

Have not coughed once all day?
Yet you may cough tomorrow! Better be prepared for it when it comes. Ask your doctor about keeping Ayer's Cherry Pectoral in the house. Then when the hard cold or cough first appears you have a doctor's medicine at hand. Your doctor's approval of its use will certainly set all doubt at rest. Do as he says.

LARGEST EVENT BARS BALLOONS

The Classy Event of Indianapolis Will Be a Great Drawing Card.

ARMY IS MUCH INTERESTED

OFFICERS ATTACHED TO THE SIGNAL CORPS WILL BE DETAILED BY THE WAR DEPARTMENT TO WATCH RACES.

Indianapolis, May 1.—Big balloons and little balloons are to have a show on the day of the national balloon race, which starts from the motor speedway, west of the city, June 6. The national balloon race will be watched by aeronauts all over the world, and they will also be able to watch another race—a handicap event for balloons not eligible for the big race because of their size.

Under the rules of the Aero Club of America, balloons participating in the national event must have a maximum capacity of not more than 77,000 cubic feet with a five per cent allowance for oversize. This rule necessarily eliminates balloons of larger capacity from the race. It might be said that the balloons much smaller than 77,000 cubic feet are also eliminated for the reason that their small size would be too great a handicap in a race that is expected to go hundreds of miles.

Making a Clamor.

The owners of several small balloons and the "too large" balloons are clamoring for a race, and they are to be accommodated by the Aero Club of Indiana, which will arrange for a handicap race in addition to the national event. Already there are three entries for the handicap event and one of the balloons in this race will be Coey's Chicago, a gas bag of 100,000 cubic feet capacity, which was used by C. G. Fisher of this city last fall in taking an automobile into the clouds. The Coey balloon will be the "scratch" balloon, as it is the largest one ever constructed. The handicap race will be started after the racers in the national event are on their way. Coey would have such a tremendous advantage that it is not improbable that he will be able to go a farther distance than the fliers in the national race.

Army Officers Interested.

The nation al balloon race is attracting the attention of the army officials interested in air navigation and war balloons, and many of them will be present to watch the start of the races. At several army posts about the country war balloons have been operated partly for the advantage of troops so that the soldiers would receive all the knowledge possible about ballooning.

Man Arrested Who Is Familiar With a Hundred or More Jails.

NEEDED NO INSTRUCTION

The man without a home was arrested yesterday afternoon at Twelfth and North G streets by Patrolman Bundy. He gave the name of H. J. Golins. He was taken into custody after calling at the Brandenburg grocery and asking for a "handout." When it was refused he cursed the man in charge and made threats that led to an officer being sent for. "If I were not going where I am, I'd tap that—place tonight," remarked Golins, to the policeman, as he was getting into the patrol wagon. "I've done it before, and I know how," he added. At the city jail Golins held up his arms ready to be searched without being told to do so by the policeman. "I know all about that part of it," he said. "I've been in a hundred different jails and there ain't nothing you can tell me about 'em. I know every cop in Indianapolis." He began to enumerate them as he continued to boast of his past prowess, but the officer slammed the iron door on him and left him in solitude.
