

BORN DICTATOR IS WAY PARIS PAPER DESCRIBES TEDDY

Comment on President's Action in Suspending the Pilot Of Boat Who Placed Life in Danger.

RESEMBLANCE TO KAISER GROWS MORE STRIKING.

Results of the Last Census Show That France Has a Population Approximating 40,000,000.

(By Raoul de Saint Rene.)
Paris, Oct. 12.—The Paris papers have commented a great deal on President Roosevelt's letter "directing" that the pilot or master of the Mississippi steamboat be suspended for ninety days for placing "Le Roi Theodore's" life in danger.

One of our most well known papers said editorially:

That President Roosevelt is a born dictator we never doubted, and as he grows older in years and power his resemblance to the Kaiser grows even more striking.

Should Roosevelt remain in power for another four years we would not be surprised to hear of "these majestes" trials, after the most approved German pattern.

The American president's action in immediately ordering the suspension of a man untried, and whose guilt is very doubtful, is characteristic of the popular American dictator.

The Czar of Russia's yacht ran upon a reef on the coast of Finland some weeks ago and still we have not heard that the captain of that vessel has been suspended, although the whole imperial family was in danger, but then the Czar thinks less of himself than does President Roosevelt.

The results of the last census now published, show that there are now 40,000,000 foreigners in France for 37,193,871 French people—this being the population of France today. This works out at the rate of 260 resident foreigners for 10,000 inhabitants.

There are living in France 6,155 Americans of the United States. The Italians are the most numerous, 330,465. Of Belgians there are 323,300, Germans, 89,772, Spaniards 80,425, Swiss, 73,042, English 36,948, Russians 16,061, Americans from other parts than the United States 10,017; and after these come Luxembourghians, Australians, Dutch, Romanians, Serbians, Bulgarians, Turks, Greeks, Hungarians, Swedes, Norwegians and Danes.

The country contributing the smallest number to the population on French soil among the larger countries is the Portuguese, 719. The department in which there are most foreigners is the Alps, Maritimes (2,628 per 10,000 French). This arises from its famous health resorts and its near neighborhood to Italy. In the north there are more than 202,000 Belgians, and in the Neurthe et Noselle there are 17,000 Germans.

In the two frontier departments of the Bases Pyrenees and the Pyrenees Orientales there live 2,709 Spaniards. In the department of the Seine there live 37,878 Belgians, 30,703 Germans, 13,236 English and 9,595 Americans. In the whole of France 29 per cent. of the foreigners were born in that country. On the other hand, 198,916 French persons were born abroad.

M. Santos-Dumont has been experimenting on the lake in the Bois de Boulogne with his new hydroplane, with which he proposes to win a bet of \$10,000 by traveling at the rate of sixty miles an hour.

The hydroplane, which is called the Santos-Dumont, No. 18, is a curious-looking apparatus, composed of three cigar-shaped bulbs, the center one of which is thirty-five feet long, and the other two about four feet long. The three bulbs are filled with compressed air and protected by wood and steel. M. Santos-Dumont sits on a sort of saddle at the back of the large bulb.

The entire apparatus as at present constructed only weighs 120 pounds, but it will be heavier when the 120-horsepower motor is fitted, although this will be made wonderfully light.

There is a storm in the telephone teacup in Paris, owing to a circular which has been sent out to the girl telephone clerks.

The circular states that telephone employees in future will have to get the authorization of the Postmaster-General before they can marry. Until this permission is granted no date for the ceremony may be fixed.

The employees are not allowed to marry foreigners, members of the police force, detectives, mayors' clerks, or cashiers. The reason given for this peculiar rule is "the safeguarding of the secrets of the public."

Paris was invaded yesterday by a Belgian band known as the Cookery Academy.

This band, which is forty strong, is not composed of cooks, but of philanthropists. It is a group of young men and girls who use their spare time for the collection of funds for charitable purposes.

They wear a quaint mediaeval costume, and their instruments all have the form of vegetables of all kinds and immense knives, forks and spoons.

The academy has collected \$40,000 for various charitable objects within the last few months. They paraded Paris yesterday and today on behalf of the conscripts whose two years' service

The Right Kind of Clothing For Boys

It's not possible to incorporate more goodness, nor genuine wearability into boys' clothing than our Tailors have done. It has been made to stand the wear and tear of the SCHOOL YARD—and that's rough. Same time it has a stylishness that is an education to the boy in the wearing of good apparel. Most satisfactory feature, however in the moderate cost.

Juvenile and Eaton, Serges, Fancy Cheviots, from 3 to 8, in Sailor and Russian Blouses.

\$2.50 to \$6.00

Boys' Knee Pants Suits. Double Breasted, with straight and blouse trousers.

\$2.50 to \$7.00

Special Suits, 8 to 16. A Double Breasted Boys' Suit with two pairs pants, one straight and one blouse

\$6.00

Stylish Overcoats For Boys

All sizes from 3 to 16

\$3.00 to \$8.00

WEATHER FORECAST—Fair Sunday; diminishing northwest winds.

Fall and Winter Clothing Facts

A key that nearly fits a lock won't quite open it. A suit of clothes that nearly fits a man won't give complete comfort or full wear value, and upon fit does comfort and wear depend. One proof that the clothing purchased of Rosenbloom, Buntin & Co. will fit is the fact that they carry the famous Hart, Schaffner & Marx make, and that make of clothing is the only one that has the French hair cloth and shrunk linen canvas fronts built in the coat while being made. This insures permanence of shape. The usual garments have ready-made fronts that seldom fit any suits, although they are modeled from correct shapes. Enough shapes to fit all forms and figures.

Hart, Schaffner & Marx \$18, \$22.50, \$25

Hart, Schaffner & Marx Overcoats, the real nobby kind, made to fit you \$18.00 to \$30.00

New Fall and Winter Hat Shapes

How do you like these?

Dressy hats aren't they? We've got a raft of these telescopes and stiff hats. Some have higher crowns than these—some of the telescopes have binding on the brim. Different shapes and styles to suit every taste. "Mallory" is the name on every hat.

Prices: \$2.00, \$2.50, \$3.00 and \$3.50

Men's Furnishings

The requirements of the men and young men can be met here better than at most stores. We have studied the young men and have bought the swellest line of Neckwear, Shirts, Gloves, Underwear and Hosiery you could wish to see. All the selections are from this season's latest styles, strictly correct and the latest out.

A FEW SUGGESTIONS

1st—Underwear

Derby Ribbed, cream or blue colors, fleece lined, at \$1.00 per suit. Union suits, heavy all wool, either in ribbed or plain, all colors for \$1.00 to \$4.00. Wright health underwear, the regular winter garment, all colors at \$2.00 to \$3.00 per suit. All wool underwear, all sizes, colors, noted for warmth, for

\$2 to \$5 per suit

2nd—Hosiery

Cassimer, a full line of hose in plain black, grey and fancy, for

15c, 25c, 50c

3rd—Gloves

Our gloves that we have purchased for the season, are just the newest out, nobby colors, a strictly dress glove. They come in mostly black, brown and grey, made of finest kid.

\$1.00, \$1.50, \$2 a pair
