

QUAKER COLLEGE WILL SURPRISE OLD GRADUATES

Will Be Astonished at the Remarkable Growth That the Institution Has Made in Recent Years.

HUNDREDS EXPECTED
ATTEND CELEBRATION

Banquet Will Be Served Tuesday Evening and Covers Will Be Laid for 600—Program Is Good.

Will Earlham College, which institution of learning, has just passed its fiftieth milestone, be recognized by many of the visitors, former students of the college, who attended the school back in the sixties, seventies, eighties, and even in the nineties, when they visit the college next Tuesday?

Such a question has been asked by those familiar with the institution of yesterday and today. Many who have followed the improvements and additions, year by year, for the past forty years, believe that they will not. The biggest treat in store for these visitors will be the institution itself and there is no doubt but that all will return to their homes as much in love with the college of today, as they were when they themselves were the students. It is predicted that their alma mater will receive an advertisement from coast to coast and from the great lakes to the Gulf of Mexico, as being one of the most advanced colleges in the country.

Expert Six Hundred.

Everything at the college is in a state of preparation for the receiving and entertaining of the large number of alumni and former students. Of these there are at least 600 expected to again visit the school and participate in exercises, or what might be called the "home coming" celebration.

The events of next Tuesday, which is set aside for the semi-centennial celebration, will be climaxed by the banquet to be given in the evening, commencing at 6 o'clock and lasting until late in the night. It will be held in the auditorium and upper floor of Lindley Hall. Nearly all preparation for this event has been completed. The arrangements of toasts to which former students will respond has not been completed. Judge George Vinson Carter of the appellate court of Indianapolis will act as toast master, and the following will respond to toasts: A. M. Hussey, Indianapolis; S. W. Haynes, Indianapolis; Albert Votaw, Philadelphia; Prof. Sackett of Purdue University; Mrs. Charles Rowland of Marion; Mrs. Rufus Kersey of Arizona, Ohio; Morris White of Milford, Indiana; Rayner Kelsey of California; Mrs. Elliott of Carthage, Indiana; Allen Joy of this city, and E. G. Hill, also of this city. Each speaker will select his own subject. A few have been heard from and the complete list is expected by tomorrow's mail, in time for a program to be prepared late Monday.

Afternoon Exercises.

In making the arrangements for the banquet, the committee has ordered 600 covers be laid. If there are not sufficient room to accommodate the banqueters in the auditorium, the large double doors will be removed and tables placed in the spacious corridors. While the banquet will be the principal event of the day, the exercises in the afternoon at the auditorium will be especially appropriate and pleasing to students and visitors. This meeting will be in the nature of a public celebration of the anniversary. It will be featured by addresses of some of the members of the college faculty and also by old students.

THRILLING WERE THE ADVENTURES OF CAPT. LEWIS

(Continued From Page One.)

given each one. They immediately, after their release and recovery from the shock, went to teaching the natives Christianity. As a result of several weeks' effort, the villagers became thoroughly converted.

At Tonguoo, another native village, not far from Humbumilla, according to distance as measured in India, the two men were placed in the public stocks for several weeks. The hot sun beat down on them in the day time, and to increase their agony the natives gave them but little rice and muddy water for food. They were the mark for public insult and attack, and after release were but skeletons of their former selves.

The trips taken by Mr. Lewis and Mr. Plumridge were very long ones, and at one time they were in the jungle for thirteen months without even seeing a white man. Wherever possible they travelled by wheel but much of the distance they had to walk and pull their wheels after them. On one trip they went across India on a 11,000 mile journey, riding when possible, and literally cutting their way through the jungle.

Ill Six months. Sickness is one of the greatest things to contend with in India. He recalled of one instance when he was ill for six months with malaria and was not able to rise from his bed during the entire time. Mosquitoes are

largely responsible for the prevalence of the disease.

Again the natural poverty of the people and the famine frequently experienced, cause much sickness and death. He was located at Poona, India, during the famine of 1880, which was probably the worst ever had in that country. Mr. Lewis spoke of whole villages, consisting of several hundred men, women and children, who were so weak from the lack of food that they could hardly walk. Many a person appealing for aid at the mission headquarters was so thin that his bones fairly rattled when he walked, or more appropriately, crept over the ground. Babies died by the hundreds and they were piled in one place and burned. The dead bodies were also allowed to lie where vultures and other birds of prey could eat the flesh and afterwards the bones were burned. After twelve years' labor in India, Lewis and his friend were assigned to more congenial quarters. "Hallelujah Bob" being sent to England and Lewis to this country. He still holds intense love for the work in India and expects some day to revisit the scenes of his first missionary work.

Y. M. C. A. OUTFIT WINS FIRST GAME

Institution Lads Beat Athletics
In Fierce Slugging
Match.

EASTHAVEN WAS WINNER

STARR PIANO TEAM WAS SHUT OUT, DESPITE BULLA'S GOOD PITCHING, AND TWO TEAMS ARE TIED FOR FIRST PLACE.

CITY LEAGUE STANDING.

Yesterday's Scores.

The Y. M. C. A. boys won their first game of the season in a ragged fielding game at the Athletic park. The score was just double that made by their opponents. Longstreth caught six innings of the game with the blood exuding from beneath the battered nail of a finger on his right hand. There was plenty of bonehead playing on both sides but the boys will wear this off with a little more experience. Johnson was forced from the box after one inning. Score:

Stolen bases—Johnson, Fry, Hopping, 2; Buening, 2; Nolan, 2; Starr, 2; Hiatt, Myers, O. Hiatt, Copenbaum. Three-base hit—Allison. Two-base hits—Johnson, Nolan, Winsett, Buening, O. Hiatt. Struck out—By Hiatt 7; by Fry 2; bases on balls—Off Hiatt 1; off Johnson 1; off Fry 4. Double play—O. Hiatt to Allison.

Bulla Was in Form. Hits were few and errors numerous in the Starr-Easthaven game on the hospital diamond. The errors of the musicians were costly. They were forced from their leadership of the league and given the first shut out of the season. Bulla fought nearly the entire game for the Stars and had thirteen strikeouts to his credit. Yaggy twirled good ball. Score:

COMMISSION WILL MAKE INSPECTION

Waterways Board Will Examine Mississippi River For 1,000 Miles.

IMPROVEMENTS PLANNED

AFTER THIS WORK COMMISSIONERS WILL GO TO EUROPE TO STUDY USES RIVERS ARE PUT TO OVER THERE.

St. Paul, Minn., June 12.—One thousand miles of the Mississippi river will be inspected in a most thorough manner by the inland waterways commission, acting under instructions from congress, the work to be performed within the next two months. After completing the examination of the sections of the river for which deep water channel plans are under consideration, the commission will complete its work by visiting Europe and making a very careful study of the uses to which rivers are put in the old world.

Official announcements state that the commission will meet in Buffalo on July 1, proceeding up the lakes to Duluth and thence to St. Paul, making this the starting point for the long down-river journey, upon which the commissioners will be accompanied by prominent government engineers engaged in river work.

High Dam Question. The commission will be met at St. Paul by prominent business men interested in the deeper channel project and several important matters including the proposed harbor plans for St. Paul, the improvement of the Minnesota river and the high dam question which covers proposed work between St. Paul and Minneapolis.

From St. Paul the route of the commission will be down the river to the mouth of the Ohio, inspecting the work in progress at various points and investigating recent developments in the improvement plan. The commissioners will not inspect the lower river but will leave late in July for Germany. After a study of German methods of making rivers transport bulky freight, the commission will proceed to Holland to study the canals of that country, visiting England, France and Austria in turn.

From the head of navigation at St. Paul to the mouth of the Ohio the trip will be made on government boats. All the expenses of the investigation are to be borne by the government.

RICHMOND CROWD AT CELEBRATION TO HAVE PARADE

Quaker Delegation to Dayton
Next Friday Will Show Gem
City People What Enter-
prise Is.

AUTOISTS URGED TO
ATTEND THE AFFAIR

Local Delegation Will Attend
The Ceremony of Giving
Medals to Wrights in Body
—A Big Event.

Boost a Bit. Here, you discontented knocker. Growlin' 'bout the country's ills; Chloroform yer dismal talker; Take a course o' liver pills. Stop yer durn ki-toese howlin'. Chaw some sand an' git some grit; Don't sit in the dumps o-growlin'. Jump the roost An' boost A bit.

"Fall in while the band's a-playin'. Ketch the step an' march along— 'Stead o' pessimistic brayin', Jine the halleluyer song. Drop yer hammer—do some rootin'— Grab a horn, you cuss, an' split Every echo with yer tootin'; Jump the roost An' boost A bit.

Richmond's delegation to Dayton, Friday, June 18, will be accorded the privilege of parading in the morning. For this reason and in order that the city may be properly represented it is the urgent desire if the "boosters' committee" that as many as possible be found in the Buckeye city on that day who claim this city as their residence.

As a spectacular feature it is requested that as many automobiles who can find it possible to go from this city to Dayton in their machines. They will form in line at the Auto Inn and be furnished with the banner of the Richmond delegation. After arriving at Dayton they will meet at an appointed place and await the arrival of those who make the trip by traction and steam. With the drum and bugle corps the automobiles and the hundreds of marchers, this city can make a favorable impression on the thousands who will throng the city.

Go to Fair Grounds. After the down town district is covered by the paraders the line of march to the fair grounds will be taken up. The presentation of the medals to the Wright brothers will be made there. Accommodations have been provided for an enormous crowd. About 2,500 school children dressed in red, white and blue capes will be so arranged in formation as to represent the national emblem. They will sing patriotic songs.

Eight companies of the Second Infantry on duty at Fort Thomas, Ky., left the fort Friday and will march to Dayton. They will arrive in time to be present at the Wright celebration. They will be assigned a prominent place in the parade and will prove an added feature.

A Dayton paper says of the arrangements: The largest crowd that has ever been in Dayton in any one day in the history of the city will be within the confines of the municipality on the two days of the Wright Brothers' Home Celebration. This is forecasted by all news which the general committees are receiving daily and each hour. Reports from various cities all over the country are coming in, and the committee now believes that no less than 150,000 strangers will be within Dayton's gates on Friday, which is the real big day.

The schedules to be followed show that the crowds will begin to swarm in on Thursday afternoon and Friday morning. By afternoon it is expected that the city will be jammed. Some cities are planning to be here almost in their entirety. It is safe to say that the biggest aggregation of humanity ever assembled in Dayton will be walking the streets.

The people have begun to awaken to the fact that it means to have a \$20,000 celebration. The construction of the court of honor has been greatly instrumental in this. If the majority of people could see some of the finished fronts at Welfare hall and the uniforms that have arrived, they would realize more than ever the stupendous undertaking that is to be carried out. And it is announced that practically everything is arranged for.

JEFFRIES IS NOT TO BE OFFICIAL

Declines to Referee Johnson-Ketchel Mill.

Montreal, Que., June 12.—James J. Jeffries, champion pugilist, refuses to referee the fight between Stanley Ketchel and "Doc" Johnson next November, although requested by Ketchel to act. Jeffries said today: "Ketchel wants me to referee his fight with Johnson, but right here I am, I am beat and cool with Ketchel in that fight. I want to see him win."

LIGNITE FUEL IS A GREAT HEATER

This Demonstrated by Experiments Which Have Just Been Finished.

TEXAS TO BE BENEFITED

DIFFICULTIES IN TRANSPORTING THIS FUEL HAVE BEEN OVERCOME BY THE NEW BRIQUETTING PROCESS.

San Antonio, Texas, June 12.—Experiments are just being completed by the United States government at Pittsburgh, which have demonstrated that the making of briquettes from lignite or brown coal enormously increases the heating property of this kind of fuel. This has given an impetus to the development of lignite mines in the San Antonio country. This part of Texas has one of the largest and finest deposits of lignite coal in the United States, although North Dakota is a close second.

Beginning some ten miles from the city and extending probably fifty or sixty miles to the south, with a width of probably fifty miles, is a tract of country underlaid with lignite coal. Within the past year a group of St. Louis capitalists have acquired large holdings in this section. They say that as soon as the new railroad projected south passes through their coal lands they will begin the development of their coal properties.

What Drawback Was. The drawback in handling lignite coal heretofore has been the difficulty in transporting it, as it is brittle and tends to go to trash. The briquetting process overcomes this and at the same time increases by pressure the heating properties of the product. The development of this great coal field will, according to the government experts, solve the fuel problem of Texas. The fact that this state is at a distance from the bituminous and anthracite coal fields has tended in those sections where oil is not found to retard manufacturing development.

The opening up of this great lignite field, together with the briquetting method, promises a great manufacturing development for this section. The government experts point out that in burning the lignite coal a very rich gas is produced which can be readily utilized in a gas combustion engine which will furnish power for a dynamo. This power can be readily transmitted to the cities for use in manufacturing, electric lights, etc. The United States Steel plant at Gary, Indiana, has all of its 40,000 horse power furnished by the potential energy of escaping gases from blast furnaces.

The experiments at Pittsburgh, have been made with Texas lignite and the process hence applies to this section. It is a process which has been brought to perfection in Germany. The results achieved are without question the most important industrial discovery of the year to Texas.

San Antonio, Texas, June 12.—Tomorrow will be observed in Roman Catholic churches all over the world as St. Anthony's or San Antonio's Day. St. Anthony, or San Antonio, is the name that was given to one of the early saints of the church. He is regarded as the patron saint of this city and special celebration of the day will be held here. He was at one time known as San Fernando. The beautiful and historic San Fernando Cathedral in this city was named in his honor.

The Oblate Fathers of San Antonio have in their possession some relics of the saint which came direct from Rome as a special favor from the Pope. These consist of a bone, a lock of hair, and a piece of the vesture of the saint. They are mounted in gold and are kept at the home of the Oblate Fathers on St. Mary's street in this city. These sacred relics will be exhibited on San Antonio Day and sermons will be delivered in the various churches on the life and work of St. Anthony.

The Pig in Water. Of pigs it is commonly reported that so queerly fashioned are they that if they attempt to swim they cut their throats with their fore feet, but this is only an old wife's fable. Whether wild or tame, they are all good swimmers, though, owing to the shortness of their legs, they just touch their throats with their fore feet and beat the water very high. Many of the islands of the southern seas are now inhabited by wild pigs, which are the descendants of those which have swum ashore, sometimes great distances, from wrecked vessels.—Farmers' Weekly.

CALDWELL NOT HERE

George Caldwell of the firm of Caldwell and Drake, contractors erecting the Y. M. C. A. building, did not come to the city today to effect a final settlement with the officials of the association. No word was received from him as to his reason for delaying the matter further.

PHOENIX SHIRT CO.

Factory, 3th and Main. Phone 2367

Our shirts have grown in favor with a great many people in Richmond for the simple reason that they are able to get a fit, and get exclusive patterns. They are the kind you can wear in comfort. The kind that never pulls or draws tight, but fits so well that they don't seem to touch you anywhere. They're made so the collars and cuffs know just where to stay.
