

## FORMER GOVERNOR IN AN ACCIDENT

Andrew L. Harris and Wife, of Eaton, Painfully Injured Here, Sunday.

### MACHINE STRUCK BY A CAR

AS THE FORMER CHIEF EXECUTIVE OF OHIO WAS TRYING TO DODGE A BUGGY ON MAIN STREET—RETURN HOME.

Former Governor Andrew L. Harris, of Ohio, and his wife, while riding in their automobile yesterday afternoon, collided with a street car at Twenty-first and Main streets, and received painful, but not serious injuries. His injuries included a small scalp wound on the left side; his left ear cut, requiring two stitches to close the wound, and bruises about the body. Mrs. Harris suffered a sprained arm and body bruises. Both were able to take an interurban car for their home near Eaton, soon after the accident.

Ex-Governor Harris, who was driving the runabout, stated that as he was going north on South Twenty-first street, he met a buggy going west on Main street, and it was necessary for him to turn to the west in order to avoid a collision. He was not familiar with the fact that the street cars were operating on the south side track due to the repairs under progress on the north side track, and gave little thought of a street car accident.

#### Turned Onto Track.

When he turned onto the south track the machine was struck from the rear by a city street car, with sufficient force to damage the machine considerably and throw both of its occupants to the ground. The car was stopped almost immediately after the collision. Mr. and Mrs. Harris were removed to a nearby residence and the city ambulance and three physicians were called. Mr. Harris refused to use the ambulance, saying that neither his nor his wife's injuries were of such a nature as to necessitate their going to the hospital.

Mr. Harris placed no blame on the street car company employee, saying that he was as much to blame as any one else.

Mr. Harris was elected to the office of lieutenant governor during the administration of Governor Patterson, and upon the latter's death, assumed the reins of the governorship. He was defeated for re-election by Judson Harmon, the present incumbent.

## TO OPERATE ON HIM

Dr. S. R. Lyons, pastor of Reid Memorial church, who several weeks ago was thrown from his wheel on North A street, near Tenth street, by striking a rope stretched across the street, and sustaining a broken left collar bone and other injuries, will have to submit to an operation, because the collar bone has not healed properly.

The operation will consist of wiring the ends of the bones together and will necessitate him remaining in one position for about two weeks. The operation, while delicate, is not considered a dangerous one.

## GRIEVED TO DEATH

(American News Service) Springfield, Mass., Nov. 29.—Grieving because of the death of his father in China, one of the Chinese students who arrived in this city two weeks ago was today adjudged insane and committed to the Northampton asylum. The young student was one of a party of 51 youths sent here by the Chinese government to study in American schools.

Clearly Unprejudiced.

The attorney for the prosecution was examining the talesman with the bushy whiskers.

"Mr. Skiles," he said, "you say you have read about this case. Have you formed or expressed any opinion concerning it?"

"No, sir," responded the possible juror. "I never believe nothin' I see in the newspapers."—Chicago Tribune.

## DEEDS, NOT WORDS.

Richmond People Have Absolute Proof of Deeds at Home.

It's not words but deeds that prove true merit. The deeds of Doan's Kidney Pills, For Richmond kidney sufferers, have made their local reputation. Proof lies in the testimony of Richmond people who have been cured to stay cured.

Benjamin F. Lunsford, N. E. Cor. Twentieth & South B Streets, Richmond, Ind., says: "The statement I gave for publication in 1906 endorsing Doan's Kidney Pills told of my experience with this remedy and at this time I am glad to confirm what I then said. I had been bothered by kidney trouble off and on for at least fifteen years and whenever I caught cold my back became so lame and painful that I could hardly get around. At times the flow of the kidney secretions was profuse then again scant and distressing. Doan's Kidney Pills, procured at A. G. Luken & Co.'s drug store, relieved these annoyances and once or twice since, when I have taken the remedy, it has promptly relieved me."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

## MAKE TRIPLE PROBE

Three Investigations to Be Made at Once of the Cherry Disaster.

### MINES COMMITTEE PLANS

Chicago, Nov. 29.—A triple investigation of the Cherry mine disaster will be conducted at one time, according to plans completed by the state mine investigating committee, state mine inspectors and Coroney at Cherry. To facilitate the calling of witnesses, members of the state committee which was organized here Friday, will go to Springfield to confer with the mine inspectors and then begin sessions at Cherry.

Although the three investigations will be conducted at the same time, separate stenographic records will be kept. After the examination of witnesses at Cherry, where it is expected that nearly every one in the town will be called, the state committee will resume session in this city.

Walter's Buckwheat Flour made from celebrated Pennsylvania Buckwheat. The kind your grocer likes to sell.

## GET SECRET ORDERS

(American News Service)

San Francisco, Nov. 29.—Secret orders have been received at the army quartermaster's office in this city to immediately prepare the transports Logan, Buford and Cook for service. This is believed to have to do with the Nicaraguan tangle. The work of preparation was rushed today. The Logan, scheduled to sail for Manila on Dec. 6th, is held here, the sailing order being cancelled. The gunboat Princeton, at Puget Sound, has been ordered here for ammunition and stores. She will go to Corinto. There are 3,000 available troops in San Francisco.

## EARNED GOOD MONEY

(American News Service)

Chicago, Nov. 29.—Eight hundred and fifty students of the University of Chicago who labored afternoons and evenings last year to help pay their expenses while in the university, earned an aggregate sum of \$62,286.02. This report is based on the statistics of the employment bureau of the Baptist school.

Here are a few of the things done by the seekers after knowledge: Waited tables; tended furnaces; washed dishes and scrubbed kitchen floors; wheeled baby carriages and invalid chairs; served as ushers in theaters; acted as artificial applause artists in theaters; peddled bills; worked as salesmen.

## Boston Store

# Brilliant Display of Christmas Furs

THERE IS A REASON WHY BOSTON STORE FURS have held first place in south eastern Indiana for the past fifteen years. We own every piece of fur in the store. We risk our judgment and money early in the year, at a time when it is possible to get the choice of skins and labor at a time of the year when prices are at their very lowest.

IT IS NOT SO WITH MOST STORES. A great many stores, in fact the majority, have not a dollar invested in furs; have all their furs consigned by manufacturers who make that a business. What is the result? Furs are shipped from place to place, consequently can not be choice and fresh, necessarily the prices are about double when compared with goods bought as we buy them.

### We Invite All Buyers of Christmas Furs To Make Comparisons

#### FUR COATS

Near Seal, Poney Skin, Mink, Coney.

Near Seals ..... \$35.00 to \$90.00

Poney Skin ..... \$50.00

Mink ..... \$40.00

Coney ..... \$25.00 to \$80.00

#### FUR SETS

Muff and Neck Piece

Coney, River Mink, Oppossum, Nat.

Squirrel, Blended Squirrel, Lynx, Isabella

Fox, Sable Fox, Blue Fox, Sets from \$3.00

Fox, Sable Fox, Blue Fox, Sets from \$3.00

#### Children's and Infants' Furs

Shown in all furs used for children,

\$2.50, \$3.50, \$5.00, \$6.00, \$7.50 a set.

Muff and Neck-piece. We pay special attention to children's furs.

## Industrial Meliorism is Needed

It Is Essential to Every City And It Is Pointed Out That Education Must Show Worth of Factory Work.

Chicago, Nov. 29.—G. Edward Fuller, in an article in the Tribune, says:

The claim of meliorism is not that life is good or bad, but that it can be made worth living; industrialism chooses from the families, races, classes, casters, and cults the strongest persons, making them friends and exercising them in consideration for one another.

This constitutes dependable selection and seems now to be the social line of least resistance, since eugenics, as well as natural selection, appear to lack efficient adaptability to present emergencies.

In the effort to effect and maintain national equipoise do we not need less individualism and more amalgamation of the fit—more team work?

If so, then the sooner advanced industrial meliorism is gracefully accepted as a blending and binding force the better for mankind at large. It is either a new industrialism or the old militarism, the softer arts, cults—the easy things—having failed to bring honorable tranquility.

#### Shy at Work and Trade.

Strange that we have learned to regard industrialism with pride but shy at reference to "work" and "trade."

Art and culture we conjure with, like takers in front of a side show, although we draw our food and clothes from work and trade; while past history indicates no future prospect of the solid furnishing forth of a worthy national life with lack of broad and wholesome respect for the wage earners.

The course of the nations is strewn with wrecks of culture, and no dominating art exists today—noting but fragments. There never will be enduring art and culture until the people of a nation grow up to them as a whole, and through adequate vocational pride and skill, perhaps, but certainly not through parasitism or partial views.

Japan has shown us, Germany is teaching us, and our disjointed national educational system is in sore need of proper articulation with a growing, a vitalizing industrialism based upon meliorism in the factory, the warehouse, and the store, but detached from tricky and sordid forms of mere commercialism.

Here are a few of the things done by the seekers after knowledge: Waited tables; tended furnaces; washed dishes and scrubbed kitchen floors; wheeled baby carriages and invalid chairs; served as ushers in theaters; acted as artificial applause artists in theaters; peddled bills; worked as salesmen.

to the individual, the state, and the race—all the races in the "melting pot" of Americanism.

#### Changes Already Seen.

Any close observer of factory conditions in any large American city knows that betterment has taken place steadily. Factory folks have improved; they have prospered and they have learned to like their work; they are healthier, they dress better.

In factory life now there is a greater ratio of intelligence and considerably larger percentage of young folk from the higher school grades—the kind qualified to understand the joy of occupation and who are competent to rebuke cynics and croakers among the superficial, frenzied and untrained thinkers.

Trade building is as reputable as building houses or writing books, and Chicago or New York can as well be outfitter and purveyor to the world as they now are to the middle west and east, but this means a louder call to the factories and salesrooms for our young men with education, ambition and courage.

There is no altruism in trade building, and mere optimism is not immune, but scientific meliorism stands the wear and tear, while a healthy industrialism offers the safest and surest means in the workshop, laboratory and marts of trade of wearing away the barriers between the races and between the classes.

For an early breakfast, take home Mrs. Austin's pancake flour. Ready in a minute.

#### It Sounded Hopeful.

A young man who was not particularly entertaining was monopolizing the attention of a pretty debutante with a lot of uninteresting conversation.

"Now, my brother," he remarked in the course of a dissertation on his family, "is just the opposite of me in every respect. Do you know my brother?"

"No," the debutante replied demurely, "but I should like to."—Lippincott's.

#### The Only Way.

"Is there any method that will enable a man to understand a woman?" queried the innocent youth.

"The only way to understand a woman," replied the home grown philosopher, "is not to try. Under these circumstances she will reveal herself sooner or later."—Chicago News.

#### No Chance of That.

The beggar accepted gratefully a nickel from the professional humorist.

"Thank you, sir," he said, his voice vibrant with deep feeling. "Oh, thank you, sir, and may you live to be as old as your jokes!"—Washington Post.

#### Of Course.

Reporter—Professor, what language do you suppose the people nearest the north pole speak? The Professor—What a question! Polish, of course.—Chicago Tribune.

#### NOTICE F. O. E.

There will be an election of Three Trustees and other officers on Wednesday night, Dec. 1st, 1909.

FRANK HARTZLER, Sec'y.  
Franklin Moore, Worthy President.

27-51

If this concerns you, read carefully. Caldwell's Syrup Postum is positively guaranteed to cure indigestion, constipation, sick headache, offensive breath, malaria and all diseases arising from stomach trouble.

#### THE EAGLE'S EYE.

A Screen That Protects It Against a Too Brilliant Light.

The eagle that stares proudly at the sun has now been found to be no figure of tradition.

M. de Chardonnet, in a paper communicated to the French Physical society, has shown that the eagle's eye has a special apparatus adapted to this feat, though it seems probable that he is not the only bird with this useful possession.

The apparatus is not, however, the "nictitating membrane" which all of us have perceived in looking even at the barnyard fowl. That is a mechanism designed merely to wipe the eye and to keep it clear of dust.

M. de Chardonnet's discovery was made while he was studying the transparency of the central part of the eyes of animals. He had already noticed that the eyes of night birds, such as owls, were more transparent than any other for ultra violet rays, and he had tried to push the experiments further by ascertaining whether they would be affected by ultra violet rays alone.

These experiments failed because of the absence of responsiveness on the part of the birds, which did not appear to manifest any sensation in passing from darkness to light, whether this last was visible to human eyes or not. M. de Chardonnet's failure led him to inquire whether there was any organ of which he was ignorant in the bird's eye, such as would intervene in such circumstances.

While dissecting a bird's eye he was struck to find an organ to which French naturalists have given provisionally the name of the pecten or comb. A better idea of its function would be obtained by calling it a parson.

This organ is formed of a very thin membrane, black-opaque and situated in the eye where the optic nerve penetrates it. The structure of this membrane is such that the retina is completely masked when the "pecten" is open. It is reasonable to suppose that the pecten is therefore a screen to protect the eye against a too brilliant light, whether the light is visible in the ordinary sense or whether it consists of ultra violet rays.

#### A Good Substitute.

Sentimental Wife—I expected to find an intellectual mate in you, but you starved my mind. I asked for bread, and you gave me a stone.

Practical Husband—But, good heavens, woman, it was a \$500 diamond!—New York Journal.

#### PALLADIUM WANT ADS PAY.

## MONEY TO LOAN \$10 AND UPWARDS

Everybody may occasionally run short of ready cash.

It isn't good policy to ask your friends to lend you money, and since you're not the
