PARTIAL REPORT ON WATER SUPPLY

Geological Survey Gives Interesting Facts About Wells in This County.

INVESTIGATION FINISHED

IN RICHMOND, WELLS SHOULD BE SUNK IN GRAVEL—EAST OF HERE THERE IS A GREAT SUPPLY OF WATER IN ROCK.

The investigation of the underground water resources of Wayne county, recently completed by the Hydrographic Branch of the United States Geological Survey, has disclosed the reasons why at some points large amounts of water are obtained from wells, while at other places no water is found. Just east of Richmond the surface rock is a hard, fine-grained limestone, known to geologists as the "Niagara Limestone," that contains great quantities of water. At Richmond itself, however, and several miles to the west, the surface formation is composed of a fossil-bearing limestone and shale, which geologists know as the Richmond formation. The fossil-bearing limestone and shale contains few cracks, and little or no water can be obtained from them. At Richmond wells should be sunk in the deep deposits of gravel that occur at various places, as these gravels often contain a plentiful supply of good water. The work in Wayne county is part of a comprehensive investigation now being made of the underground waters of Indiana. As soon as practicable after the completion of the field work, a report will be published by the Survey, which will contain full information regarding the conditions affecting the occurrence of underground water. This report will be distributed free of charge.

CITY AND COUNTY

Deaths and Funerals.

MEYER—The funeral of Wm. D. Meyer will take place this afternoon at 2 o'clock sun time from the home 311 South Seventh street. Brief services will be held at the home by the Rev. Albert J. Feagar and after the interment at Lutheran cemetery.

FANNING—The funeral of Ella Fanning will take place Monday morning at 9 o'clock from St. Mary's church. The burial will be at St. Marys.

HARTZLER—The funeral of Henry Hartzler was held yesterday afternoon at the home 504 North 15th street. Rev. C. O. Shirey officiated. The burial was at Earlham.

HATFIELD—The funeral of John Hatfield was held yesterday afternoon from the home, 144 Ft. Wayne avenue, the Rev. I. M. Hughes officiating. Interment was at Earlham. The pall bearers were George Bishop, I. A. Gorman, Joseph Mills, Benj. Price, Charles Clawson and Henry Deuker.

Real Estate Transfers.

William Ferguson to Charles Wright lot 18 in Moffit add. to city, \$850.

Samuel Wolfe to Nathan Hawkins lot 44 in Fettes add. to city, \$1,800. Luella Gregg to Bernadina Rees part of lot 22 in McWhinney add to city, \$2,000.

Agnes Bradway to John Haustetter part of section 9 township 13, \$2,200.

Marriage Licenses.

Mary E. Taylor, 24 years and Thos. Ert, 30 years.

Mabel Brubaker, 34 years and Horace G. Clark, 33 years.

CLIFFORD KING IS NAMED

He Is to Get Appointment to Purdue Made Vacant by Resignation Everett Siekman.

Clifford King of Center township, was appointed by the County Commissioners yesterday to fill the vacancy at Purdue made vacant by the withdrawal of Everett Siekman. The former appointee. This appointment is an honor which is bestowed by the county on certain students who have made a creditable showing in their school work, and carries with it certain privileges free of charge for which other students have to pay.

THEIR TEACHING BASED ON BIBLE

Christian Scientists Reply to Attack on Them by Member of Friends.

THE WORK OF MRS. EDDY

IT IS SAID THAT SHE GAVE THREE YEARS OF HER LIFE TO THE SYSTEMATIC STUDY OF THE BIBLE.

A communication has been received by the Palladium from the headquarters of the Christian Science Churches at Indianapolis, taking exception to the utterances made by Thomas C. Brown, at the Western Yearly Meeting of Friends. Mr. Brown condemned Christian Science. The article in reply to him follows:

Editor the Palladium: In reporting the forty-ninth Western Yearly Meeting of the Friends' church in your issue of a recent date, Mr. Thomas C. Brown said: "Christian Science—and some other beliefs and disbeliefs in the inspiration of the Bible and miracles, is sapping the spiritual life of many of the members and weakening the others." It is barely possible that our good brother did not mean to include Christian Scientists among those who disbelieve "in the inspiration of the Bible," but the inference seems clear, inasmuch as he failed further to specify how Christian Science could possibly be "sapping the spiritual life of many members (of his own church presumably) and weakening others." It is a well known fact that a large percent of the Christian Science body are come from the various orthodox churches. It would be but just to infer therefore, out of consideration for their training in and along continued loyalty to these various churches, that these in seeking a new church connection would in so doing seek a denomination which laid greater stress upon the inspiration and authenticity of the Scriptures and which offered a higher, not a lower, standard of spirituality.

"The Bible of the Christian Scientist is the same as the Bible of his fathers and of all orthodox church members. The Bible is the basis of Mrs. Eddy's system of religious teaching. History records that Mrs. Eddy the discoverer and founder of Christian Science, and author of its textbook, Science and Health, with key to the scriptures, was in early girlhood, possessed of keen spiritual insight. As a girl she was wont to converse with her pastor on deep spiritual subjects and on many occasions broached subjects upon which he confessed himself unable to talk. After her discovery of the Christ method of healing disease in later years, she gave herself for three years to the exclusive and systematic study of the Bible, to ascertain if possible, the principle according to which Jesus did his 'mighty works.' As a result of this study and after years of actual practical testing of the truths of the system thus evolved for the healing of disease through spiritual means and without drugs, she gave to the world the above named textbook, which contains the whole of Christian Science. It is available at all public libraries and at Christian Science Reading Rooms in all towns of any considerable size, and its perusal is earnestly urged upon those who would be properly informed on the subject.

"Christian Scientists maintain and have proven in a degree in their experience as ministers of healing Truth to suffering humanity that the works of healing wrought by Jesus were not miraculous or the result of irregular interpositions of divine power, but the divinely natural results of a higher demonstration of divine or spiritual law, as capable of achievement today as then. Far from denying the wonderful works of our Saviour, Christian Scientists maintain a performance of similar works today incumbent upon professing followers of our Lord in proof of discipleship. 'The works that I do shall ye also do.'"

"Thanking you for your generous space, I am, very sincerely, 'Christian Science Publication Committee for Indiana.'

WORK OF DR. CHAPMAN.

Noted Evangelist Will Attack Sin of Lafayette—The Meetings to Begin October 23.

Lafayette, Ind., Oct. 6.—Lafayette will have the greatest religious awakening in many years this month when a trio of noted evangelists headed by Dr. J. Wilbur Chapman, will conduct a revival lasting ten days in which time every part of the city will be visited by the gospel workers and every home included in the campaign. The revival is one planned by the ministers of the Methodist Baptist and Christian churches and the city has been divided into three districts. The executive committee in charge of the revival, has been in existence for months and has been working night and day to perfect the arrangements for the movement. Plans are now practically completed and the revival will open October 23 with meetings in the three districts, a big street meeting and one for children.

Road Claims Light.

The County Commissioners considered road claims yesterday, which were covered by an allowance of about two hundred dollars. The claims are never so heavy in October as they are in the months coming before and after. Next month will be particularly heavy, owing to the preparations which will have to be made for winter.

COLD WINTER IS COMING THE SIGNS IN NATURE

Various Indications That the "Old Timers" Take to Mean That There Will be Plenty of Need for Fires During the Coming Season.

There are many signs that next winter, unlike last winter, will be unusually severe, in the first place there are bushels of nuts on the trees and bushes in the surrounding country. This is said to be the natural way of providing food for the birds and a big crop of nuts means a long and severe winter. This prediction is supported by the statement that the corn husks are much thicker this year than they have been for a long time while news comes from the mountain sections of Pennsylvania and West Virginia that there will be an enormous yield of acorns, chestnuts and other fruits of the forest upon which birds and beasts depend for food during the winter months.

Still another sign of a long and cruel winter is found in the activity of the barn mice. These little animals have already begun the work of building their nests and observers agree that they are making them this year unusually cozy and warm. Last year they seemed to give little attention to the building of their winter homes, but this year they are not only beginning to build them unusually early but are giving remarkable attention and care to their construction. All of which signs point to a severe winter, and there are many people who place as much confidence in these homely predictions as they do in the reports of the weather bureau.

THE CITY IN BRIEF

Water bills due Oct. 1. 27-10t

Geo. Baker of Middleboro, is very ill with typhoid fever.

Carpets cleaned at the Richmond Steam Laundry. 11

See how what you have heard looks in print and get a dollar for doing it. Win the news "tip" prize.

Water bills due Oct. 1. 27-10t

The work of laying the conduits for the Home Telephone Company, is attracting much attention about the city.

Yesterday was the nineteenth wedding anniversary of Mr. and Mrs. Maecellan White of Fountain City.

Miss Mollie Barefoot has resigned her position as assistant postmistress at Cambridge City.

Emmons Tailoring Co. are doing a big fall business, the fine suits they are making at \$15 and \$18 is a big advertisement for them.

The C. C. & L. has a slight wreck near Kewanna Friday afternoon, caused by a car being derailed.

Jesse P. Townsend, a prominent citizen of Whitewater, died yesterday afternoon after an illness of about two weeks. A wife and two children survive him. He was 64 years of age.

Fred Krone, the Great Sachem of the independent order of Red Men is in Indianapolis arranging for the State convention which will be held in that city October 16.

Mrs. Meadows and daughter Mrs. Hafer from Troy, O., are visiting H. E. Fornshell and family of North D street.

At a recent meeting of the State Board of Education, in Indianapolis it was decided to let the adoption of the phonetic system of spelling rest for some time and for further consideration.

Our cutter knows how to get style in a suit. We make fine suits at \$15 and \$18. Emmons Tailoring Co. 14

By the provisions of the will of Sophia Weishaupt, lately deceased, her husband, Albert Weishaupt, is to receive her entire estate. In case of his death the children are to receive the estate.

Walter S. Commons was yesterday appointed commissioner in the partition of estate of Henry and Amanda Shank, which was ordered by Judge Fox.

Have your store trimmings nicely plated at Richmond Mfg. Co., West Richmond. 7-2t.

Owing to the repairs which has to be made on the G. R. & I bridge at Rome City, the sluice gates in the lake there, will be opened Monday that the work can be done.

The Board of Public Works has warned the street car company time and again that they would have to remove their tracks from Glen Miller and lower their tracks on Fifth street, but as yet the company has paid no heed to the orders.

Cut Down on Lights.

The office of the Board of Public Works is swamped with petitions from various property owners, asking that electric lights be placed in many dark places. Heretofore the board has heeded many of these petitions and electric lights have been installed at various parts of the city, where they were needed. The present board has drawn a line, and they say that they will put in no more new lights only at places where they are absolutely necessary.

THE TRACTION MEN ARRANGE MEETING

Will Discuss Many Matters of Vital Interest to the Business.

COLUMBUS CONVENTION

EVERY TRACTION ROAD IN INDIANA WILL BE REPRESENTED—STANDARD EQUIPMENT IS DESIRED.

Officials of the Richmond Street & Interurban Company have special interest in three subjects that are down for discussion on the program of the annual convention of the American Street and Interurban Railway Association, to be held at Columbus, O., the week of October 15. One has to do with the charging of excess fare on limited cars; the second, with the traction freight service, and the third with a general standard for equipment.

The question of charging excess fare will be discussed by Harrie P. Clegg, president of the Dayton & Troy Electric Railway Company. It is known that Clegg will urge and abolition of the charge.

Question of Freight Business. The freight business of the traction lines will receive a hard blow from Col. E. C. Spring, general manager of the Dayton, Covington & Piquette Traction Company. He will undertake to show that electric lines are getting out of their own province in trying to build up a heavy freight business. Inasmuch as Colonel Spring is president of the Central Electric Railway Association, which includes all the lines of Indiana and Ohio and several of the lines of Michigan and Illinois

his utterances relative to the freight business will be awaited with interest by the traction officials of the middle west.

Standard Equipment Favored. The Central Electric Railway Association has already adopted resolutions favoring a standard equipment for all traction lines. This resolution was prepared by H. L. Evans, superintendent of motive power of the Indianapolis Traction and Terminal Company, who has membership on the special committee appointed by the American Street and Interurban Railway Association to investigate the subject. He will present the resolution to the major committee and urge its recommendation to the convention.

No More Smallpox.

Although there has been much excitement in the ranks of the patrons of the Whitewater school over the recent smallpox scare, no new cases have been reported to the city health office. All the children exposed to the plague were promptly taken care of and in most instances they were vaccinated.

The little daughter of Mr. and Mrs. James Frame, of 818 North 8th street who is at present confined at her home with the disease is rapidly improving and her case is not as serious as was thought at first.

The many friends of Mr. Albert Perks will be glad to know that he is improving nicely, after a very severe attack of Painters' Cholic. He was removed from his home to Reid Memorial Hospital to undergo an operation, but after some treatments he was saved from the operation. He also wishes to thank the nurses and his friends for the kindness shown during his illness.

Albert Perks.

Made Station Agent.

Charles M. Hoerner, formerly baggage agent at the north station of the C. C. & L. railroad, has been promoted to station agent at the South station. Mr. Hoerner has been in the company's service for a number of years and has shown himself to be a good custodian of their local affairs.

FULL CAR MICHIGAN Peaches MONDAY SURE.

Hassenbusch's.. 505 and 507 Main St.

It's Fuel that's Expensive—Not the Stove

A Cheap, putty-jointed stove will waste more than its Original Cost in Fuel every winter.

As you know, fully one-half the carbon available for heat in soft coal is gas—the entire gas supply used for fuel and illumination in many cities and towns being made from common soft coal. The ordinary stove in burning soft coal allows this gas-half of the fuel to pass up the chimney unburned, thus wasting it as a heat producer.

Cole's Original Hot Blast Stove, by means of the patented Hot Blast draft and other patented features, making air-tight joints without the use of stove putty, distills this gas from the upper surface of the coal, utilizing it as a heat producer along with the fixed carbon or coke in the coal, thus burning all the coal. This is why

Cole's Original Hot Blast

Saves the Dollars and makes a ton of common \$3.00 soft coal or lignite do the work of \$9.00 worth of hard coal.

Your old stove and imitation Hot Blast are not air-tight, do not save the escaping gases and do not give you a warm house at night, because they are made with putty joints. You cannot afford to say to yourself, "My old stove will have to do this winter." The old stove is eating up the price of a new stove every year. Not only that, but on top of the cost is the unsatisfactory result it gives. It is always out the coldest morning.

Even Heat Day and Night—Fire Never Out.

Cole's Hot Blast is so perfect in construction that fire will keep all night, and when the draft is opened in the morning will burn two or three hours with the fuel put in the night before. No other stove does this. Fire, therefore, never goes out, and the rooms are kept at an even temperature all the time. Burns hard coal, soft coal, slack, lignite or wood.

OUR GUARANTEE

- 1.—We guarantee a saving of one-third in fuel over any lower draft stove of the same size, when soft coal or slack.
- 2.—We guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with same heating surface.
- 3.—We guarantee that the rooms can be heated from one to two hours each morning, with the soft coal or hard coal put in the stove the evening before.
- 4.—We guarantee that the stove will hold fire with soft coal 24 hours without attention.
- 5.—We guarantee a uniform heat day and night, with soft coal, hard coal or lignite.
- 6.—We guarantee every stove to remain absolutely air-tight as long as used.
- 7.—We guarantee the feed door to be smoke and dust proof.

The above guarantee is made with the understanding that the stove be operated according to directions, and set up with a good fue.

For Hard Coal—Saves Half

The extent of unburned gases in hard coal is shown by opening the magazine cover of a base burner when the extra oxygen supplied fills the entire stove with flaming gas. The fact that no stove putty is used to make air-leaking joints, gives you perfect control over the drafts on Cole's Hot Blast. The slow, economical combustion, and the large, positive radiating surface make it the greatest fuel-saving, hard coal stove made.

Would You Lose \$50.00 in Fuel to Save \$1.00 on the Cost of Your Stove?

That is what you do when you buy a cheaply constructed, putty jointed, showy made imitation stove. Like all successful inventions, Cole's Original Hot Blast has many inferior imitations, avoid them. They all lack the patented features and careful construction, which make the Original Hot Blast a great success. They do not stay tight, and soon open seams and cracks which render them worthless as fire keepers. See the name "Cole's Hot Blast from Chicago" on the feed door. None genuine without it.

Just received a new line of Folding Beds. Prices from \$14.50 up to \$45.00. Room size Rugs from \$8.75 up to \$35.00. Ingrain Drug-gets \$3.75 to \$14.00. Look at our Automatic Bed Davenport, the best line ever shown in the city. We will make terms to suit you. Come in and see us.

Hassenbusch

505 and 507 Main St.
