

## COUNTY LOSER BY HUNTING LAW

Although Many Licenses Are  
Purchased, No Game Is  
Restocked.

519 LICENSES THIS MONTH.

MORE HUNTERS' PERMITS IS-  
SUED THIS MONTH THAN ANY  
PRECEDING MONTH IN THE HIS-  
TORY OF THE COUNTY.

Up to date the county clerk has issued 519 hunters' licenses this month. This beats all records established in any one month heretofore. The license costs \$1 and the state gains all the profit. The county clerk receives no compensation for all the work required in filling out the blank forms. He even has to pay the postage for the correspondence with state headquarters, and if he sends the check by registered letter he has to pay the additional cost.

The law regarding the fees from hunters' licenses provides that not less than one-third of the amount received shall be expended for restocking the state with game. No game ever has been sent into Wayne county since the law went into effect. If one-third of the amount collected for licenses in the first twenty-five days of this month were spent for game and the game placed in Wayne county it would mean \$173 for the purpose. But other months are to be considered, although November is the leading month of the year for hunters' licenses.

Upon the law, hunters would have reason to complain in this county. They pay in the money regularly and receive a license giving them permission to hunt in return. But the fund created in this manner is supposed to go to restore the game and Wayne county has received no benefit. The clerk issued thirty-seven licenses yesterday.

## OWNS FLOCK OF MALLARD DUCKS

Milton Man Owns Domesticated  
Fowls.

Milton, Ind., Nov. 26.—John T. Manlove, a farmer residing near Milton, has a flock of domesticated Mallard ducks. Some time ago he secured Mallard eggs and they were hatched by hens. The meat of this domesticated fowl lacks the gamey taste of its progenitors owing to the difference in the food supply.

### LIBRARY SLOW POKES.

Time Killing Methods of Officials in  
Continental Europe.

"Americans who grumble about having to wait a long time for books when applying to a public library," said a Boston literary woman, "should try to work or study in a foreign library, particularly in Germany."

"The typical continental librarian takes no account of time. The reader, worker or student must turn in his or her application for books at least a day in advance. The men who search for the books applied for are aged, tottering creatures who have been shuffling around the dusty piles of books for years, and the word hurry is not in their vocabulary."

"The most precious books and manuscripts are kept in places which are perfect fire traps, and disorder predominates in every department. When you speak about the impossible methods employed the librarians tell you that they are too poor to introduce any modern indexes or catalogues. This is to some extent so, but as a matter of fact they would not change if they had all the money in the world at their disposal."

"They do not wish to encourage the common people to use books. The learned are among the aristocracy, and the spread of the knowledge which is hidden in those wonderful literary museums is far from the purpose of the men at the head of Europe's libraries."

"There may be some delay in our libraries, but our people in the lower walks of life are certainly ahead of the common people of the old world in the matter of getting books when they want them, and generally free of charge."—New York Telegram.

### The Town to Be Born In.

In the German town of Klingenberg, near Aschaffenburg, Bavaria, in addition to having no rates to pay for the upkeep of the town, those actually born in the parish receive from the municipality a sum of \$12.50 a year. This sum, if invested regularly at, say, 8 per cent, would entitle the owner to receive about \$1,500 at the age of sixty—a very handsome old age pension. Were it not necessary that the inhabitants should prove birth in the parish before becoming entitled to this payment the popularity of Klingenberg as a place of residence would doubtless be enormous.—Westminster Gazette.

### For Bargain Day.

"She's no lady!"  
"Why, I always thought her most refined."  
"On the surface, yes. But what do you think of a woman who wears her little boy's football shoes to the bargain sales and spikes every one who gets in her way?"—Cincinnati Enquirer.

Kite day is a Chinese national holiday. An expert Chinese kite-flier will see six or even eight kites going on one string.

## "Andy" Harris for the Senate

Ohio's Governor Would Take Foraker's Seat in Upper House  
of National Congress for He Says So.

Columbus, O., Nov. 26.—Following the conference between Senators Foraker and Dick and Governor A. L. Harris, the Governor last night issued a statement in which he announced himself as a receptive candidate for United States senator. His statement follows:

"Appreciating as I do the requests of friends and members of the Legislature I have yielded to the extent of becoming a receptive candidate, but I have no coalition with any other candidate for United States senator and I

am in no sense opposed to any of them. I had nothing to do in bringing about any of the conferences here in this city this week and nothing was done at any of them so far as I am concerned."

Governor Harris can count on fifteen votes in the caucus, and doubtless more will come to his side since he has announced his candidacy. Senator Foraker claims thirty-three votes but it is stated by party leaders the senator is counting on assurances of friendship for pledges.

## HALL IS REMODELED

Needed Improvements Made  
On Chemistry Building  
at Earlham.

CLASSES ARE INCREASED.

The Perry science hall at Earlham college has just been thoroughly remodeled and as it now stands is a credit to the local institution and the equal of any similar building in any college in the state. The remodeling of the building is the result of the efforts of Prof. H. N. Holmes and he has been receiving many congratulations.

It was necessary to make changes on the hall owing to the greatly increased number of students in the chemistry classes. Formerly the assembly room of the building had forty-four desks. Last year this was inadequate, as there were only thirty-two students to be provided for but at the beginning of the present school term it was necessary to accommodate seventy-three students. Work was immediately started to improve the building and today the assembly room can accommodate one hundred.

On the first floor the formerly unused front room has been drafted into service and turned into a quantitative laboratory, accommodating twelve students. Dr. Holmes has planned to give a semi-popular course in commercial chemistry, which only requires one year's previous training, and this will attract many students who are after a practical knowledge of the subject.

A quantitative analysis room has been provided for and it will easily accommodate a class of twenty-four. The laboratory for the first and second year men has been remodeled and it will now accommodate easily one hundred students.

### DYNAMITE IN THE MAKING.

Workmen Who Are Encircled by Death  
in Gallons and Tons.

So thoroughly deceptive is dynamite in the making that you are apt to be disappointed on viewing the surface of things. You could more readily fancy thunderbolts leaping and crashing from tender blue skies than that the most fearful forces in creation are hidden under such a peaceful exterior. Nitroglycerin, a cupful of which would distribute you over square miles of landscape, is diligently mixing around you in hundreds and thousands of gallons.

It is making itself in big iron retorts, cascading down leaden gutters and merrily tumbling in minute quantities into immense vats, where the deliquescent yellow peril pursues its journey powderward. Out of one receptacle it fares furiously through special lead coils, driven only by cooling blasts of air, and is drawn off like draft ale and piped on to the next perfecting stage. Gaze with the nitroglycerin expert into one of those big cauldrons. The interior is brilliantly illuminated by electricity, the only illuminating agency permitted in or about the dangerous houses.

Around you are other houses at uniform distances apart and connected by a series of narrow gauge tracks wherein workmen are railroading nitroglycerin from here and pulp cotton from there to be compounded into dynamite and blasting gelatin. Greatest care is taken in rolling the product from house to house. As soon as a loaded cart is ready to pass out of the nitroglycerin house, for instance, a semaphore signals from an adjoining station, to which the consignment is carefully hurried.

Around you are long storehouses packed with pulp in tons of innocent whiteness. Presently this pulp will assume a tan color under the nitrating process, and then, suddenly becoming carbonite, red cross, hercules, judson and giant powder, forcite or what you order, it develops the quasi virtues of dynamite—dynamite or blasting gelatin in which more natural forces are condensed to the cubic inch than exist anywhere else in creation. Death, curbed and sleeping, encircles you in gallons and tons. Annihilation threatens at every turn in the form of potential pulverizing forces. But the man and the mercury are there also, alert, responsive, reliable.—Leslie's Weekly.

## Frazer Boosted for Chairman of Sixth District Republicans

The Rushville Republican has started a boom for Charles Frazer, of Rushville, for republican district chairman in the Sixth. Mr. Frazer has long been a republican wheelhorse and will have a large following of friends. The chairmanship at present

\$20,000,000 Syndicate to  
Take Control of North-  
western Forests.

BIG DEAL IS COMPLETED.

Chicago, Ill., Nov. 26.—One of the most important lumber deals of recent years, by which a \$20,000,000 syndicate will take control of the pine forests of northern Minnesota, is near completion.

Representatives of the three big interests involved—the Weyerhaeuser company of Clouet, Minn.; the Cooke & O'Brien company of Duluth and the Edward Hines Lumber company of Chicago—met yesterday at the Union League club to discuss the plan by which the Hines company, either in itself or operating through a syndicate is to take control of the properties.

The interests to be pooled are: Lumber in Minnesota and the province of Ontario controlled by the Weyerhaeuser people, valued at \$8,000,000.

Lumber in Minnesota controlled by the Cooke & O'Brien people, valued at \$11,000,000.

The Rainy Lake, Duluth and Winnipeg railroad, controlled by Cooke & O'Brien, 200 miles long, and worth \$1,000,000.

Between \$1,000,000 and \$2,000,000 worth of lumber controlled by the Hines people.

### PROFITS OF THE DUMP.

Good Money in Many Old Things  
That Are Thrown Away.

"I get," said a Philadelphia dump boss, "a week, free rent and the disposal of any dump of value."

"Tin cans, for instance, belong to me if they are dumped here, and I make a pretty penny out of them. They are turned, you know, into tin soldiers and so forth."

"Corks are another requisite of mine. Many and many an old broken bottle on this dump had a good cork in it. I get 8 cents a pound for all the corks I find."

"Old shoes are never too old to be sold. They have always one good piece—the piece over the instep—that can be used again. The smaller pieces of good leather cut out of them are made into purses and wristlets."

"Eggshells also have value. Something like 1,000,000 pounds of eggshells are used every year in the manufacture of kid gloves and print calicoes."

"Do you see those eighteen barrels behind there? Well, each of those barrels contains its own variety of assortment of marketable dumptage. Each will sell when filled at a good price. There are, I believe, fifty-seven varieties of marketable dumptage, and some dumps yield all the varieties. Mine yields twenty-seven."—Philadelphia Press.

### THE PORCUPINE.

In His Likening For Salt an Acquired  
or a Natural Taste?

Some men who were camping in the Adirondacks several years ago on breaking camp in the autumn left an old tub which was saturated with salt brine. On returning to the same camp the next year they found that the tub had been gnawed until little of it was left. They were not long in finding out what animal had done the work, for the camp was overrun with Canadian porcupines. At night they became such a nuisance that the campers were obliged to kill them to protect their property. The handle of a paddle was gnawed half through.

The explanation of their presence in such numbers during that year, when they had not been noticeably abundant in the previous year, is that they had made a rendezvous of the camp, being attracted by the old brine tub. On this they feasted all winter and for that reason were greatly pleased with the locality.

An interesting query is this: Is the liking for salt an acquired or a natural taste? Were they ever able to gratify that taste to any extent before man gave them a chance to do so?—St. Nicholas.

An extraordinary addition has been made to the exhibition of inventions now being held in Berlin. A shoe-maker named Wegner, living in Strasbourg, has sent in a clock of the grandfather shape, nearly six feet high, made entirely of straw. Wegner has taken fifteen years to construct this strange piece of mechanism. It keeps perfect time, but under the most favorable circumstances cannot last longer than two years.

ent is held by E. M. Haas of this city. Frazer is being boosted as the result of the gains made by the republicans in Rush county at the last election. He is sure to encounter opposition from other sections of the district, as Frazer has those who do not like him, as well as many friends.

## ARCHBOLD TELLS OIL TRADE PERILS

Witness Says He Once Offered  
To Drink All Oil in  
The West.

GOES ON STAND MONDAY.

WILL RENEW HIS STORY OF THE  
WORKINGS OF THE GREAT COR-  
PORATION—TELLS HOW ALL  
BY-PRODUCTS ARE UTILIZED.

New York, Nov. 26.—John D. Archbold told a good deal about the manufacturing and administrative details of the oil business, as regards procuring the supply and marketing it, at Wednesday's Standard Oil hearing. His session on the stand was short but his direct examination will be resumed on Monday.

Mr. Archbold's apprehensions, owing to what he and Mr. Rockefeller call the hazardous nature of their business, seem, according to his testimony, to have been of graver nature than Mr. Rockefeller's. They were such, indeed, he said, that in the '80s he sold Standard Oil stock. He was not required to say whether Mr. Rockefeller bought any shares he disposed of.

While he lacked confidence in this hazardous business, he had great confidence in his judgment, and he told pleasantly of having offered, when approached by people who said that there was oil in the west, to drink all that was found there. If Mr. Archbold's offer had been taken up his task would still be before him. The fields now produce 170,000 barrels a day. He said on Tuesday that there was at present stored in the mid-continental field more oil than would be taken out of the tanks in the next ten years.

### His Memory Was Good.

Mr. Archbold never fell back on the loss of memory, but there were things which he didn't know. He was telling what an extremely important part of the business the manufacture of the by-products had become and in enumerating he was rapid and ample—helped by a bit of paper. Among those which the company now makes up he said were "naphtha, gas oil, fuel oil, paraffin oil, compounded oil, filtered cylinder oils, unfiltered cylinder oils, waxes, candles, greases, coke, pitch, road oils, asphalt and paving resins, roofers' wax, soap stock, cordage oils, acid oil, turpentine and substitutes, petroleum and vaseline."

He admitted that he didn't know the precise nature of all the substances on his little list.

"I may say," he said, "that the work of developing these articles has been one of the most important branches of the Standard Oil company's business. Scientists and experts have been procured both at home and abroad, and we have spared no efforts to discover new uses to which to put our crude supply."

### Spanish Nicknames.

One of the peculiar ways in which Spanish differs from English is in the names the language gives to all people with a certain infirmity or peculiarity. A blind man is referred to as *el ciego*, a man with but one eye is a *tuerto*, a pug nosed man is *chato*, one who is cross eyed is a *bisajo*, a cojo is a lame man, and a man who has but one arm. If he is humpbacked, he is a *jorobado*; if baldheaded, a *calvo*, and if his hair is very short he is a *pelon*. The feminine titles for the same classes are the same, with the exception that they end in "a" where the masculine terminate with "o." These short names are used most commonly. In fact, they are applied as nicknames in many cases, and especially among the lower classes persons are addressed or referred to only by these names.

### A Wedding Present.

A widower in Scotland proposed to and was accepted by a widow whose husband had died but a month or two previously.

To celebrate the occasion he asked the widow's daughter what she would like for a present. She wanted nothing, he said, but being pressed to name something she replied:

"Well, if you want to spend siller you might put up a headstone to my father."—London Telegraph.

### The Ruling Passion.

"John! John!" called the excited little wife.

"What is it, Lucy?" muttered the big baseball player as he drowsily turned over in bed.

"Why, there is a man downstairs." "What's he doing?"

"He's in the dining room after the plate."

"Trying to reach the plate? Put him out, Kelly; put him out at third!"—Kansas City Independent.

### Reproved.

"I suppose," said the sad eyed youth at the musical, "you know the difference between bel canto and coloratura?"

"Young man," answered Mr. Cumrox severely, "I never bet on race horses."—Washington Star.

### Practical.

"Darling, I mean to prove my love for you not by words, but by deeds."

"Oh, George, did you bring the deeds with you?"—Baltimore American.

Never bear more than one kind of trouble at a time. Some people bear three kinds—all they have had, all they have now and all they expect to have.

The pleasantest month of the year at Chamounix and other places in Switzerland was October. But the tourists had all departed and the hotels were closed.

## STRICKLAND WILL APPEAL TO LABOR

Greenfield Man Wants to Be  
Speaker of House.

Indianapolis, Ind., Nov. 26.—Harry Strickland of Greenfield, who is a candidate for speaker of the house, will make a strong bid for the support of organized labor in his contest. Strickland is a union man, and carries a union card. Several years ago he was employed on the Indianapolis Journal, and that time became a member of the Typographical Union. There will be several union men in the next session of the legislature, and Strickland will look to them for support.

## GREENSFORK MAN SHAKING PLUM TREE

Would Be Member of State  
House Engineer's Force.

Greensfork, Ind., Nov. 26.—Samuel E. Stackhouse, one of the faithful democrats of this locality, has seized hold of the official plum tree and is now steadily and firmly shaking it. He hopes to dislodge a plum labeled "a member of the engineer force of the state house." He is now getting up a petition to be signed by Greensfork people which will be presented to governor-elect Marshall.

Five generations of the family of Mr. Pettit, boot dealer of Mexborough, England, are living, his own child being the youngest member. The great-grandmother is ninety and the child is eleven months old.

## Scott's Emulsion

does all it does by virtue of one thing—Power—its power to create power. As fire turns water to steam so Scott's Emulsion transforms thin, impure blood into pure, rich blood, giving nourishment and vital energy to every organ, every tissue and every muscle.

Send this advertisement, together with name of paper in which it appears, your address and four cents to cover postage, and we will send you a "Complete Handy Atlas of the World." SCOTT & BOWNE, 609 Third Avenue, New York.

# Knollenberg's Store

## A Very Special Offering in Handsome Coats and Jackets

A similar offer has never before been made in our CLOAK and SUIT DEPARTMENT. The facts and figures are given herewith and they tell the story. Read every item carefully and decide if there is a coat or jacket among the lot for YOU!

3—BROWN CARACUL JACKETS, handsome fancy effects, former price \$32.00, \$40.00 and \$45.00, to close at ..... \$10.00, \$15.00 and \$20.00

2—PLAIN LONG BLACK CARACUL COATS, up-to-date in style, former price \$28.00 and \$45.00, to close at ..... \$15.00 and \$25.00

1—LONG BLACK CLOTH COAT with large Black Fox Shawl Collar, a splendid Automobile Coat, former price, \$25.00; to close at ..... \$12.50

12—VELOUR JACKETS with Persian vest fronts, very nobby cut, former price \$22.50 to \$30.00; the choice of these at ..... \$14.48

10—LONG VELOUR COATS, Box Back, semi-fitted and tight fitting, plain and braided, former price, \$35.00 to \$45.00; the choice of these at ..... \$25.00

This is one of the startling cuts which means for the customer to pocket a handsome gain and to the other party a corresponding loss. But here's the chance; come and secure a prize. Friday morning the goods will be on sale and the sale will continue until all are sold.

## THE GEO. H. KNOLLENBERG CO.

### SWEET CIDER

Made While You Wait

HADLEY BROS.

### NOTICE

Walker J. Millard,

State Organizer of the Socialist party will speak to the socialists of Richmond and others interested in the movement on socialism and organization, at

Union Hall, 511 Main St.,  
Friday Night, Nov. 27.

All are welcome.

## Skillful Mending of Jewelry.

You have often heard it said that really right repairing was a lost art—that the average mending done nowadays was a bungle. Those who bring their jewelry here to be repaired will find unusual facilities and unsurpassed skill. Nor is that all. When the work is finished we subject it to a rigid inspection to make sure that it is right. Your search for faults will be fruitless. Price as low as the work is good.
