## AN ADDRESS BY WATSON

To Speak at K. of P. Convention in Marion.

## BIG TIME IN PROSPECT.

Marion, Ind., March 20.—Big preparations are being made for the Seventh district convention of the Knights of Pythias to be held here Thursday. It is expected that fully 2,000 visiting knights will attend. The Marion lodge recently occupied its new home and is in position to welcome the visitors.

One of the features will be a street parade, led by the Kokomo Uniform Rank No. 6. A. L. Lawshe, recently appointed third assistant postmaster general, is one of the speakers, and Congressman James Watson also will be present. Morning, afternoon and evening sessions will be held.

Among those taking part on the afternoon program will be the Rev. W. E. Murray of Lafayette, the Hon. G. A. Osborn of Marion, District Deputy Chancellor F. A. Payne of Wabash, Grand Chancellor J. J. Monahan of Orleans, Ind., and Charles C. Smith of Wabash. The exemplification of the page rank in amplified form will be given by the Swayzee Lodge No. 451.

## FACTS FROM FRANCE.

There is in Paris a small theater for the deaf and dumb.

Up to the revolution of 1789 public executioners usually performed surgical operations in France.

M. de Vallier, who established a private penny post in Paris in 1853, is also said to have invented envelopes.

The largest theater in the world is the opera house in Paris. It covers three acres of ground, its cubic mass is 4,287,000 feet, and it cost 100,000,000 francs.

The financial position of the municipality of Paris was in a somewhat unsatisfactory state at the close of last year, and to meet the situation it is proposed to raise a loan of 315,000,000 francs (\$63,000,000), which will enable the municipality to undertake some important works that have long been considered necessary.

## Peach Trees For Planting.

In the matter of setting out peach trees the first essential is the tree. I want the largest tree of its age I can get. In the matter of trimming, our whole theory is to have a low headed tree, headed down rather than in. I do not want close heading, but a free circulation of air and plenty of sunshine. We have never used small trees. It always seemed to me that a good big tree, with a good root system, is capable of growing into a big tree.—Joseph Barton, New Jersey.

There is only one

"Bromo Quinine"

That is

Laxative Bromo Quinine.

Similarly named remedies sometimes deceive. This first and original Cold Tablet is a WHITE PACKAGE with black and red lettering, and bears the signature of

*E. W. Johnson*

## One Championship America Don't Hold

EMANUEL LASKER, WORLD'S CHESS CHAMPION.

The champion chess player of the world, Emanuel Lasker, is now in his thirty-ninth year. He was born in Prussia on Christmas eve, 1868. Herr Lasker began playing chess at the age of twelve, his brother being his instructor. At the age of twenty-one he first came into prominence by winning a tournament at Breslau without losing a game. He won the championship from the world famed Steinitz in 1894, a feat which was regarded as remarkable for so young a man. Lasker's list of victims at the chessboard is long and brilliant. He has made several visits to the United States, each time winning new laurels.

## In the World of Sport

LOCAL AND GENERAL.

### SEASON NEAR THE CLOSE

Only Little More Than Two Weeks for the Rollers.

MAY BE POLO NEXT YEAR.

Two weeks from Saturday night the skating season will close at the Coliseum. There has been the usual interest taken in roller skating this season and a most successful business has been done by the Richmond Athletic association. The roller skating craze seems to have come to Richmond to stay. In other cities the craze remains at fever heat for one or two seasons then dies completely out. For the past three years skating has attracted hundreds of local people and the indications are that the opening of the season on next Thanksgiving day will be as impatiently waited for as it was last year.

### Polo May Come Later.

There has been considerable talk of Richmond being in a fast roller polo league and the management of the Coliseum intimates that such a thing is possible. Richmond has been without polo for the past three years and it is certain that a revival of the sport in the city would be a popular move as polo was always the favorite winter sport of local people.

### Whitewater to Have Team.

Whitewater, Ind., March 20.—Whitewater will have a fast baseball team this season. There is much material here and steps will soon be taken to form an organization.

### THE HALL OF FAME.

Earl Grey, governor general of Canada, receives a salary of \$50,000 a year. Fifty-seven years ago Hon. Moses A. Safford was a page in the Maine house of representatives. He is now a member of the house.

William I. Cook, who is the dean of the newspaper fraternity in Baltimore, was seventy-six years old on Jan. 26. He was born in Chambersburg, Pa.

John H. Thompson is the oldest navy yard employee in the country. He took a position at the Portsmouth (N.H.) navy yard in 1854 and has remained there ever since, excepting a few years during the civil war.

Probably the only man in the United States to have a mahogany sidewalk in front of his residence is William H. Tripp of Janesville, Wis. The walk was made of the tierces of oil barrels shipped from the West Indies.

Vice President Fairbanks nearly always walks from his residence to the capitol and back and often, after dusk, goes for long strolls through the northwestern section of Washington. These tramps usually consume an hour or more, and Mr. Fairbanks rarely has a companion, preferring to be alone.

M. Toury, director of the Paris municipal police, had attended the rehearsal of "Julius Caesar." The murder of Shakespeare's hero disturbed his professional instinct. He said to a friend: "See here. There's a great error in this drama on the part of the police. Julius Caesar should have been protected."

The regents of the Smithsonian Institution filled the vacancy which has existed since the death of the secretary, Dr. Samuel P. Langley, on Feb. 27, last year, by the unanimous election of Charles Doolittle Walcott of New York, who for twelve years has been director of the United States geological survey.

Oscar Hammerstein, the New York theatrical manager, is as original in his business methods as in his theatrical enterprises. In spite of the extent of his undertakings, he has no system of bookkeeping. All that he does in that way is what his check book shows.

### A BIG JOB FOR WABASH

Michigan Wants to Meet the Little Giants.

ASKS A FOOTBALL DATE.

Crawfordsville, Ind., March 20.—The Little Giants, of Wabash college, have an invitation to meet the Hurry-up Yost's famous football aggregation on the gridiron this fall. Manager Baird of Michigan wired this morning, offering Wabash the choice of two dates, October 19 and November 9. The invitation is decidedly complimentary to Wabash, and if the schedule can be so arranged the Scarlet will accept the invitation. The only fear is that the proposed game will make the schedule too heavy for Coach Cayon's light team. Already they have games practically arranged with Illinois, Purdue, Indiana, Notre Dame and Vanderbilt. Five big games besides several games with the secondary state colleges, and it is questionable if Wabash could endure a sixth gruelling contest.

### WILL BE A BIG AFFAIR.

Rifle Shoot to Take Place at New Paris Thursday.

New Paris, Ohio, March 20.—The rifle shoot which is to be given here Thursday under the management of L. H. Reid, promises to be a big affair. This shoot will determine the championship between Ohio and Indiana.

New York has thirty-nine suburbs in New Jersey.

Thousands pass through his hands every week, and he never loses accurate knowledge of all his complicated business affairs.

### PLAYS AND PLAYERS.

Mr. Kloblauch has written a new play for H. B. Irving entitled "A Loyal Rebel."

David Belasco is writing a new play which is said to be intended for David Warfield.

Henry Arthur Jones is to write a play of modern life for Otis Skinner. The piece is to be produced next fall.

Kingsley Benedict, who has the leading role in Ned Wayburn's "Futurity Winners," is a native of Washington.

Henry W. Savage has added a fifth prima donna to the list of those engaged for the role of "Madam Butterfly."

Henry B. Irving and Miss Dorothy Baird, with the English company, closed their American tour in Boston recently.

Harold MacGrath, the novelist, is said to be writing a new play for Max Fabian, in which the latter is to be starred next season.

Mr. Sothern and Miss Mariow will give a series of performances of "When Knighthood Was in Flower" during their New York engagement.

Sir Charles Wyndham has abandoned his plans for an American tour this season. He is planning to try Hubert Henry Davies' new comedy, "The Moiluse," in London in the spring.

### Poultry Notes.

In sending dressed fowls to market it is very important to see that the animal heat is thoroughly cooled out before packing.

If the fowls get too fat, give them some grain not rich in carbohydrates. Oats as a single food will tend to lessen the fat.

Many fall with poultry because of trying to winter too many hens in small quarters. Hens that are crowded will not lay well.

Artificial gas, the 20th Century fuel.

## TEST WILL BE MADE OF THE NEW ENGINE

Turbine Is Now in Position at Municipal Lighting and Power Plant.

CAN DOUBLE BUSINESS.

NEW ENGINE IS OF THE LATEST PATTERN AND ALMOST DOUBLE THE CAPACITY OF THE RECIPROCATING ENGINES.

Friday and Saturday of this week a test will be made of the new turbine engine which has just been installed at the Municipal lighting and power plant. A large force of men is now engaged in getting this engine "ship-shape" and it is confidently expressed that the test will show the turbine can meet expectations.

### Can Double Business.

The completion of this engine means that the Municipal plant will be in shape to double its business and it is stated by the board of public works that about the first of April an active campaign for new business will be inaugurated. Rates will not be cut, but it is an assured fact that the Richmond Light, Heat & Power plant will be given the fight of its life.

"It is to be a locked-horn battle to the finish between the municipal plant and the Light, Heat & Power company and you can state that I do not think the city plant will be the one exterminated," remarked a city official.

### Is of the Latest Pattern.

The new turbine is of the latest pattern and is almost double the capacity of the two reciprocating engines which have been in operation at the plant since it first began business. The turbine takes up about one-third the space of one of the reciprocating engines and there is plenty of room left in the engine room of the plant to install two more turbines. The new engine is shaped somewhat like a bell.

### Will Overhaul Old Engine.

The board after the turbine begins operations will temporarily place out of commission one of the reciprocating engines so that it can be thoroughly overhauled. After needed repairs have been made on this engine the other reciprocating engine will be placed out of commission and overhauled. The board also plans to run the overhead railroad tracks over the coal room of the plant so that the contents of the coal cars can be dumped into the building.

Use artificial gas for light and heat.

### BETHEL, IND.

Bethel, Ind., March 20.—Mrs. Amanda Hunt, of Fountain City was visiting with Mr. and Mrs. N. E. Davis Tuesday.

John Davis and Francis Hyde have the measles.

### For a Pleasurable Physic

Take Blackburn's Castor-Oil-Pills. Perfect physic, tonic and purifier. Sweet and little. 10c, 25c, \$1.00, Druggists.

## MOTHERS VICTOR BREAD

In them is used a little more care in selecting material. Just a little more skill in blending the ingredients. Just a little more attention paid to the baking—all of which insures the most perfect bread on the market.

Try them and be convinced.
