LOST. LOST—Ladies breast pin near Main

he craves the treatment. I know one young woman who makes a fair living by calling at the homes of electricity victims and dosing them with a few shocks from a galvanic battery. Most slaves to the habit have their own batteries, but they are afraid to apply the treatment to themselves. That is practically a groundless fear, for there isn't one chance in a thousand of a person giving himself an overdose. Still they prefer an experienced hand to manage the current. Not all the electricity fiends are invalids by any means. Many of them are now as well as they ever were, yet they have become so addicted to the habit that they require the weekly, semi-weekly or possibly daily electric thrills to tone them up."—New York Post.

THE ELECTRICITY HABIT.

There is One Thing in Its Favor—it is Usually Beneficial.

"Of all the habits the one that sticks closest to a fellow is the electricity habit," said a young doctor. "The drink habit and the cocaine habit are mere summer fancies compared with it. But there is one thing to be said in its favor—it is usually beneficial. The electricity habit is contracted just like any other habit. A few currents are administered during an illness. They strengthen and stimulate, and the first thing the patient knows he finds the tonic indispensable. When after he gets well

"Do you think so?" he asked.
