

PUZZLING POINTS OF THE EDUCATION LAWS EXPLAINED

Superintendent of Public Instruction Cotton Has Issued A Bulletin Which Will Be of Great Use.

RICHMOND IS MADE AN EXAMINATION POINT.

Beginning Teachers Can Take Quizzes at County Superintendent's Office — Three Classes of Teachers.

A vast amount of information in relation to the operation of the new educational laws of Indiana has been prepared by Fessett A. Cotton, state superintendent of public instruction, and will be distributed among county superintendents and school officials of the state. In compiling the bulletin, Mr. Cotton worked with C. N. Kendall, superintendent of the Indianapolis city schools. He and Mr. Kendall formed a committee of the state board of education appointed to prepare this special information. The bulletin contains a number of opinions from the attorneys-general on points of the educational laws which have been puzzling the teachers and officials of the schools.

Introductory to the bulletin is the announcement of examinations for persons who desire to take up the profession of teaching, but who are not graduates of high schools. The new law requires that beginning teachers shall be graduates of high schools. These examinations arranged by the state board of education sitting as the state teachers' training board, will be held on the last Saturdays of February, April and May. Such persons will be examined in the following subjects: (a) five questions in either German or Latin; (b) ten questions in algebra and plane and solid geometry; (c) six questions in either physics or chemistry; and six questions in either zoology or botany; (d), ten questions including the subjects of American literature, English literature and rhetoric; (e) ten questions in general history and civics; (f) six questions in physical geography.

Places for Examinations.
These examinations will be held in the following places: Office of department of public instruction at state house; in the offices of city superintendents of schools at Ft. Wayne, Evansville and Seymour; in the offices of the county superintendents of schools at Valparaiso and Richmond; in the office of the president of the state normal school at Terre Haute; in the office of the president of Purdue university at Lafayette, and in the office of the president of Indiana University at Bloomington.

In the bulletin the opinion of the attorney-general on one part of the new school law is quoted as follows: "The act requires all beginning teachers, whether they are to teach in the common (grade) schools, or high schools, to have the qualifications (both high school and professional) prescribed in Section 2. Graduates of colleges must have had twelve weeks' training in a teachers' preparatory school unless the colleges from which they are graduates have a professional course equivalent thereto." Following this quotation a list of accredited normal schools is given.

Three Classes of Teachers.
According to the new law there are three classes of teachers, a, b and c. Teachers in "a" class must be graduates of high schools, and must have had twelve weeks' work in a training school for teachers, and must have at least a twelve months' license. Teachers in "b" class must be high school graduates, must have had twenty-four weeks' work in a training school for teachers and shall have not less than a two years' license. Teachers in "c" class must be high school graduates, must be graduates of a school maintaining a professional course for teachers and must have not less than a three years' license.

AFTER THE HARVESTER TRUSTS ARE SENATORS

Much Discussion Results Over Resolution.

Washington, January 24.—Senator Hansbrough, of North Dakota, yesterday endeavored to have nullified the effect of a resolution offered by him and adopted by the Senate on December 17, 1907, directing the Department of Commerce and Labor to investigate the affairs of the International Harvester Company, in order, he stated, that the Department of Justice might proceed to prosecute the company. He explained that there exists between the several departments a certain courtesy or comity, which makes them desire to act in harmony, and for that reason the Department of Justice is holding back its proceedings while another department is under direction of the Senate to make an investigation of the "trust" it contemplates to prosecute.

The resolution called forth a storm of protest during which Mr. Hansbrough declared that the International Harvester Company is taking a hand in politics in North Dakota and is trying to capture delegates who are to represent that State in the Republican national convention. "Not alone that," said Mr. Hansbrough, "the edict has gone forth from this monopoly that I am to be defeated for the Senate of the United States because I had the temerity to offer a resolution to investigate it."

"The political fortune of a man is a

grain of sand compared with the injustice that may be wrought by an institution of this kind. I accept this challenge and am ready to meet it. If the people of my State desire to have this monopoly control their State they do not want me as their representative."

Senator Beveridge said that this statement of the activity of the "harvester trust" was much more important than the resolution to stop the investigation of the trust. After more than an hour spent in debating the resolution it was on motion of Senator Fulton, of Oregon, referred to the committee on agriculture.

Gum and Thought.
One thing is certain, you cannot chew gum and think at the same time with any degree of success. You may chew gum and work mechanically, you may read with gum in your mouth and perhaps not miss anything in the author, but when it comes right down to good hard mental effort you cannot concentrate and achieve the best results of which you are capable while your jaws work unceasingly. That chewing is just so much wasted energy and as such dissipates your force and keeps your thinking powers reduced to the lowest point. Just put it down in your notebook as a fact that no man can think deeply, logically or well balanced thoughts while his jaws are working overtime.—Chicago Tribune.

Bishop Williams, of Connecticut, for many years president of the Episcopal church, lived all his life unwed. A friend mentioned that one of the states was imposing a tax on bachelors, to be increased a certain per cent every ten years of bachelorhood, and added: "Why, Bishop, at your age you would have to pay \$100 a year." "Well," said the Bishop quietly, "its worth it."

CHRONIC STOMACH TROUBLE

Cured by Dr. Williams' Pink Pills After Sufferer Had Doctored for Years in Vain.

The tonic treatment for indigestion is having remarkable success in curing obstinate cases of that distressing malady and deserves attention from every sufferer. Its principle is that remedies for indigestion that digest the food for the stomach give relief for only a short time. Ultimately they unfit the stomach to do its own proper work, because they make its already weak power still weaker by dense, while the remedy that strengthens the stomach makes it more and more capable of digesting the food for itself and this benefit lasts. A remedy that is a tonic not only for the stomach but for the blood and nerves as well, invigorates the entire system and makes recovery from the weakening effects of indigestion rapid and thorough.

Miss Cynthia Hart, of 418 E. Mulberry street, Lebanon, Ohio, says: "I was a sufferer from stomach trouble for several years and found no relief in doctors' or other medicines. My appetite was gone, I was troubled constantly by headaches and dizzy spells and was so nervous that I was annoyed and worried by any little noise. It was almost impossible to sleep at night and I was easily tired out. The least bit of work made me short of breath. I lost in weight and was so run down that I knew I must soon find some help or give up."

"While undecided what to do I ran across a newspaper containing a case like mine cured by Dr. Williams' Pink Pills and at once bought a box. There was soon such a decided improvement that I continued using the pills and was entirely cured. The best proof of this is that I have been well ever since. I cannot recommend the pills too highly."

Sufferers from dyspepsia in any form who have found their condition unrelieved or actually growing worse while using ordinary remedies, would do well to try Dr. Williams' Pink Pills. They are sold by all druggists or direct by mail, postpaid, on receipt of price, 50c. per box; six boxes, \$2.50. A diet book sent free. Write to Dr. Williams' Medicine Co., Schenectady, N. Y.

"Under Southern Skies."
The return of "Under Southern Skies" to this city is an event that will be looked forward to by large numbers of theatre-goers. Those who saw this highly entertaining play on its previous visit will be glad of an opportunity of seeing it again, for it is a play that bears seeing over and over.

"Under Southern Skies" is now in its seventh year and its popularity is constantly increasing. An entirely new outfit of scenery has been provided, new costumes will be worn and new songs and dances will enliven the Hallowe'en celebration. "Under Southern Skies" will be at the Gennett next Friday night.

WOMAN PRACTICED SHOOTING LONG TIME

Shot and Killed Brady in New York.

New York, Jan. 24.—It developed today that Mary Roberts, generally known as Mrs. May Roberts Clark, who shot and killed Frank Brady in May's big department store and then committed suicide, had practiced shooting three months and that her act was most deliberate. Her closest friends said that she had expected Brady to marry her, and his refusal drove her insane. A diary found in her trunk by the police tells the story of her life and love for Brady. Her husband was John Roberts, a former policeman.

A Norwegian woman physician, Dr. Julia Bang-Klinek, will be one of the first persons to spend a winter at Advent Bay, Spitzbergen. No one has been brave enough to face a winter in that place until the present year when two mining companies determined to keep at work on the coal mines. They advertised for two doctors, and Dr. Bang-Klinek and her husband, also a physician, answered and accepted. The mining colony will consist of about 100 persons, including seven women.

FREIGHT TRAFFIC IS RESPONSIBLE FOR RETRENCHMENT

IT IS ASSERTED THAT THOUSANDS OF FREIGHT CARS ARE NOW IDLE, INDICATING THAT BUSINESS IS NOT THE BEST.

WAGES MAY BE REDUCED.

Railroads All Over the Country Are Now Considering This Mode of Procedure, According to Reports Issued.

Decrease in freight traffic is responsible for laying off men along the Richmond and Indianapolis divisions of the Pennsylvania, it is asserted.

Figures prepared by one of the large railroad companies show that a week ago there were 329,000 idle freight cars in the United States and about 8,000 locomotives, which are laid up because of the falling off in traffic. As there are 2,200,000 freight cars in the country this would show that 14 per cent of all the cars owned by railroads are stored on tracks. Figuring the value of cars at \$1,000 each, and locomotives at \$15,000, the statement shows that the railroads have \$440,000,000 tied up in rolling stock for which there is no present use. The great shortage in rolling stock last year caused large orders for cars to be placed by railroads. As late as last October the reported shortage was 500,000 cars.

Fixed charges of a railroad must be met in full times as well as in active, and maintenance and other expenses must be provided for, and in view of all the facts the management of many railroads are understood to be discussing the question of reducing wages as a necessary measure.

Terrible Liquor Craving

How Orrine Destroys all Desire for Whiskey and Beer.

The terrible craving for liquor is a symptom of disease and to overcome it, the disease itself must be treated in a scientific way. When one has used whiskey, beer or other stimulants for a long time, the nerve cells have become accustomed to the effects of the stimulants and demand liquor in order to perform their duties. If the nerve cells are properly treated, the craving for liquor will be destroyed.

It is in this way that Orrine cures alcoholism, by supplying to the nerve cells the strength needed, thus destroying the desire for liquor. It eradicates every particle of the terrible liquor craving, imparts new strength and vigor to the whole system, and restores the general health. Treatise on "Drunkennes," free on request. The Orrine Co., Washington, D. C.

So successful has Orrine been that in every box is a registered guarantee which entitles you to a refund of your money if Orrine fails to effect a cure. Never before was a treatment for the liquor habit sold in this way. A guarantee like this shows the faith of the discoverer of Orrine and the agents who handle it, the leading druggists everywhere.

Orrine is in two forms, No. 1 which can be given secretly in food or drink; No. 2 in pill form for those who desire to be cured. Either form costs \$1 per box, and both are sold under the liberal guarantee that your money will be refunded if Orrine fails to cure.

Orrine is for sale by A. G. Luken & Co., Richmond, Ind.

UNIVERSITY GIRLS HAVE "PHONE ORGY"

Co-eds Found Robber Had Left Out Bottom.

Chicago, Jan. 24.—Because a polite burlier left the bottom out of the telephone box after he had robbed it of nickels, the girls at Kelley Hall, University of Chicago, went on a "phone orgy, which only ended when central aroused by the unusual number of calls from Kelley, sent a messenger to investigate and put a stop to the telephone frenzy.

Several of the young women had while at work, mistook him for an employee of the telephone company. "Oh, you are fixing the box?" one of them said. "Yes, I'm fixing it," he replied. "She was surprised to think she didn't realize what he had meant by 'fixing.'"

After leaving Kelley the robber visited Foster, Beecher and Green halls, but his visit to these places was learned of before the girls could reap any benefits from his call. The telephone in Hitecheek Hall, a men's dormitory, were robbed in a similar manner a few weeks ago.

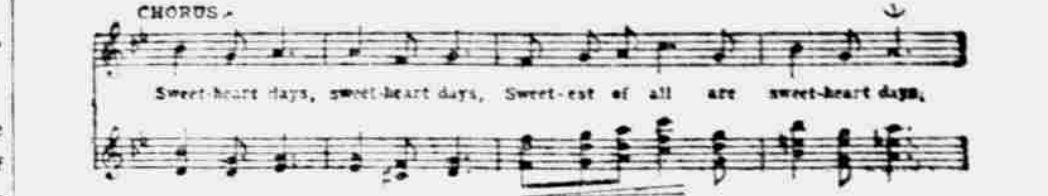

Chicago passengers using C. & N. trains land at 12th street (Illinois Central) Station; most conveniently located. Remember this.

The Hub of The Body.
The organs around which all the other organs revolve, and upon which they are largely dependent for their welfare, is the stomach. The function of the stomach becomes impaired, the bowels and liver also become unbalanced. To cure a disease of the stomach, the bowels get a 30 cent or \$1 bottle of Dr. Cassell's Syrup Pepsin at your druggist's. It is prompt relief for constipation and dyspepsia or over-eating.

PALLADIUM WANT ADS. PAY.

Can J. D. Rockefeller's Income Per Minute Compare With This Composer's Earnings?

For just a few short hours a month ago a young man of Detroit could sit back in easy chair and congratulate himself upon being the highest paid individual in this country if not the world. He had just received from Jerome H. Remick & Co., a \$5,000 check in exchange for the manuscript and publishing rights of a new song, now familiar to everybody, entitled "Sweetheart Days." J. Anton Dailey is the

name of this fortunate composer and sense of hearing and verses that come he explains that within five hours he had composed the song. The old, old story of the time he first conceived the tune of this song, he had put it in such an appealing way. All the shape for the printer and sold his work to the publishing house mentioned. At heart Dailey is the popular theme, this rate his remuneration figures. Surely every lover of music will not down to the sum of \$16.66 per minute, fail to secure a copy of this great new and while \$5,000 is a big price to pay for a song, it looks as if the "Dreaming" by the same writer.

HEAVEN ON EARTH IN THE TWENTIETH CENTURY IS POSSIBLE SAYS MAN

Chicago, Jan. 24.—Prof. W. B. Ekins' new "heaven on earth" will be ideal in the following respects:

A village doctor will look after the health of the community.
A village lawyer will dispense law free of charge.
A village dining-room, in which the villagers will eat together.
The fare on the railroads will be a cent a mile.
There will be no more servant girls. There will be no more day laborers. There will be more people on earth. All people will live better and be healthier and wiser.

Professor Ekins is a member of the University of Missouri faculty, who has evolved a scheme of life on the "community of interest" plan. The scheme which has set university professors all over the country thinking, has just been published in the current number of the American Journal of Sociology from the University of Chicago press.

In summing up his bright picture of the new existence, Professor Ekins says: "A new heaven and new earth will appear. Old things will pass away and all things will become new. The earth will in the twentieth century become more fruitful than in the last nineteen. New and higher forms of organization will appear. The war drums will beat no longer. The battle flags will be furled forever."
