GOING ABOUT IN CHINA.

Useful Sedan Chair in the Crowded,

Noisy Streets of Canton.

There are but two ways to go about

Canton—on foot or in a sedan chair.

The streets are from four to eight feet

wide, the average being probably about

six feet, and wheeled vehicles are out

of the question. Even the jinrikisha

cannot be used here. If you try to

make your way on foot, the density of

the moving masses renders progress al-

most impossible, and rowdies and pick-

pockets are numerous, so that the best

plan is to take a responsible native

guide and chair.

The chairs are carried by two, three

and sometimes four men, according to

the weight of the passenger. The two

bamboo poles by which the chair is

supported are about eighteen feet long

and are joined at the front and rear

ends by a crosspiece. After you have

taken your seat the coolies raise the

ends of the poles to their shoulders

and are off at a trot, only inter-

rupted by a "congestion of traffic,"

which occurs very frequently.

It is surprising to see how rapidly

they can go through the crowded

streets. The whole line of chair car-

riers are yelling all the time, as are

other people who are carrying burdens,

for as there are no carts in use the

entire merchandise of the city is trans-

ported in the same manner, not by

chairs, of course, but slung on poles

carried across the shoulders.

The noise resulting from the simul-

taneous shouting of every one in sight,

both in front and in the rear, for the

stream is flowing in both directions, is

enough to make one wonder if the long

expected riot has begun.—Denver Post.

To Transfer Printing.

Anything printed on paper with ordi-

nary printer's ink can be transferred

to a clean sheet of paper in the follow-

ing manner: Take three drams of com-

mon yellow soap and dissolve it in one

quart of hot water. When cool add

one and a half fluid ounces of spirits

of turpentine. Put all in a bottle, cork

it and shake well together. Take a

sponge or soft brush and apply some

of the solution to the printed surface.

Let it soak for a few minutes. Lay it

face down upon the paper on which

the transfer is required and press both

together evenly between the leaves

of a thick book placed under weights.

In a time varying from half a minute

to several hours, according to the new-

ness of the printed original, it will be
