The international date line is an irregular line drawn arbitrarily on the map of the Pacific ocean near the one hundred and eightieth meridian of longitude, marking the place where navigators change their date on the trans-Pacific voyage. This change is necessary on account of the lengthening of one hour for every fifteen degrees of travel westward. By traveling eastward a day will be gained, westward a day will be lost.—New York American.

"Yes, sir."

"Do you think any one will respect you if you do tricks like that?"

"I dunno."

"Suppose I had a watch without any work and I sold it to a man for \$100. Would you have any respect for me?"

## Anty Drudge Tells How to Avoid Accidents.

Anty Drudge—"Goodness gracious! Have you and Jimmy been in a train wreck?"

Mrs. Wontlearn—"Worse than that—washboiler upset when I was stirring the clothes; and I had to hire Mrs. O'Sullivan to do the washing after all."

Anty Drudge—"Well, the damage is done. But perhaps now you'll take my advice and do your washing with Fels-Naptha in cool or lukewarm water. It'll save you lots of work, save your clothes and prevent accidents like this."

So easy, says every woman, after her first trial of the Fels-Naptha way of washing.

And so quick, and such a clean, sweet smelling batch of clothes!

And that, too, without boiling or scalding hot water!

And no back-breaking work on the wash-board!

And yet, perhaps, that same delighted woman had been going to try Fels-Naptha almost every washday for years before she actually did. For some reason or other (which is no reason at all) she kept on working the old-fashioned, out-of-date way until a sudden impulse determined her to try Fels-Naptha. And then ever afterwards—so easy washdays.

Be sure and use Fels-Naptha the Fels-Naptha way. Follow directions on the red and green wrapper.

## WANT LEVEE BUILT

A petition signed by Richard Housewirth and forty-one other residents of Washington township, was presented to the county commissioners yesterday afternoon, requesting the commissioners to order a levee built from the McGrew bridge to a point thirty rods east of there. The petitioners claim that the creek washes the road and makes it practically impassable. The levee, if constructed will be built from two to five feet high.

The students at Bryn Mawr have formed a self-government club, the object of which is to abolish all teasing of young girls just entering college. The club is made up from the upper classes and has the approval of President Thomas.
