### A MYSTERIOUS CARD.

Mark Twain's Odd Request and How Mrs. Cleveland Received It.

When I was leaving Hartford for Washington upon one occasion my wife said: "I have written a small warning and put it in a pocket of your dress vest. When you are dressing to go to the authors' reception at the White House you will naturally put your fingers in your vest pocket, according to your custom, and you will find that little note there. Read it carefully and do as it tells you. I cannot be with you, and so I delegate my sentry duties to this little note. If I should give you the warning by word of mouth now it would pass from your head and be forgotten in a few minutes."

It was President Cleveland's first term. I had never seen his wife, the young, the beautiful, the good hearted, the sympathetic, the fascinating. Sure enough, just as I had finished dressing to go to the White House, I found that little note, which I had long ago forgotten. It was a grave little note, a serious little note, like its writer, but it made me laugh. Livy's gentle gravities often produced that effect upon me where the expert humorist's best joke would have failed, for I do not laugh easily.

When we reached the White House and I was shaking hands with the president he started to say something, but I interrupted him and said: "If your excellency will excuse me I will come back in a moment, but now I have a very important matter to attend to, and it must be attended to at once."

I turned to Mrs. Cleveland, the young, the beautiful, the fascinating, and gave her my card, on the back of which I had written "He didn't," and I asked her to sign her name below those words.

She said: "He didn't? He didn't what?"

"Oh," I said, "never mind! We cannot stop to discuss that now. This is urgent. Won't you please sign your name?" I handed her a fountain pen.

"Why," she said, "I cannot commit myself in that way. Who is it that didn't? And what is it that he didn't?"

"Oh," I said, "time is flying, flying, flying! Won't you take me out of my distress and sign your name to it? It's all right. I give you my word it's all right."

She looked nonplused, but hesitatingly and mechanically she took the pen and said:

"I will sign it. I will take the risk. But you must tell me all about it right afterward, so that you can be arrested before you get out of the house in case there should be anything criminal about this."

Then she signed, and I handed her Mrs. Clemens' note, which was very brief, very simple and to the point. It said, "Don't wear your arcles in the White House." It made her shout, and at my request she summoned a messenger, and we sent that card at once to the mail on its way to Mrs. Clemens in Hartford.—Mark Twain's Autobiography in North American Review.

### Water in Old London.

London's original water supply, says the Chicago Daily News, was the river Thames, and every apprentice was supplied with a water tankard for transporting liquid to the house. As early as 1479 there were "water thieves," for in this year a wench chandler in Fleet street had by craft perced a pipe of the conduit with a needle, and so conveyed the water into his cellar; wherefore he was judged to ride through the city with a condit upon his head. The first official water supply for London was made in Germany. In 1582 Peter Maurice, a German, made an engine at London bridge by which water was conveyed in lead pipes to the citizens' houses, and he and his descendants became rich on the proceeds.

### Christmas Island.

"I spent last Christmas on Christmas Island," said a globe trotter. "In the morning I bathed in the sea and in the afternoon, dressed in white flannel, I played tennis. Christmas Island is in the Indian ocean. It is always summer there. The thermometer never falls below 70 and never rises above 90 in the shade. There's always a cool, pure wind from the southeast. Fresh fruit and flowers and vegetables are as plentiful in January as in July. This little paradise is nine miles long and ten miles wide."

### Treating the Insane.

In 1796 William Tuke, a Quaker, opened the first national asylum for the insane in York, England. A few years earlier a Frenchman named Pinel had made a similar effort to restore the mentally deficient to the rank of human beings. Pinel's plan was that of nonrestraint, a system then unheard of and, of course, to be ridiculed as a preposterous heresy. It is now being followed everywhere.

### Her Plan.

He—Do you believe in long engagements? She—It all depends. He—I don't understand. She—if he has plenty of money and is inclined to be liberal a long engagement is the thing, but if he cannot afford boxes at the opera and such things I always make his regime very short.

### Countering a Touch.

"Don't you think you're wasting your time talking the value of economy to Blank? He hasn't any money."

### There are stars so distant that a flying machine moving at the rate of 500 miles an hour would require 500,000,000 years to reach them.

### HERE IS RELIEF FOR WOMEN.

If you have pains in the back, urinary, bladder or kidney trouble, and want a certain, pleasant herb cure for woman's ills, try Mother Gray's Australian Leaf. It is a safe and never-failing monthly regulator. At Drugists or by mail 50 cts. Sample package FREE. Address, The Mother Gray Co., LeRoy, N. Y.

Leaving Richmond 11:15 p. m. via C. & L. lands you in Chicago at 7:00 a. m. Through sleepers and coaches. You will like it. apr-17

### EDMUND KEAN.

To See Him Act Was Like Reading Shakespeare by Lightning.

Before the third century after the birth of Shakespeare had reached its first quarter there was born in England to a stage carpenter and a strolling actress a child destined to grapple with the poet's highest thought and interpret it with a vividness that to this day stands unrivaled. Coleridge's terse comment, that to see him act was reading Shakespeare by lightning, reveals him with the fullness of a volume. Edmund Kean, along with most people early trained to an art, had little if any education of the schools. He was when a boy provided with instruction by some benevolent people whom his smartness and beauty attracted, but he rebelled against the tasks of study and went to sea. But life there was too rough for his fine nature. He returned to England and at the age of seven began the study of Shakespeare's characters with his Uncle Moses. This he continued with an actress named Tiddswell, who taught him, besides, as well as she knew, the principles of her art.

At an early age he had the credit of originality so surprising as even then to challenge the supremacy of Philip Kemble. At fourteen he played Hamlet. King George had him recite at Windsor castle, and it is said this incident led some gentlemen to send him to Eton, but there is no record of it. At twenty he was in a provincial troop, a member of which he married, and for six years thereafter, until his glorious night at Drury Lane, his life was one of hardship, struggle, obscurity, but, thanks to the faith in himself, not hopeless. His London debut was made at twenty-eight. He had fought for it hard and long and would then have missed it but for the falling reputation of the theater. London debuts in first roles are not easy for provincial actors, and none knew better how hard they are to get than Henry Irving. Kean seems to have been at his full splendor and made a hit. After that his habits were altogether prejudicial to the refinement of taste or the acquisition of knowledge.

By breaking open rotten logs one can find in midwinter the grubs or larvae of many of the wood boring beetles, and beneath logs and stones near the margins of ponds and brooks hordes of the maggots or larvae of certain kinds of flies may often be found huddled together in great masses. The larvae of a few butterflies also live over winter beneath chips or bunches of leaves near the roots of their food plant or in webs of their own construction, which are woven on the stems close to the buds whose expanding leaves will furnish them their first meal in spring.

### A TREE OF ILL REPUTE.

The Fresh Juice of the Upas Acts as a Deadly Poison.  
An evil reputation has long been

borne by the upas tree, Antiaris toxicaria, which grows in Borneo and other East Indian islands. It is still a common belief that birds flying within the influence of its poisonous vapors instantly perish and that it is fatal for animals or men to rest beneath its shade. It resembles certain rhus plants (like the poison ivy) in emitting a volatile substance which affects the skins of certain susceptible persons, though others are unaffected. The sap is very poisonous and is the chief substance used by the Dyaks of Borneo for poisoning the tips of their darts.

In this process an incision is made in the bark of the tree and the milky exudation collected on a palm leaf and dried first in the sun and then over a fire until a thick brown mass is left. In this state it can be kept without deteriorating, and when required for use it is made into a thin paste with the juice of "tuba" root, which is used to stupefy fish, or with tobacco or lemon juice, and the ends of the darts dipped into the mixture and dried. These darts are made from the middle stem of the palm leaf and are about six or eight inches in length and of about the thickness of a knitting needle.

They are used with a wooden sumpitan, or blowpipe, which is about seven or eight feet in length and has an internal diameter of about one-quarter inch. A bird struck by one of these little darts is instantly killed, and a pig dies in about twenty minutes. The fresh juice of the upas tree, whether swallowed or injected into the blood, acts as a violent poison, causing convulsions and death.—Chicago News.

### LATENT ACIDS.

By breaking open rotten logs one can find in midwinter the grubs or larvae of many of the wood boring beetles, and beneath logs and stones near the margins of ponds and brooks hordes of the maggots or larvae of certain kinds of flies may often be found huddled together in great masses. The larvae of a few butterflies also live over winter beneath chips or bunches of leaves near the roots of their food plant or in webs of their own construction, which are woven on the stems close to the buds whose expanding leaves will furnish them their first meal in spring.

### AN EVEN BREAK ON THEIR TRIP ABROAD

Jessup's Rejuvenated Ramblers Return to Their Own With Good Record.

### ONE GAME WAS STOLEN.

FIRST GAME WITH KOKOMO TAKEN BY THAT OUTFIT WITH THE HELP OF A BENCH WARMING UMPIRE.

Jessup's Rejuvenated Ramblers have returned to their own with the splendid record of two victories out of four games played. It should have been three out of four, as the first game with the Kokomo outfit was a deliberate robbery, perpetrated by a bench warming player who attempted a role of umpire. Thursday the Quakers romped under the wire a 7 to 2 winner with Old Meadowbrook Fleming acting as pilot. It was the Virginian's second victory on the trip. In other words Meddy pitched both games the locals won on the road. The little fellow was touched up for nine hits Thursday, but he only allowed the Wildcats to bunch them in the second, when Kokomo's only two tallies were eased over the plate.

Reader, we tried very hard to furnish you with a box score of the Thursday game, but owing to the fact that none of the Kokomo literary men seem to know what a box score is, our attempt proved fruitless. We gave up with a violent headache after wearing out one long distance phone line and giving three telegraph operators the writers' cramp. We bulldozed a box score out of the official score keeper at Kokomo Thursday, when we reproduced a box score of the Wednesday game. Today we were informed that the O. S. K. had gone into hiding.

This afternoon the locals are engaged in a hot argument at Athletic park with the Dunkirk outfit, which recently attached the wash boiler to Mr. B. Durham and associates of the Portland team. Mr. T. Fisher, one of the personal belongings of the Evansville Central league team, is dispensing the slurs for the locals. Manager Jessup states that he intends to make it two straight from Dunkirk. Moore will work Saturday and Sunday Fleming will be slicked. Atkins Saw Works team of Indianapolis. He will be opposed by Milan, who pitched two

excellent games for the Quakers early in the season. Score of Thursday's game at Kokomo:  
Richmond . . . 1 4 0 1 0 1 0 0 0—7 9 4  
Kokomo . . . 0 2 0 0 0 0 0 0 0—2 9 3  
Batteries—Fleming and Jessup; Laxey, Grimes and Orr.  
Umpire—Anderson.  
Attendance—400.

#### FRANKFORT BEATS GIANTS.

Frankfort, Ind., June 28.—The Louisville Giants were defeated again by Frankfort Thursday in a fast and interesting game. The colored men failed to get a score, due to the effective pitching of Boyd and Mallicoat, and the splendid team work of the locals. This is seven straight victories for Frankfort, four of them shutouts.

#### COLIC AND DIARRHOEA.

Pains in the stomach, colic and diarrhoea are quickly relieved by the use of Chamberlain's Colic, Cholera and Diarrhoea Remedy. For sale by A. G. Luker & Co.

### CANTON BEATS BLUFFTON.

A Misplay Gave the Central Leaguers The Game.

Bluffton, Ind., June 28.—The Canton Central Leaguers defeated Bluffton Thursday in an evenly fought game, in which Hull, Bluffton's 18-year-old pitcher held his own with the leaguers. An error gave Canton their last and winning run. Score:  
Canton . . . 0 0 0 1 0 0 1 1 0—3 8 2  
Bluffton . . . 0 0 0 0 0 0 0 0—2 7 2  
Batteries—Carroll and Texter; Hull and Vogel.

### PRACTICALLY ASSURED

Is the Interchangeable Switch, Says E. M. Haas.

In an interview this morning, Mr. E. M. Haas, secretary of the Commercial Club, said:  
With the interchange switch between the two railroads practically assured, it should largely enhance the value of real estate in the south part of the city. Heretofore the factory sites, even though offered free, are not desirable as it required cartage for two miles to reach the principal freight stations. All new factories will be attracted to this locality when all freight facilities are available. Sites along the Pa. line are very high and practically all taken. I would regard property in the Beallview Addition as a very good buy.

### WON FRESHMAN RACE.

New Haven, June 28.—Harvard won the freshman race and Yale won the four-oared contest.

### LEBANON DEFEATS FLORA.

Lebanon, Ind., June 28.—Lebanon outclassed Flora Thursday, winning 10 to 0. The Lebanon team put up a star game at the bat, securing five doubles out of thirteen hits. Cannon, who joined Lebanon today, pitched a fine game.

### Let us eat, drink and be merry.

With never a thought of ache or pain.

Let us forget every sorrow that might be.

For we still have Rocky Mountain Tea.

### "He Was Peekin'."

When the minister came to take dinner with the family he was requested to ask the blessing. While doing so he bowed his head and slightly and half closed his eyes. This latter fact caused the old gentleman's eyelids to quiver. Little Charlie, who sat just opposite him, earnestly noted this. At the most impressive moment of the most uttered prayer the large gathering around the table was startled at hearing Charlie say to his mother in an intense whisper: "Look, mamma, he's peekin'; he's peekin'!"—Chicago Tribune.

It goes to the root of disease, invigorates, strengthens, exhilarates. Its life-producing properties are not contained in any other known remedy. Hollister's Rocky Mountain Tea. Tea or Tablets, 35 cents. A. G. Luker & Co.
