"Lady Killer."

SUED BY FIRST AFFINITY

WOMAN FOR WHOM HE DIVORCED

IS UNBALANCED.

(American News Service)

New York, Sept. 1.—Ferdinand Pinney Earle today is in Europe with Miss Gertrude Buell Dunn, his new "affinity," or "mental mate," as he calls her. The two are traveling as brother and sister under assumed names, and their exact whereabouts are known only to Earle's most intimate friends.

Miss Dunn, a writer, artist and horsewoman, is only twenty-six years old and is the absolute opposite type of Earle's famous affinity, Julia Kuttner, who is suing to annul their marriage. The latter declares Earle is insane.

"We are going to work out our destinies according to our ideals. We are determined never to marry," was the word Earle left with his friends before his departure.

Miss Dunn Pretty.

Miss Dunn is described by her friends as a remarkably pretty and attractive woman. Her mother lives in California, where the latest "soul mate" was born. Miss Dunn came here about three years ago, after figuring in a somewhat sensational episode at Glenwood Springs, Colorado, where she was pictured as a member of Theodore Roosevelt's hunting party.

Attired in a short skirt and riding astride a spirited horse, she wheeled into line just behind the president's a photographer was snapping the party returning from a hunt in the spring of 1905. So incensed was Mr. Roosevelt that he issued what amounted to an executive order, through Secretary Loeb, that the plates should be destroyed or the girl's face eliminated from the prints. The order was obeyed, but not until a copy of the complete had been published by a Denver newspaper.

At that time Miss Dunn was a correspondent for Denver and eastern newspapers. Soon afterward she went to Chicago where her brother, Ballard Dunn, is city editor of a Chicago newspaper. Later she came to New York to study art.

Where She Met Him.

It was while she was a house guest of Mr. and Mrs. Charles Haag, at their country place at Silver Mine, on the outskirts of Norwalk, Conn., that she met Earle last spring.

After three weeks he convinced Miss Dunn that he and she were soul mates, the exact complements of each other.

Before Miss Dunn left Norwalk she had received an invitation from Earle to visit him at his Castle-like home, and up to the final clang of the gong, was forcing the issue for all he was worth.

This Was in France.

An American millionaire while driving an automobile in France ran over and killed a dog. Near the scene of the accident was a peasant, presumably owner of the dog. To him the millionaire gave a bank note. But the peasant was not the owner of the dog, and he was honest, but before he could make up his mind to return the money the automobile and its driver were beyond recall. None the less, the peasant would not keep the bill, and when the automobilist rode past that place some months later he discovered the dog's skeleton at the side of the road with the bank note attached to it and a pencilled line calling attention to the mistake.

How Slaves Treated Rheumatism. Every colored man of the old slavery days understood the treatment of rheumatism often better than the most skilled medical graduate. The colored people are peculiarly subject to rheumatism and learned to treat it themselves, with great success. The system that they employed was that of mechanical manipulation and consisted of rubbing, pummeling and pressure either with the hand or by means of a compress. If one method did not answer, they tried another and in one of the three were almost certain to secure relief and by persistent use a permanent cure.

The Egg and the Chick. An egg weighs about two ounces, of which fifty grains compose the shell. When six months old the clear meat is one-third more than the bone. Yet cases are known where the weight of the chick has been nearly as great as that of the egg, less the shell, when the egg was put under the hen. A chick should gain three ounces a week after the sixth week if well fed.

Mark Twain's Definition. It is told of Mark Twain that during a conversation with a young lady of his acquaintance he had occasion to mention the word dry dock. "What is a dry dock, Mr. Clemens?" she asked. "A thrifty physician," replied the humorist.—Boston Herald.

## Jim Jeffries Cables His Acceptance

San Francisco, Sept. 1.—Sam Berge received a cablegram from Jeffries, from Carlsbad, Germany, ratifying the action of Berger in arranging articles for a fight between Jeffries and Jack Johnson. The cable reads: "Agreement satisfactory. Inform newspapers. Your action authorized by me."

Berge, naturally, is elated over the complete ratification from Jeffries, and declares it makes certain a heavyweight fight will take place.

"There never was a doubt in mind," said Berger, "that the fight would take place. When Jeffries left for Germany he left everything in my hands, only asking me to leave the final signing of articles until he returned. When he reached Plymouth he may have thought that the final articles had been signed. I cabled him what I had done, and also wrote him a long explanatory letter. This letter just about reached him before the cable."

"The big chap will return to this country inside of six weeks, and I hope by that time to have arranged with some club to handle the fight. The articles may be signed as soon as he returns, and then we can go into training quarters."

"I have an engagement to see Coffroth, and will also find out what Tom McCarrey is willing to do. Then I will be in a position to take some action definitely."

(American News Service)

Pittsburg, Sept. 1.—The courtship of John Parker, 30 years old and handsome, and Miss Mary Curtin, aged 16, and of unusual beauty, culminated in an elopement to Youngstown, the Gretna-green of the steel city. John was astounded to learn when the bride gave her name as Cecilia, that he had eloped with the winsome twin of his sweetheart, who looks so much like Mary that her own mother can only tell the twins apart by a slight difference in their front teeth.

John concluded, however, that since the girls were enough alike to fool him he would go through with the ceremony and be happy. Cecilia laughed and said she loved John and wanted to be married.

## INDIANS AND BULLETS.

A Sample of the Strenuous Life of Kentucky in 1777.

In 1777, while Harrodsburg, Ky., was so beset with Indians that the inhabitants were in straits for daily bread, a young man, only sixteen years old, made himself extremely useful by venturing out of the fort before daybreak and returning with a load of game after nightfall. This in rapid youth was James Ray, after ward General Ray.

One day in the year just mentioned Ray and another young man were shooting at a mark near the fort, when the second man was suddenly shot down by the Indians. Ray looked in the direction whence the shot had come, saw the enemy and was on the point of raising his rifle when he was set upon by another band, who crept near him unseen.

He took to his heels, and, being a quick runner, reached the fort amid a shower of bullets; but the gates were shut, and the men inside were so frightened that they dared not open them. Finding himself shut out, Ray threw himself flat on the ground in the rear of a stump, and here, perhaps seven steps from the fort and within sight of his mother, he lay for four hours, while the bullets of the Indians tore up the ground on either side of him.

At last he grew impatient and called out to the garrison: "For heaven's sake, dig a hole under the cabin wall and take me in!" The men inside set to work immediately, and the brave young hunter was speedily safe inside the fort.

## WATER AT SCHOOLS WILL BE EXAMINED

County Board of Education  
Today Orders an Analysis to Be Made.

## SCHOOL BOOKS ADOPTED

BOARD ALSO APPROVES OF LAW  
REQUIRING SINGING OF STAR  
SPANGLED BANNER AND SHOW-  
ING OF FLAG.

Samples of water from the different wells located on school properties in the county and which supply drinking water for the pupils, will be sent to the state chemist for examination, to determine quality, according to a decision reached this morning at the meeting of the county board of education.

The board, which includes the township trustees and presidents of the different school boards, is very anxious that the health of the pupils be preserved. Not only will the water be analyzed, but the different school buildings and premises thoroughly fumigated and disinfected.

Approve of Law.

The board also discussed the recent law which compelled the schools to be opened with the singing of the Star Spangled Banner. All agreed that this was a good thing, as it prompted love of country on the part of the students. The teachers will be instructed to observe this law closely and also to see that the United States flag is exhibited from the school building masts every day.

Text books for the high schools were adopted. There were but one or two changes and additions. Commercial geographies were adopted, as this has been added to all high school courses. The reports of the special committees of school teachers, appointed at the county institute, last week, to adopt school books, were followed in nearly every instance by the board.

Governor Hughes Must Hear  
Charges Made Against  
Mayor McClellan.

## A SUSPENSION PROBABLE

(American News Service)

New York, Sept. 1.—It is conceded among politicians today that Governor Hughes cannot ignore the charges preferred against Mayor McClellan by Borough President Bird S. Coler, but there is no intimation as to what the governor may do. He may hold a hearing or appoint a commission to investigate. He can suspend the mayor for thirty days, pending a hearing. If the governor should remove him the mayor has no appeal.

Mayor McClellan is expected in the city Saturday. His friends laugh at the charges. It was not the first time accusations against him have been filed with the governor. Dr. Parkhurst forwarded charges against Mayor McClellan for alleged failure to enforce the Sunday law.

Borough President Coler today refused to discuss his charges saying that they speak for themselves. The document forwarded to Albany charges the mayor with misuse of authority and misapplication of public funds. Coler refers to the commissioners of accounts as McClellan's tools who threaten, intimidate and torture witnesses. He declares they are beginning to destroy public confidence in the borough president, to whom he was politically under personal hostility.
