MACK OFFERS TO PAY CAMPAIGN FUND DEFICIT

NORMAN E. MACK.

England a Traitor to White Man's Cause, Said Wilhelm in Hale Interview

London, Nov. 20.—Here is exactly what Emperor William said on world politics to Dr. William Bayard Hale, the distinguished clergyman, traveler and writer, on board the imperial yacht Hohenzollern at Bergen, Norway, on July 19.

Dr. Hale was seeking an article for the Century Magazine, which article, in view of the earthquake created throughout Germany by an article subsequently given by the emperor to a diplomatist for the London Daily Telegraph, has been suppressed at the request of the German government.

"The emperor talked to Dr. Hale for several hours. He was bitter against England and full of 'the yellow peril.' He declared England a traitor to the white man's cause. He predicted that she would ultimately lose some of her colonies through her treaty with Japan.

"The invitation to the American fleet of battleships to visit New Zealand and Australia," he said, "was intended to serve notice on England that those colonies were with the white man and not with the renegade mother country. The British colonies would show by the ardor of their reception that they understood the situation."

The emperor declared that Japan is even now fomenting insurrection in India. This insurrection might break out within six months. Germany and the United States will, however, find a solution of the Eastern question.

There is a complete understanding between Emperor William and President Roosevelt on this point, it is claimed. They intend to divide the East against itself by becoming the recognized friends of China. Negotiations have been progressing favorably for months. A very high Chinese official, the emperor said, would visit America and Germany. Terms will then be made known guaranteeing the protection and integrity of China and the open door.

The emperor said he believed that America would be forced to fight Japan within ten years. He seemed eager to talk, and poured a steady stream of talk upon England for two hours.

Dr. Hale was received by the emperor as a distinguished traveler, scholar and writer. He was informed that it was the Kaiser's inviolable rule never to communicate with newspaper men.

AMUSING WAR GAME.

Slate and Pencil the Harmless Weapons of Mimic Battle. Draw on your slate or paper a plan like that in the cut below. The dots represent soldiers, one side being French and the other side German. Each player is provided with a sharply pointed pencil, and the game is played thus:

The German, keeping the point of his pencil on a spot denoted by a cannon, draws it quickly across the slate in the direction of the other army. The pencil naturally leaves a line to mark his track, and if this mark passes through any of the men belonging to the other side they are considered dead. The game is over as soon as all the men on one side are dead. Each

DIAGRAM OF GAME.

player has a certain space on the slate allotted to him, and he may dispose his men in whatever part of it he pleases. The track of the pencil must be straight or curved. Any shot in which there is an angle does not count. We here give a battlefield where the strife is ended. In this the German side has killed all the opposite side in eight shots, while the French in eight have been able to kill only nine men.

ANIMAL DETECTIVES.

Bird and Insect Policemen Punish Rogues of Their Kind.

Birds and insects are wonderfully clever detectives. Upon one occasion a gentleman living in India observed a large flock of crows leaving a tree near his house. Shortly after they were gone a violent disease broke out in that vicinity.

An English beekeeper placed a quantity of what he believed to be the best quality of sugar in his hives. But the bees promptly turned it out, and the man found later that the sugar was a cheap imitation.

Swallows and other birds that migrate always choose as their dwelling places localities which are healthful. People, knowing this, watch these birds and build their own houses accordingly.

Then there are bird and insect policemen which kill the rogues among their kindred. Ladybirds, for instance, keep the queen flies off roses, and the reddish brown ant patrols the cotton fields and keeps them clear of the destructive cotton boll weevil.

The Admirable Crichton.

The bearer of this honorable name was James Crichton, who was born in Scotland in 1500. He was the wonder of his age in scholarship and in all the accomplishments that could distinguish a gentleman. At the age of seventeen in Paris he challenged all the most famous scholars of the time to a public discussion, in which he held himself ready to answer any question in theology, jurisprudence, medicine, logic, mathematics or in any other science in any one of twelve languages and in either prose or verse. In this boast he succeeded, and it was then that the title of admirable was given to him. The Duke of Mantua in 1582 employed him as tutor for his son, a dissipated young man. One year later Crichton was one night during the carnival assailed by three masked men. He succeeded in disarming and unmasking the leader, in whom he discovered his pupil, the duke's son. He at once knelt down and offered the prince his own sword, and the young reprobate ran it through Crichton's heart. — Chicago News.

Conundrums.

Where can one always find happiness? In the dictionary. A man and a goose fell from a balloon and landed on a church tower. How did the man get down? He picked the goose. Why does a sculptor die a most horrible death? Because he makes faces and busts.

NO RULING IN ELSTRO CASE

Judge Jackson May Act Next Week.

No announcement has been received from Judge Jackson of the Henry circuit court as to when he will rule in the Elstro divorce case. Judge Jackson is hearing criminal cases in his own court this week and it is not expected he will rule in the local case before next week.

Few persons would guess that the smallest things visible to the eye are stars. Yet, according to a high authority, such is the case. Great as many of the stars are in actual magnitude, their distance is so immense that their angular diameter becomes insensible and they approach to the condition of geometrical points. The minute discs that they appear to have are spurious, an effect of radiation.

Fluttering Hearts

"I have had heart trouble for 40 years; after taking 18 bottles of Dr. Miles' Heart Remedy I am entirely cured, and to-day I do not feel the slightest effect of heart trouble." — DAVID FRAZIER, State Soldiers Home, Erie, Co., Ohio.

Fluttering indicates a weakness of the nerves and muscles of the heart. Like palpitation, shortness of breath, pain in side, and shoulder, it is frequently followed by the worst form of heart disease; therefore it should not be neglected.

Dr. Miles' Nervine is a most reliable heart medicine. It strengthens and regulates the heart action, stimulates the digestive organs, and increases the circulation. The first bottle will benefit; if not, your druggist will return your money.
