HUNTINGTON TEAM NOW IN LEAGUE

Pres. Gamble Went Through Formality of Granting a Franchise Yesterday.

MEETING AT ANDERSON.

NEXT MONDAY, ARRANGEMENTS FOR PLACING THE LEAGUE ON ITS FEET WILL BE FINISHED—WANT NATIONAL PROTECTION.

(By Tort.)

President Gamble of the Indiana Ohio league met yesterday with the promoters of the Huntington club, which applied for an I-O franchise for that city, and the formality of admitting that city into the organization was accomplished in the presence of Frank Runyon of Bluffton, who interested the Huntington people in organizing a base ball company for the purpose of placing a team in the new defunct Northern Indiana league.

Runyon Appears. Runyon informed Mr. Gamble that he was in Huntington as a representative of the Kokomo people who are preparing to organize a baseball company for the purpose of placing a team in the I-O league. Before Kokomo is granted a franchise President Gamble will hold a heart to heart conference with the promoters of that city.

Meets at Anderson. While Mr. Gamble was in Huntington he received a communication from Del Williams of Anderson, stating that the efforts to place a team in that city were being met with success and that Anderson desired to have the next league meeting held in that city. Mr. Gamble then called a meeting to be held in Anderson next Monday.

Kokomo in Game. At this meeting five cities, to wit: Richmond, Piqua, Van Wert, Huntington and Anderson will be represented. The representatives of these cities will in all probability be Kokomo to the organization and the formation of the Indiana-Ohio league, after weeks of hard effort, will have been accomplished. The Anderson meeting will be held at the Grand hotel and will be called to order at 1 o'clock.

Huntington Bugs Crazy. Mr. Gamble states that Huntington is base ball crazy and that all the stock in the base ball company has been subscribed. Within the next three days officers of the company will be elected and a playing manager appointed. All of the clubs in the league have an understanding to the effect that when the formation of the league is completed national protection will be applied for. The salary limit will be \$1,000 per month and each club will have three games at home each week. To show good faith to the fans all over the circuit, each club will post a \$200 guarantee. Within the next ten days a schedule will be drawn.

The Sin of Insurance. "When life insurance was first instituted," said an antiquary, "the church and pious people generally were dead set against it. They said that it was gambling in human lives. They said, too, that it would encourage murder. They were right in a way. Life insurance is gambling in human lives—only the odds are so greatly in the companies' favor that they can never lose. It is also an encouragement to murder. A good many murders are committed every year for the sake of life insurance policies. But these evils are no more than fly specks on the great beneficent life insurance bodies. Life insurance does so much good that the evils attendant on it are by comparison nil."

His Golden Opportunity. A Baltimore man tells of an address made to some school children in that city by a member of the board of trustees. "My young friends," said the speaker, "let me urge upon you the necessity of not only reading good books, but of owning them, so that you may have access to them at all times. When I was a young man I used frequently to work all night to earn money to buy books, and then get up before daylight to read them."—Success Magazine.

His Mistake. "I thought it was a good time to ask the old gentleman for his daughter. He is suffering from a recently broken arm." "Well?" "I found I made a mistake in not waiting until he broke a leg."—Cleveland Plain Dealer.

TABLE NAPKINS.

They Came Into General Use in the Fifteenth Century.

Curiously enough, that article, now considered almost indispensable, the table napkin, was first used only by children and was only adopted by elder members of the family about the middle of the fifteenth century. In etiquette books of an earlier date than this among other sage pieces of advice for children are instructions about wiping their fingers and lips with their napkins.

It seems that the tablecloth was long enough to reach the floor and served the grown people in place of napkins. When they did begin to use napkins they placed them first on the shoulder, then on the left arm and finally tied them about the neck. A French writer who evidently was conservative and did not welcome the napkin kindly records with scorn:

"The napkin is placed under the chin and fastened in the back, as if one were going to be shaved. A person told me that he wore his that way that he might not soil his beautiful frock."

It was a difficult matter to tie the two corners in the back, and it is said that these originated our expression for straitened circumstances, "Hard to make both ends meet." This custom led to the habit of table waiters carrying a napkin on the left arm.

HIGH SCHOOL TEAM PLAYS AT CENTERVILLE

Will Attempt to Down Smelser's Pets.

The high school basket ball team will play the fast high school team of Centerville tomorrow night at Centerville. The Centerville team has been playing a fast game and they expect to show the local champions up, but it is thought that Smelser's pets will have to play faster than they have ever played before.

In preparation for the game the high school team will play the business college team tonight. There will also be a polo game which will be called at 7 o'clock.

FLOWER CITY LADS DEFEATED RICHMOND

When Rough and Tumble Game Ended, Score Stood 3 to 2 In Favor of Visitors.

THEY DESERVED TO WIN.

PLUCKY YOUNGSTERS DID NOT NEGLECT THEIR TEAM WORK WHILE ROUGHING IT WITH LARGER OPPONENTS.

(By Tort.)

In a contest which would have caused the Marquis of Queensberry, manufacturer of the official prize ring rules, to exclaim "what's the use," the New Castle polo team, in its farewell appearance for the season, stung the blue-clad Quaker poloists last evening at the Coliseum to the chorus of 3 to 2.

Deserved to Win. In the jump off Richmond took the lead and gave the impression of being able to do things to our visitors. When dust settled at the close of the first period, the score stood 2 to 1 in favor of the Quakers.

This peeved our visitors and in the second period they rapped two into the local draperies. In this inning the New Castle outfit began rough proceedings and this strenuous policy was quickly adopted by the Quakers. The locals, however, in their roughing tactics carelessly overlooked the finer points of the game and threw team work to the breeze. New Castle did not overlook this bet when they got their mad up, and as a result put the kibosh on our pets.

Aggressive Tactics. In the third inning the two teams assumed such aggressive tactics that ruts were worn in the floor where players fell. The defense put up by the Flower City lads after taking the lead was sensational and despite the batter-ram offense of the Richmond forwards not an opening could be pried open. Despite the knock-down, drag-out work of the two teams the game was interesting, if not very well played.

Parry, for the locals took the line light. The work of Quigley and Barker was to the core.

In a French Chateau in Winter.

It is not all bliss to be invited to a French chateau in midwinter, no matter how distinguished the host or how romantic and artistic the domicile. At least it isn't for the steam heated Bostonian, lapped in the luxury of summer warmth. A visitor to a distractingly lovely abode near Fontainebleau says he put in twenty-four hours of physical anguish there and simply came away wondering how his hosts endured the arctic temperature of the rooms. "If I meant to live in foreign lands," says this shivering person, "I would go through the chilling process which inures human flesh and blood in France. What do these people do to render the blood in their veins to course like fire and act like an eternal furnace?" That's a question Americans abroad might well like to have answered.—Boston Herald.

Heat of the Sun.

It has been computed that the temperature of the surface of the sun would be expressed by 18,000 degrees of Fahrenheit's thermometer, or between eighty and ninety times the temperature of boiling water. This is about five times the highest temperature that man is able to produce by artificial means. The light given off from the surface of the sun is reckoned as being 5,800 times more intense than that of the molten metal in a Bessemer converter, though that is of an almost blinding brilliancy. If we compare it with oxyhydrogen flame, the sun sheds a light equal to 146 times the intensity of the limelight.

Children's Favorite Toys.

A hundred and thirty-two schoolboys of Paris and seventy-two girls were invited to describe their preferences in the way of toys. Among the former thirty-one voted for a railway train, twenty-three for tin soldiers, ten for steam engines, nine for building bricks and eight for toy typewriters and mechanical horses. Forty girls—a solid majority—declared without hesitation that a doll was superior to any other implement of recreation. The supercilious seems, happily, a long way off.—Fall Mail Gazette.

HIGH SCHOOL TO PUT TEAM IN FIELD

At Meeting of Candidates Today, Allison Was Elected Captain.

THE PROSPECTS ARE GOOD.

STUDENTS ARE APPEALED TO FOR SUPPORT DURING THE COMING SEASON BY MANAGER KARNS—SEVERAL CANDIDATES.

At a meeting of the high school baseball candidates at the school this noon, Carl Allison was elected captain and Harry Karns manager. The prospects at the school for a first class nine are fair. It is hoped that when the season opens that the team will be in fair conditions to meet some of the high school teams of the state if the students at the school will give them their support, which has always been lacking in other athletic contests.

The team this year will have Allison for third base, Starr for short stop, Spangler for second, Johnson for first, and Karns for catcher. It is probable that Lawrence, Clements, Fisher, Talant, Ferling and several others will try out for positions when the first practice is called. There are also a large number of freshmen who have had experience on the Garfield teams and ought to be able to make good on the high school team.

The only weak place on the team will be with pitchers. At present Allison is the only man that has ever had any practice in twirling. Johnson was also pitched, but it is not thought that he will be one of the regular pitchers.

Manager Karns stated today that if the students would guarantee to support the team, he would secure games with Steele high school of Dayton, Rushville, Centerville and various other high schools near by.

RICHMOND PLAYS AT NEW CASTLE TONIGHT

Fans There Are Anticipating a Great Game.

New Castle, Ind., March 12.—Richmond, the conceded polo champions of the state, defeated twice this season has consented to one more game with New Castle at the Coliseum in this city Thursday evening.

The hottest game of the Indiana gas belt this season may be expected. The admirers of the game will turn out in large numbers realizing that they will get their money's worth. The game is exciting even when played by burlesquers, but the coming event will be no burlesque. It will be a fight from going to song.

BRITISH CASTE.

Love of the Englishman For a Titled Ruling Class.

The presence of a personal sovereign is the outward and visible sign that caste is still supreme in the British empire. The external abuses of the feudal system have been abolished in Great Britain, one by one, until those that still linger are almost harmless, but the inner spirit survives to this late day, and even now its manifestations are abundant in almost every part of the social structure of the British Isles. There is still alive the fiction that the king rules and that the army of the empire is his majesty's army. There is still a willing acceptance of the titled aristocracy and also of an upper house, the vast majority of whose members sit there by the right of birth only, without regard to their individual merits.

No doubt the British people could change these things speedily and without violence if they really desired to get rid of this inheritance from feudalism. But they have not got rid of it, and this is evidence enough that they do not wish to do so.

The British see no reason to abolish a state of affairs which the American people look at with amazed wonder as a survival of the dark ages. A native American finds it wholly impossible to understand the mental attitude of a certain man of letters in London, who justified his ingrained Toryism by the assertion that he simply would not be ruled by his equals.—Reader.

THE WILD CARROT.

One of the Most Interesting of Our Weeds.

A weed has been defined as "a plant that persists in growing where it is not desired." Surely the wild carrot is not desired. It is a most weedy weed from the point of view of that definition and of the dislike of the farmer. As to the persistence, our veteran farmer-naturalist John Burroughs tells us: "Cut off the head of the wild carrot, and in a week there are five heads in room of the one. Cut off these, and by fall there are ten looking defiance at you from the same root."

The only fault of the wild carrot, as of other so-called weeds, is too great success in life. It is guilty only of persistence. But from a nature lover's point of view there are, strictly speaking, no weeds. No plant is disliked. On the contrary, the more a plant is able to survive successfully for life the more of interest it is. We can also see and appreciate the beauty without the "weedy" dislike.

If in this spirit observers will examine the wild carrot the verdict will be that it is one of the prettiest and most interesting of our native plants. The beauty is especially noticeable in the full bloom, or Queen Anne's lace, form. Perhaps some may regard the bird's nest form as the most interesting.—Exchange.

EARLHAM RESTING BEFORE DEBATE

All Members of the Teams Are In Good Condition for Contest.

TRUEBLOOD IS CONFIDENT.

SAYS HIS FORENSICAL WARRIORS WILL OPEN THE EYES OF BOTH BUTLER AND WABASH COLLEGES TOMORROW NIGHT.

The Earlham debating teams have at last reached the point where they may rest on their oars and enjoy life until tomorrow night.

Professor Trueblood has coached all of the men both individually and collectively, until both the professor and the members of the team feel that nothing more can be presented upon the subject to be discussed. The question, "Resolved, that the United States should subsidize the merchant marine," has offered more points for close study, than has any question which has been discussed by Earlham for a number of years, and the two teams feel that they have the subject well in hand.

Professor Trueblood says the Earlham teams will open the eyes of Wabash and Butler.

The affirmative team will meet the Butler negative team in the Earlham chapel, and the Earlham negative team will contest the question with the Wabash affirmative at Crawfordsville. The Wabash negative squad will meet the Butler affirmative team at Butler college. In last year's debate, the Earlham affirmative team won by a unanimous decision, at home, but the negative team was defeated.

Attorney Ray K. Shively will preside at the debate in this city and the judges will be Prof. James A. Woodburn, Indiana university; Dean William P. Rogers, Cincinnati university; Prof. Arthur G. Hall, Miami university. The members of the Butler team are Adams, Hyman and Ryan and the alternate is Reidenbach. The Earlham team is composed of Edgar Farquhar, Perley Denman and C. Haworth, with Morris Jones as alternate. The Wabash team that will meet Wabash at Wabash is composed of Vincent Nicholson, Levi Pennington, Lester Haworth, with John Heaton as alternate. Prof. E. P. Trueblood will accompany the team to Wabash.
