

NEW TELEGRAPH CO. TO ENTER THE FIELD

Will Be Strong Competitor of
The Western Union and
The Postal.

ALSO REDUCE THE COST.

MESSAGES MAY BE SENT FOR
ONE CENT PER WORD—PLAN
FOR THE ENTERPRISE IS MADE
PUBLIC.

Chicago, Sept. 7.—The American Union Telegraph company, which promises to become a strong competitor of the Western Union and Postal Telegraph companies in the telegraph business, will open an office in Chicago in two weeks, according to L. E. Davis, president of the Rock Island Construction company. The capital stock of the new company will be \$5,000,000. It will be incorporated under the laws of New Jersey or Maine, but the headquarters will be in Chicago.

"Wealthy capitalists of St. Louis, New York and Chicago, are interested in the new company," said Mr. Davis today. "I cannot give you their names now, but in a few days I will be able to do so."

J. P. Hornday, 20 William street, New York, is looking after the interests of the new company in that city. We have secured options on the wires of four telephone companies and 100,000 miles of telephone wires are available for use now in the East, West and a large portion of the South.

To Utilize Telephone Wires.

We propose to construct, equip and operate standard telegraph lines throughout the United States, also to lease and otherwise acquire local and through telephone wires and use them for the transmission of our telegraphic business and will construct new lines along the public highways and over the rights-of-way of local and through electric railway lines.

By the use of our proposed new instruments we will be able to transmit telegraph messages over local and through telephone wires without interrupting or anyway interfering with the telephone service, thereby greatly increasing the earning capacity of the local and general telephone companies and reducing the cost of operating and filling with any other telegraph company. We expect to greatly reduce the cost of telegraphing and our experts have convinced us that we can reduce the cost from 25¢ for ten words to local points, as charged by other companies, to 1 cent per word for messages of ten words, not counting signature or address."

NOT MUCH IN PRICE, BUT
MUCH FOR SERVICE.

One Lot of Ladies', Misses' and
Children's Coats, especially adapted
for Fall Wear were put on sale today
at \$1.98 each. Knollenberg's Store.

PRESBYTERY IN SESSION.

Kingston is Entertaining Whitewater
Ministers for Two Days.

Kingston, Ind., Sept. 9.—The Presbytery of Whitewater is holding its stated meeting at the Presbyterian church today and Tuesday. The opening sermon was delivered today by the Rev. William Carson, the retiring moderator. The election of moderator and temporary clerk will also be held today.

Tuesday the election of the stated clerk and treasurer will be held. At 7:30 o'clock a popular meeting will be held, the principal address to be delivered by the Rev. Owen Davies Odell of the Second Presbyterian church, Indianapolis.

Mrs. Benjamin Hadley returned Friday from a visit with friends at Richmond.—Noblesville, Ind., Ledger.

The Sunrise Of Life.
Infants and children are constantly needing a laxative. It is important to know what to give them. There is no better laxative than White Lead. It is strong enough for salts, purgative waters or cathartic pills, powders or tablets. Give them a mild, pleasant, gentle, laxative tonic like Dr. Caldwell's White Lead. Price 25¢ per pound. This is the sum of 50 cents or \$1 at drug stores. It is the one great remedy for you to have in the house to give children when they need it.

DOES NOT CARE FOR THE SOCIAL BUTTERFLY LIFE.

Latest picture of Mrs. William E. Corey, former Mabelle Gillman, wife of the steel trust President, who in a recent interview said: "I do not care for social butterfly life. My music and

home are much more to me than so-

ciety. Mr. Corey and I have learned not to concern ourselves with false rumors, but to live our own lives quietly, regardless of what others may say."

Vienna's Strange Relic That Defied the
World's Locksmiths.

In 1810 a blacksmith went to Vienna and locked an iron band around a tree with a padlock. What he did with the key no one knows to this day. There is a mythical legend to the effect that he carelessly threw it into the air and that it never came down again. At any rate, the key could not be found, and the Austrian government offered a prize of 500 ducats to any one who could make a key that would turn the bolt in the lock without breaking it.

Many have tried to win the prize, but nobody has won it. Eventually it became the practice among the contestants to drive a nail in the tree and the heads of some of the nails bear the initials of those who drove them.

The practice of driving nails into the tree sealed its fate. The lower part of the tree in a few years assumed the appearance of a solid mass of iron. One spring the leaves failed to come out, and later a summer storm blew the top away.

The historic stump was cut off and placed on a pedestal on one of the prominent street corners in Vienna. At the same time the iron band was cut in two and put around the stump to hold it in its niche, leaving the padlock in its original position. And there the old stump stands to this day an object both of the curiosity of tourists and the veneration of the residents of Vienna. Incidentally, a street, Stock im Eisen—"Stick in Iron"—has been named after the stump.—Scrap Book.

ANTIQUITY OF GEOMETRY.

The Science May Have Existed In
India For Long Ages.

Did we learn our rule of three and our Euclid from India? Researches have brought to light astronomical tables in India which must have been constructed by the principles of geometry. Some are of the opinion that they have been framed from observations made not less than 3,000 years before the Christian era, and if this opinion be well founded the science of geometry must have been cultivated in India to a considerable extent long before the period assigned to its origin in the west, so that many of the elementary propositions may have been brought from India to Greece.

The Indians have a treatise called the "Surya Siddhanta," which professes to be a revelation from heaven communicated to Meya, a man of great sanctity, about 4,000,000 years ago. This book contains a rational system of trigonometry which differs entirely from the first known in Greece and Arabia. In fact, it is founded on a geometrical theorem which was not known to the geometers of Europe before the time of Vieta, about 200 years ago. And it employs methods of demonstration unknown to the Greeks, who used others. The former have been attributed to the Arabs, but it is possible they have received this improvement in trigonometry as well as the numerical characters from India.—London Spectator.

a society woman of prominence equal
to her own, shall be made public.

EXPRESS COMPANIES' HEARING POSTPONED

Indiana Railroad Commission
Has Delayed It.

ANSWER INTERROGATORIES.

Because of pressure of business pertaining to other matters pending before the Indiana Railroad commission, the hearing which was to have been given the express companies doing business in Indiana, Sept. 12, relative to alleged discriminations with which they are charged, and regarding their rates and practices, has been continued by the commission until Sept. 18. The commission recently sent out a number of interrogatories for information, which the companies are expected to furnish on the day of the hearing. The indications are that the companies will resist the efforts of the commission to inquire into the state of their capitalization.

EPILEPTIC VILLAGE OPENS.

New Asylum Will Begin to Receive
Patients Soon.

New Castle, Ind., Sept. 9.—Superintendent Van Nuy of the state epileptic village, north of this city, expects to receive the first patients for the institution within the next two weeks. Two weeks have now elapsed since the Governor issued his proclamation declaring the Indiana epileptic village open, and it is expected to begin receiving patients soon.

BIG BARGAIN.

(Eton Jackets) were put on sale to-
day at \$5.00. Knollenberg's Store.

INVOLVED IN A FIGHT.

Paul Nation and Herman Brown Fined
At Eaton.

Eaton, O., Sept. 9—Paul Nation of Eaton and Herman Brown of West Alexandria, became involved in a fight on Main street, Saturday evening and were before Mayor Craig Sunday morning, each receiving a fine of \$4 and costs, amounting in the aggregate to \$7.50 each. Both paid.

AVERAGED 35 BUSHELS.

Splendid Yield of Wheat Reported in
Washington Township.

Milton, Ind., Sept. 9—Harry Sowers, east of town, had one field of wheat that averaged 35 bushels per acre. The other fields averaged about 24 bushels per acre. These are the best averages in eastern Washington township.

The report of the Insurance Committee of the American Bar Association, at its recent meeting in Portland, Maine, condemns the present disposition to legislate against insurance companies, saying that some laws intended to be supervisory are really destructive in their tendency.

Endurance or Migrating Birds.

The vigor and endurance that birds display upon the wing are astonishing. Nearly all the migratory species of Europe must cross the Mediterranean without resting. The little bluebird pays an annual visit to the Bermudas, 900 miles from the continent, and Wilson estimated its very moderate flight at more than a mile a minute. Remarkable stories are told of the long flights of tame falcons, one going 1,300 miles in a single day. Jewel mentions carrier pigeons that flew from Rouen to Ghent, 150 miles, in an hour and a half, and a certain warbler must wing its way from Egypt to the Baltic, 1,200 miles, in one night.

Bodily Proportions.

In the man of average stature the height of the body is ten times the length of the face, the face from the chin to the hair is as long as the hand, the arm is four times the length of the face, the sole of the foot is one-sixth the length of the body, and six times the thickness of the hand in the thickest part equals the thickness of the body.

Discretion.

He (to servant)—I understand that you have dared to drive my automobile during my absence. Servant—Don't be vexed, sir. I was very careful. I ran over two persons, but they were very old.—Jugend.
