PALLADIUM WANT ADS. PAY.

HOODOO THIRTEEN  
FIGURES IN FIRES

Thirteen People Lived in House  
Which Caught Fire.

Members of the fire department be-  
gan to wonder yesterday if the thir-  
teen hoodoo was going to hold good  
with them. Three alarms of fire  
were received in short order. It was  
thirteen minutes of 5 o'clock when  
the department was called to No. 4  
South Fifth street. The house is oc-  
cupied by thirteen persons. It didn't  
take but thirteen minutes to have the  
flames that originated from a defect-  
ive flue, extinguished. A colored  
family named Lee occupies the house.  
A defective flue was the cause of a  
small blaze at the home of Mrs. Jo-  
sephine Lichtenfeld, 224 South Fourth  
street. The damage was slight.

Fire that has been smoldering at the  
north end dump for several weeks,  
broke forth again last evening and one  
company was sent down to see that no  
damage ensued.

ETRUSCAN VASES.

The famous Etruscan vases were  
wrongly named, for though made in  
Etruria, they were the productions of  
Greek genius. They are elegant in  
form and enriched with bands of beau-  
tiful foliage and other ornaments, fig-  
ures and similar subjects of a highly  
artistic character. One class has black  
figures and ornaments on a red ground  
—the natural color of the clay; another  
has the figures of the natural color and  
the ground painted black. The former  
class belong to a date about 600 B. C.,  
the latter date about a century later  
and extend over a period of some 300  
or 350 years—New York American.

ARCTIC TEMPERATURES.

ZERO WEATHER IS REGARDED AS MILD AND  
AGREEABLE.

According to eminent arctic explor-  
ers, physical sensations are relative,  
and the mere enumeration of so many  
degrees of heat or cold gives no idea  
of their effect upon the system.

One explorer states that he should  
have frozen at home in England in a  
temperature that he found very com-  
fortable indeed in Lapland, with his  
solid diet of meat and butter and his  
garments of reindeer.

The following is a correct scale of  
the physical effects of cold, calculated  
for the latitude of 65 to 70 degrees  
north:

Fifteen degrees above zero—unpleas-  
antly warm.

Zero—mild and agreeable.

Ten degrees below zero—pleasantly  
fresh and bracing.

Twenty degrees below zero—sharp,  
but not severely cold. One must keep  
one's fingers and toes in motion and  
rub one's nose occasionally.

Thirty degrees below zero—very cold.

Particular care must be taken of the  
nose and extremities. Plenty of the  
fattest food must be eaten.

Forty degrees below zero—intensely  
cold. One must keep awake at all haz-  
ards, muffle up to the eyes and test the  
circulation frequently, that it may not  
stop somewhere before one knows it.

Fifty degrees below zero—a struggle  
for life.—Chicago Record-Herald.

## Deaths and Funerals

GRIMES—Edgar E. Grimes died at  
Adrian, Michigan, Friday at the age  
of 21 years. The remains arrived in  
Richmond this morning and were taken  
to Abington, where the funeral  
will take place Sunday morning at 11  
o'clock. The burial will be in the  
cemetery at Abington. Young  
Grimes' mother is the sister of Edward  
and William Dye.

Births.

Leroy and Emma Schattel, 727  
North Tenth street, boy, second child.

William and Merle Zwell, 818 North  
Twelfth street, girl, first child.

The Name of the Jungfrau.

Whence does the Jungfrau derive its  
name? M. Hartmann of Interlaken  
contributes the results of his researches  
on this subject to the "Feuilles  
d'Histoire Bernoise." There was, it  
appears, in the fifteenth century a numer-  
ary at Interlaken. The name owned  
what is now the Wengen slip and was  
then denominated, out of compliment to  
its proprietors, the "Jungfrau-  
berg," or "Mountain of the Young  
Women." When a name was wanted for  
the snow peak opposite, the Jungfrau-  
berg naturally supplied it. It was  
called the Jungfrauorn—an appella-  
tion which in the course of the years  
was abbreviated into Jungfrau.—West-  
minster Gazette.

They Have Horns.

The organization of bee life is a fasci-  
nating study. The workers in a bee-  
hive may be divided, says the University  
Correspondent, into (1) harvesters,  
who feed in honey and pollen from  
flowers, wax from buds of pines and  
poplars, water to mix with pollen and  
honey to make the pasty food for the  
larvae; (2) scavengers, who in early  
morning carry out debris, including  
dead, sick or injured workers; (3) ven-  
tilators, who stand erect and keep  
their wings in continual movement in  
order to ventilate the hive; (4) guards,  
who defend the hive from wasps, rob-  
ber bees and other enemies.

Her Baseball Idea.

Eisie—What are goose eggs in a  
baseball match? Harry—They are inn-  
ings when no runs are made. Why  
did you ask? Eisie—Oh, I thought maybe  
they were laid by the foul in the  
game.—Chicago News.

The Great Blood Purifier.

Teacher (giving a lesson on the rhi-  
noceros)—Now can you name any other  
things that have horns and are dan-  
gerous to get near? Sharp Pupil—  
Motor cars.—Philadelphia Inquirer.
