

A CONTAGION WARD WILL BE PROVIDED

Site for Such at Reid Memorial Hospital Will Be Chosen Saturday

IS NOT FOR SMALLPOX.

CASES OF THAT NATURE WILL STILL BE CARED FOR AT THE PEST HOUSE WEST OF THE CITY.

The Reid Memorial hospital board has decided to add a contagious ward to the hospital and Saturday will select the site for the building. A committee composed of John L. Rupe, Henry Deuker, George Eggemeyer, Dr. T. Henry Davis and Dr. J. M. Wampler, and Architect Kaufman will make a visit to the hospital for the purpose of determining where the ward shall go. If found practical, the barn and residence building now occupied by the hospital janitor, may be used for the contagion ward. In case that it is utilized, the entire inside structure will be torn away and nothing left but the stone walls. Sheds now built against the structure will also be taken away, leaving nothing to indicate that the building was ever a barn. The building will be entirely disinfected if it is used.

The barn is located at a very desirable point, being near enough to the main hospital building to permit of it being heated by the central heating plant and being easily accessible from the driveway. It is desired that the contagion ward be completed as soon as possible and work will begin on it upon the completion of plans. The exact cost is not known. The board desires to be as economical as possible and to build the ward with the money which the city sets aside for hospital purposes.

The building will be in no sense a pest house. No smallpox patients will be taken to it, the ward being confined to the treatment of those afflicted with scarlet fever, diphtheria, typhoid fever and such. What is known as the pest house west of the city, will be used for small pox patients after the new ward is done.

HARRY PARKS' SPEEDY RECOVERY IS EXPECTED.

He Underwent a Serious Surgical Operation at the Deaconess Hospital.

Elkhorn Mills, Ind., Sept. 6.—Harry Parks returned home Sunday very much improved in health. Mr. Parks has been absent for more than ten weeks taking medical treatment and finally underwent a dangerous surgical operation at the Deaconess Hospital at Indianapolis. He is so much improved that hope is entertained for his speedy and complete recovery.

Two Ladies Visit One Stone.

The late W. E. Gladstone was not a figure who suggested humor, unless it was to his great rival, Disraeli, who once described him as "a sophisticated rhetorician, intoxicated with the exuberance of his own verbosity," but there was humor in his comment when his house in Harley street was attacked one Sunday by thousands of workmen, who were only driven off by a double line of mounted police. Gladstone gazed upon the debris of his hall and then remarked wistfully that "the mob has broken the Sabbath."—Bellman.

The phrase "Dear me!" is a corruption of the Spanish "Ay de mi!" It was adopted in England about the time of James I.

ANIMAL EPICURES.

The Crab Eating Raccoon and Peculiar Crustacean Taste.

What made the crab eating raccoon first take to his queer diet? The question is suggested by a specimen of this strange animal which has arrived at the menagerie and will be happy to oblige any generous visitor with an illustration of the quickest way to kill, unshell and swallow a crustacean without artificial assistance of any kind. Doubtless the peculiarity originated in the shore frequenting habits of the species, and, being a delicate feeder, the succulence of the crab, once cracked, was an obvious inducement to renew his acquaintance on every possible occasion. Originally probably a fruit eater, the raccoon is inquisitive and dainty, both strong incentives to experiments in diet. When an individual sees a small object he does not understand, his actions fall under three headings. He first puts the article to close scrutiny, both with his eyes and that supercilious upturned nose of his; then he takes it away and washes it—a very characteristic action of this water loving animal—and finally puts it to the grand test of edibility or otherwise. If it appears unpalatable, he gives it to his wife. In this way it is easy to imagine how the crab loving coon, wearying of too much fruit, made his first crab supper and, though he has never been able to add a squeeze of lemon or brown bread and butter to the repast, has become a confirmed lover of crustacea ever since. All creatures make experiments of the sort and occasionally carry them on until they become a fixed habit, and their whole structure is modified in accordance. Nature, for instance, never intended the osprey to live on fish. It was the temptation of an old world trout in difficulties in the shallows that first led the great hawk astray. Some small Brazilian monkeys, again, live almost exclusively on birds' eggs, an Australian parrot has given up a proper vegetarian diet for an exclusive regimen of mutton, and many other instances of the same unorthodox appetites might be cited.—London Globe.

STUNNING A TIGER.

The Punishment of a Man Eater That Killed a Tibetan.

Fifty years ago tigers were very common even in the high hills of western Tibet, writes C. A. Shorring in his account of that country. At the present time, however, owing to the increase of population and the general spread of cultivation, they have become rare, and the appearance of a man eater who carried off a poor old woman of the slope of Chila created consternation.

On the following day there were gathered together a hundred grim men, armed only with axes and stones, for they had not a gun among them.

Fortune favored the brave, for the tiger was found asleep under a rock. At once each man dropped silently into the cover of the brushwood and piled a heap of stones near to his hand, while one of the most trusted of the party was commissioned to stalk to the top of the rock and drop a huge stone on the sleeping brute.

So well was the work done that the stone fell true on the tiger's back, and immediately, with a roar, the wounded beast sprang up and, seeing his enemies, who leaped from their cover, charged the line.

But a hundred men, desperate as to consequences, throwing stones with might and main, are not to be awed or turned from their purpose lightly. The stones broke the tiger's teeth and went into his mouth, and his body soon became a mass of wounds.

Turning, he tried to escape and took his pursuers up hill for a mile, but wherever he paused and whatever he did he could not escape the pitiless rain of missiles. The blow on his back, first given, effectively checked his speed, and finally, worn out, he came to bay under a great cliff.

The rest was easy. He was immediately hemmed in, and the stones were showered on him thicker than ever and hurled with redoubled energy. As he sank down the villagers rushed in and dispatched him with their axes.—Youth's Companion.

Prof. D. R. Ellabarger has returned from a month's trip in the west. Prof. Ellabarger is very enthusiastic over possibilities in the western section of the United States.

"In the Days of Scott" there are two anecdotes about Sir Walter Scott's children in connection with his poem, "The Lady of the Lake." One day his daughter was met by James Ballantyne, the publisher, in her father's library and asked what she thought of the poem. She replied that she had not read it and added: "Papa says there is nothing so bad for young people as reading bad poetry."

Scott's son Walter returned from school one day with evidences of having been engaged in a fight. His father asked him what he had been fighting about. He replied that he had been called a "lassie" and had resented it. A little questioning showed that young Walter's schoolfellows had nicknamed him "The Lady of the Lake," which name the boy did not understand except as a reproach to his manliness.

SCARCITY OF FRUIT IS WORST IN YEARS

Kinds Suitable to Can Can Hardly Be Had.

PACKERS UP AGAINST IT.

According to a Main street groceryman, there has never been a year, since he started in business that fruit to can has been as scarce as this year. There is fruit of all kinds on the market, but not enough of it to permit the ordinary housewives to can it for winter use. The backward spring and unsatisfactory weather since that time are given as reasons for the scarcity.

Wholesale fruit packing houses in letters to local dealers say they will not be able to fill all their orders this year. One big packing house writes a local dealer that it is the worst year in its existence of sixty years. The letter stated that it had often occurred that one section would fail to produce its usual crop, but this had generally been offset by the over supply from another source. No section has turned out a full crop this season, however.

SIX HUNDRED HEAR THE JUVENILE BAND

Marvelous Organization From Salt Lake City at the Coliseum.

JUDGE BROWN'S ADDRESS.

HE WAS INTRODUCED BY TIMOTHY NICHOLSON WHO PAID MR. BROWN A WARM TRIBUTE—ELKS PLAY HOSTS.

Judge Brown and his juvenile band from Salt Lake City, entertained an audience of 600 persons in the coliseum Thursday night, and were enthusiastically received. The band is a marvelous organization. It is not of the conventional juvenile type, its renditions being on a par with many of the "big" bands of the country.

Under the efficient directorship of Prof. Christensen, of Salt Lake City, the thirty-five boys have not only mastered their instruments, but they show rare skill in the interpretation of music, and play some of the most difficult of the standard classical band music with a style that classes them as artists. The entire program last night was enjoyable and each number was applauded with such warmth as to leave no doubt of the sincerity and sympathy of the audience.

Judge Brown made an address relative to juvenile court work in general and "boy-saving" in particular, and the effort was characteristic, being full of wisdom interspersed with sparkling wit drawn from the experiences of Judge Brown with boys. Timothy Nicholson, of Richmond, a member of the state board of charities, who has had personal knowledge of the great work done by Judge Brown, introduced the speaker and paid him a warm tribute. Following the concert in the coliseum, the band boys were taken in tow by members of Richmond lodge of Elks and a luncheon served them.

Thirty-five all steel cars for the passenger equipment of the Pennsylvania railroad are now being built at the Altoona car shops. Seventeen are seventy-foot postal cars. Two are sixty-foot baggage cars, six are passenger coaches, five of which are seventy feet long, and ten are seventy-foot diners. In designing these cars great care was exercised to use all the valuable properties of the material. The designs have not merely been made by substituting mechanically a steel piece for each wooden piece in the former cars. Nowhere is the result of this process better shown than in the new steel trucks for they do not look anything like their wooden predecessors. They are stronger, however, and yet each six-wheel truck weighs only 19,500 pounds, while the six-wheel wooden truck weighed 21,700 pounds.—Wall Street Journal.

In Salisbury cathedral a few days ago Ambassador Reid unveiled a handsome marble tablet in memory of those killed a year ago, when by the wrecking of the American line boat train twenty-eight persons, mostly Americans lost their lives. The body of the tablet is of light yellow Sienna marble. It is surmounted by an alabaster pediment with a plain Greek cross. The pediment is held up by two pillars. On the right is an angel of white statuary marble, holding in her arms a figure of America. On the left is a similar angel holding a figure of the United Kingdom in her arms. The center piece is filled with a suitable inscription and the names of the victims.
