is what some physicians have called patent medicines, and it is undeniably true that some are frauds and some are even worse, because they are injurious. The Elektrotechnische Anzeiger of recent date contains an article by E. Stadelmann, citing many facts to show that electricity was not unknown to the ancients, and that George Eber's suggestion in a novel that the Egyptians made use of lightning conductors was well founded. Instruments much like the modern heliograph were also used, the writer says, by priests, as a means of communication between temples. There can be no doubt, he says, as to the temple having been protected by lightning rods. The biblical descriptions show that the roof was provided with metallic points held aloft by columns, and that these points, ending in chains, terminated in great water tanks.
