been made with regard to the tobacco
trust and cotton exchanges. The
cotton exchanges already have been offi-
cially criticised, and as a result New
York and New Orleans have appointed
special committees to confer with the
commissioner of corporations for the
purpose of improving methods of op-
eration and administration.

The investigation of the Interna-
tional Harvester company, has not
been and will not be abandoned. Agents
are in the field inquiring into
its methods and their reports are now
being considered. This investigation
will not be finished for some time. It
is expected the report on the steel
trust will be ready for submission to
congress during the regular session
next year.

State Taxes Lack Uniformity.

One of the interesting publications
forthcoming will relate to the attitude
of the states in regard to the taxation
of corporations.

This report will be worthy of es-
pecial attention in view of the discussion
on the question of raising federal rev-
enue by imposing a national tax upon
corporations engaged in interstate
business. It was recently suggested to
President Taft that a tax of 2 per
cent be applied upon dividends of
such corporations. Secretary Mac-
Veagh estimated that the total rev-
enue which would be derived from
this source would be only \$15,000,000.
Moreover, it became apparent that the
tax would not be equitable since there
are many "close corporations" which
do not pay dividends, but dispose of
the profits by paying large salaries.
The democrats urge a tax of one
fourth of 1 per cent upon the gross
receipts of all corporations engaged in
interstate commerce, estimating a
revenue of about \$40,000,000. There is
no likelihood that the democratic pro-
position will prevail.

No New Inquiries Begun.

No new investigations have been
begun by the bureau of corporations,
nor is it probable that under its pres-
ent organization it will do more than
complete the work in which it is now
engaged. The regulation of corpora-
tions has greatly advanced during
the last five years. Commissioner of
Corporations Smith believes the time
has come for a further advance. He
would like to see established a broad
system of corporation publicity through
a federal office, such a system to provide
for the conference and cooperation of all
interests.

A man more absolutely governed
by pure reason than Lord Macaulay
could not well be found, but in his
diary he refers to an after-dinner talk
about the feeling which Johnson had
—of thinking oneself bound to touch
a particular rail or post and to tread
in the middle of a paving stone, and
he adds: "I certainly have this very
strongly."

**Apostle Of Free Love Is Now
Denounced by English Church**

For the first time an election in
Germany has been held up by a woman.

A baroness in Westphalia was
entitled to cast a proxy vote at a municipal
election. Finding that her name had
been left off the registry, the
baroness protested. When her protest
was unheeded and the election was
held she appealed to the law. The
courts promptly pushed the
elector and ordered it held over again

so that the baroness could cast her
vote.

civil code declaring that the wife owes
obedience to her husband. Some of
the most distinguished women in the
country are said to be behind the
movement.
