The first half closed with the score 30 to 5 in favor of St. Mary's. In the second half, high school made a much better showing. The locals are not discouraged by this defeat, as it was expected. Some experiments of naturalists of East Prussia have shown the possibility of tracing the migrations of birds, and that such migrations may extend to distances hitherto unsuspected. Many birds captured two years ago were released after being tagged with light foot-rings bearing record numbers and the dates. Some of these marked birds have been reported from far away, a lake fowl, with a ring dated July 26, 1907, having been shot in Tunis, while a stork, with a ring dated July 5, 1907, was killed far south of the equator, near Fort Jameson, Rhodesia. That a stork would travel from north Germany to south Africa was a revelation.

One of the most destructive as well as one of the most offensive pests that afflict the planters of India is the red cotton bug. The insect has been reported as 'acotton pest from every part of the country. Its presence is detected by the offensive odor.

## COLIC CAUSES CRYING AND DEATH RESULTS

**Coroner Files Verdicts in Two Cases Today.**  
The reports of the verdicts of Coroner Brankamp in the cases of Mrs. Percy Bennett and Ralph Mann, were filed with the county clerk today. The coroner found Mrs. Bennett, who resided eight miles south of the city, came to her death from cerebral embolism of cardiac origin.

Ralph Mann was an infant three days old at the time of his death. He was the son of Mr. and Mrs. Harry Mann. The coroner found his death resulted from the effects of severe crying upon a poorly developed heart. The crying was due to colic.

Mrs. J. M. Barrie, wife of the author, is said to be one of the most expert motorists in Great Britain. She owns three cars in which she takes long tours with her husband, but she always manages the car herself.

There is a growing sentiment among the produce dealers in New York city in favor of selling goods by weight instead of by measure. The present method of varying, uncertain measures make a great deal of dissatisfaction among the consumers.
