Rule Cause.

Philadelphia, Oct. 4.—Patriotism of a substantial kind was manifested here when the convention of the United Irish League of America, amid great enthusiasm, pledged the organization to raise \$100,000 for the cause of home rule for Ireland within two years. A pledge of a \$50,000 subscription which was incorporated in the report of the committee on ways and means had been unanimously endorsed by the delegates, and within 20 minutes \$70,000 had been subscribed. Later, this amount was increased to \$78,000. A telegram which had been ordered forwarded to John E. Redmond announcing the \$50,000 pledge, was withdrawn and the league then increased the amount to \$100,000.

BUILDING CEMENT.

The Most Ancient Form Was Simply Burned Limestone.

Cement, concrete and especially "reinforced concrete" will, according to some authorities, solve many of the hard problems confronting the architects and builders of modern structures. Cement is known to have been used by the Chaldeans, Egyptians, Greeks and Romans. The most ancient form of cement was simply burned limestone, more or less pure, used very much as ordinary lime is used at the present time. The Romans were the first to adulterate lime by adding certain clay soils and slate for the purpose of making a cement of a hydraulic nature—that is, one which would set or harden under water. Pliny, who lived in the first century A. D., describes the method of modifying ordinary burned limestone and converting it into a form of hydraulic cement.

In ancient times it was believed that the best cement was made from the hardest rock, and this opinion was not modified from the time of the Romans down to the eighteenth century. However, John Smeaton, the man who built the second Eddystone Lighthouse, in course of examining the various hydraulic cements for use in the foundation and masonry made the important discovery that the quality of hydraulic cement depends upon the amount of clay in the limestone. This is conceded to be the most important discovery in the art in nearly twenty centuries.

On the Isle of Portland, in the south of England, there are certain quarries of limestone which have been worked for many years, in former times producing building stone. In 1821 an Englishman named Joseph Aspdin of Leeds, patented a process for mixing and burning lime and clay. The product looked so much like the Portland cement from which the commonly known name given to nearly all kinds of hydraulic cement was derived.—Chicago News.

Attacked By Fire.

St. Catharines, Ont., Oct. 4.—The Ontario Glass, Crown and Wine Manufacturing company's plant, two miles west of here, was destroyed by fire. The value contained 150,000 gallons of glass. The loss is \$125,000.
