

not see him. The examination was then resumed by Mr. Brandeis.

While in Washington, Mr. Glavis said he had a conference with Secretary Ballinger regarding the construction of the act of May 28, 1908. Mr. Ballinger agreed there should be an option and instructed Glavis and field chief Schwartz to prepare a letter to the attorney general. Before the letter was sent Glavis said he was told by Assistant Secretary Pierce that the matter had been turned over to him (Pierce) and the attorney of the interior department to prepare an option. That option did not agree with Glavis's view.

"I did not think," said Glavis, "that the law intended to validate a fraudulent claim."

Glavis said he was directed to make his report in accordance with the Pierce opinion.

"I was disgusted with the whole thing," said Glavis, "and thought of resigning. Just then I met in Washington Mr. Hoyt, who had been United States attorney in Seattle and knew something about the matter. I told him I was going to resign and give all the facts to the press. He said that would cause an awful scandal in the Taft administration and ought to be prevented. He said he would see Horace Taft, the president's brother and have him take up the matter with the president."

"That plan was abandoned, however, and we decided to go to the attorney general. Mr. Hoyt then had a conference with Mr. Wickham and he said he would talk with Mr. Ballinger about it."

Ballinger then sent for Glavis and asked him to withhold his report until after the attorney general had prepared an opinion. Glavis said his report had already been filed but Ballinger told him to withdraw it, which he did.

SPORTS ARE ON EDGE

Boxing Tournament at Coliseum Booked for Tomorrow Night.

THE FIGHTERS REACH CITY

Considerable interest is manifest in the boxing tournament which will be given at the Coliseum Monday evening under the management of the Richmond Athletic Club. Several fast bouts will be pulled off. The fighters are here.

As a certain raise there will be two wrestling matches that promise to be interesting. Nick Lewis will meet Charles Ole, both 128 pounds, for the best two out of three falls, strangleholds being barred. Bill Shober, the lightweight champion of Indiana, will grapple with John Terry of Vincennes, strangleholds being barred in this contest also.

Interest centers in the match between Russell Van Horne and Kid Clark, who will go it for ten rounds. Both men weigh under 142 pounds and are said to be clever boxers and about evenly matched. Sammy Trott versus Kid Griswold, at 105 pounds, for six rounds and the four round bout between Young Lane and Lew Shilling, at 110 pounds promise to be clever exhibitions of sparring. Since the police have sanctioned the sport, providing it does not become too "strong," arrangements will be made to pull off several other matches during the winter.

RICH HERMIT DIES

Missoula, Mont., Jan. 29.—News has been received here of the finding of the frozen body of Zachariah Jacobson, a pioneer archer and of late years a hermit in the mountains near his home in the Bitter Root valley.

Jacobson, who was known to be wealthy, had been known to be missing for more than a week, and the entire region had been alarmed. The fact that he disappeared just before the severest blizzard of the winter made the search for him almost hopeless in the start, but it was continued faithfully until his corpse stiffened and half covered with snow was found in a clump of trees not more than a mile from his home.

It is supposed that he started out to round up his cattle, fearing that they would die of exposure in the mountains. Instead of saving his herd he found the death from which he was trying to save it.

For forty years he had lived near Victor, a little town in the Bitter Root mountains, alone in a big white house that was formerly the show place of the valley. He owned 300 acres of valuable orchard land, worth probably \$200,000. He never disclosed the names of his relatives beyond admitting that a son and daughter were residents of Minneapolis. He was born in Denmark, seventy years ago.

STOCKS

New York Stock Exchange securities are again touching levels where judicious investors will become attracted. We have superb private wire facilities for handling orders either for cash or upon a safe margin basis. We also handle Curb and Coppers. Write for The Financial Encyclopedia.

GRAIN

Orders will receive most careful attention. We are making every effort to give "the best service." The Annual Red Book, containing exhaustive data and complete statistical matter, will soon be ready for distribution. Mailed gratis.

BEEF PROBE TO REACH THE FACTS

The Federal Grand Jury to Strike Main Trail This Week.

AFTER THE "BIG" MEN

REAL HEADS OF COMBINE ARE ONES WHOM GOVERNMENT SEEKS TO PUNISH FOR RAISING FOOD PRICES.

(American News Service)

Chicago, Jan. 29.—When the federal grand jury meets Monday morning it will proceed upon the main track of the beef combine inquiry with all routine matters disposed of. Within three weeks indictments are expected involving at least four of the heads of the packing companies allied with the National Packing Company. Developments today made the announcement authoritative that the government in the present inquiry will pass over everyone except the real heads of the alleged combine in the effort to indict persons responsible for the alleged combine.

Many Employes Summoned.

Every employe that is thought to possess information of value to the inquisitors will be subpoenaed. But the heads of the combination—the beneficiaries of the beef trust's owners will not be given anything resembling an immunity both this time.

The investigators have discovered that their work has been made all the more difficult by an elaborate system of concealment in effect in the offices of the packing companies. Of late years, since the agitation against high prices and the beef trust it is declared as much effort has been put forward in suppressing evidence of a combine as has been expended in perfecting the combination.

Crews First Witness.

This elaborate system has made the ramifications of the beef trust all the more difficult to follow and the inquiry is proceeding slowly, but with the certainty that is the result of the previous experiences with the combination.

Monday it is expected that Ralph Crews, general counsel for the National Packing Company, will be the first witness. He testified yesterday afternoon, but he did not have the papers that the grand jury wanted to scrutinize.

UNION CITY DOWNED

Local High School Won Basketball Contest Last Night.

ALLISON WAS THE STAR

In a very fast and exciting game the Richmond High School basketball team last night defeated the strong Union City team at the "Y" gym. The local boys played a fast, clean game and won because of their superior team work. Every man on the local team was responsible for the victory. Criticism might be made on the work of the Union City team as there was too much individual play. During the first period Murray was the only man that showed any class, making 8 points, one field and 6 foul goals. For the locals, Allison was everywhere, making 4 fields and 4 fouls, while Ferling and Hasemeier each contributed one field. During the second half Murray made three fields and one foul goal, while Washler at center contributed three fields. For Richmond Taggart came in with his share making four pretty baskets from the field, and Allison made two difficult shots. Hasemeier and Steinkamp also helped the cause by throwing one each. The line up and summary:

Richmond (23): Union City (23).
Taggart Murray
Left Forward.
Allison Orlip
Right Forward.
Hasemeier Washler
Center.
Ferling Gettinger
Left Guard.
Steinkamp, Haas Sutton
Right Guard.

Referee—Boogs. Umpire—Loomis. Timers—Miller, Jones. Scorer—Marlatt. Field goals—Taggart 4, Allison 6, Hasemeier 2, Ferling 1, Steinkamp 1, Orlip 1, Murray 4, Washler 3, Foul goals, Allison 4, Murray 7.

The latest burglar-proof safe is an invention called the carrousel or round about safe, which is described in the current issue of the German technical journal Prometheus. It is chiefly designed to baffle burglars who work with an oxygen and acetylene blowpipe. The roundabout safe is a polygonal steel structure, which revolves freely on ball bearings. It is built into a wall, and the outer door is closed a small electromotor is set in motion and the safe starts revolving ceaselessly and noiselessly on its axis within its stone chamber. Any tampering with its motion causes an alarm bell to ring.

Making It Worse.
Magistrate (to prisoner)—Did you really call this gentleman an old fool last night?
Prisoner (trying to collect his thoughts)—The longer I look at him the more probable it seems to me that I did.—London Fun.

ADLAI: Mother says "they can't say anything too good about Gold Medal Flour."

"CHERRY."

T. P. A. Notes
BY T. C. H.

Last call for dues.

Monday is the last day to pay your dues; after that you are an outcast.

"Our Jim", he of the T. P. A. encore set, is deserving of watching.

E. E. Lebo attended a meeting of the state board of directors yesterday in Indianapolis.

In the contest for new members Post C is showing up well with the balance of the posts scattered of the United States. E. E. Lebo, who is the only contestant from Post C for membership honors, has the honor of being the leader in the Indiana division in having the greatest number of new members to his credit. Elmer expects to carry off the capital prize.

L. E. Turner is confined to his home on account of sickness.

Samuel Gaar is again able to be out by the use of crutches. His ankle still gives him considerable trouble and it will be some time before he is again in first class condition.

Have you read the T. P. A. Magazine of last month? Look it over. Every T. P. A. member will find something of interest to him in the publication.

About time for another letter of vindication from the "Innocent Seven." These letters, judging from the past, would eventually become masterpieces in literature and would lead one to believe that another "gentleman from Indiana" had taken up his pen to add his mite to the already great fame of Indiana's writers. Too bad he must share the glory with a few Missourians. But then there's glory enough for all.

The Journal-News of Evansville, in which paper appears Bro. J. B. Young's T. P. A. column, suffered a complete loss by fire Jan. 26. The paper, which is one of the best in the state, will be published temporarily by the Press, a morning paper. We trust this misfortune will in no way effect the interesting notes of Mr. Young from appearing regularly.

The Pennsylvania railroad company just as fast as possible, is equipping their through passenger trains with steel coaches. The company has also made a ruling that only steel coaches are to be permitted to run through the New York tunnel recently opened. A great number of these steel coaches is daily seen running through Richmond.

All T. P. A. boys should prepare themselves and be ready to attend in full glory, the approaching wedding of one of our distinguished fellow members. The encore set promises to attend in a body and bid farewell to one of their chosen few. The wedding will positively take place in February.

D. E. Haxton has moved his family to Richmond and Economy and will make this city his future home. Mr. Haxton is with the I. R. Howard & Co., wholesale grocery, in the capacity of traveling salesman.

Walter Rossiter reports trade in the linen goods exceedingly fine this year so far.

The regular monthly meeting of the post occurred last night and many important matters were disposed of. A committee of five, consisting of P. J. Freeman, M. J. O'Brien, M. L. Hasty, W. H. Quigg and T. C. Harrington, was appointed to draft resolutions to present to the Ft. Wayne convention relative to what action should be taken in regard to the conduct of the national officers. Two nominating committees were appointed, one to nominate the blue ticket, the other the white ticket for officers and delegates to the national convention. The nominating committee of the blue ticket consists of J. H. Hill, J. J. Hoerner and G. A. Mendenhall. The white committee consists of Roy Brown, Gath Freeman and Ben Hill.

State President Lebo reports the state treasury to be in the best condition ever known to the state organization. This speaks well for Lebo and Indiana.

THREE GRAVEL ROADS

Petition for Them to Be Presented to County Board Next Week.

OPPOSITION IS PROMISED

THREE GRAVEL ROADS

The board of Wayne county commissioners will meet one week from tomorrow and it is understood that at least two and possibly three petitions for gravel roads will be filed.

One of them will come from Abington township, it is asserted, and it will be followed by a remonstrance from citizens who are opposed to the improvement because of the belief that the tax rate will be greatly increased. The fact that Washington township is bearing the burden of a 17-cents tax increase on account of a single gravel road has not made the road law particularly popular, especially in the smaller townships.

The opinion prevails however, that there will be no opposition to the improvement of the National road west of the city, the petition for which will be among those presented to the commissioners next week. That the improvement is badly needed all admit, and the cost will not be such that the tax rate in the township will be increased more than one or two cents on the \$100 valuation.

A DINNER COURSE FOR FAIR CO-EDS

Girls at the Kansas Agricultural College to Study Cooking.

ECONOMY AS THE BASIS

THEY WILL BE COMPELLED, IN THE COURSE OF STUDY, TO MAKE FOUR DOLLARS COVER FOUR MEALS' EXPENSE.

Manhattan, Kas., Jan. 29.—The dinner work carried on at the Agricultural college is one of the most instructive studies offered to young women anywhere in the United States. Ninety-six now are taking the domestic science short course. They are divided into three groups of thirty-two each and these are divided again into eight groups of four, each group consisting of a cook, assistant cook, dishwasher and waitress.

The cook is in charge of the group, and as each girl holds her position one week and the group works four weeks each gets a chance to be in charge of the operation. There are eight small kitchens on two sides of a large central dining room in which are eight tables, one for each group.

Four Dollars Is Basis.

At the beginning of each week the new cook is given \$4 with which she is to furnish five meals for four persons, planning her meals under the supervision of the instructor, Miss Grace Woodward. The five meals consist of one three course dinner, two three course lunches, one five course dinner and one five course luncheon. These meals are served at noon on regular college days.

Members of the faculty are the lucky ones who get to eat of these delectable, and the fact that some have been on the waiting list for a year before getting a place shows that it is not considered like a chance on a government "poison squad."

The aim of the work is to give the young women a practical knowledge of the preparing of meals in a simple, dainty manner, and also to acquaint them with the cost and the buying of foodstuffs. Each cook has her own account book in which she keeps a record of all cash supplies and department supplies made. By department supplies is meant the staples kept in the storeroom.

The storeroom is under the charge of an instructor, with whom the cooks settle every morning for supplies used the day before. Each afternoon the cook goes down town to market. The kitchens are equipped with china, silver, and cooking utensils for serving four persons. Also a utensil cabinet, china and linen cabinet, porcelain sink, gas range and a work table.

Course Is Self-Supporting.

It is a self-supporting course. The faculty members pay \$1.25 a week each. The \$4 coming from the table goes to the cook, while the remaining dollar pays for table laundry, ice, etc. This allows two table cloths, eight napkins, two center pieces for the table, and two tray doilies. The table decorations come out of the \$4.

The competition between the eight kitchens seem to be to see who can serve the best and daintiest meals within the \$4 limit. The final results show a range from \$3.15 to \$4 for the cost of the week. The money not spent is returned to the department.

The preparation for this course includes a term in the theory of household management.

It is the custom of the college to take all of its distinguished guests to the Domestic Science building for dinner.

TO REACH ARCTIC

Kansas City Man Plans to Join Gulf With Northern Sea.

OPENS A FERTILE REGION

Kansas City, Mo., Jan. 29.—W. R. Clark, vice president of the United States Trust company of this city, has just left for the north to look after the work of building the most northerly railway on the American continent outside of Alaska. The road is to extend from Edmonton, Alberta, to a place near Fort McMurray at the head of the great river system of Canada, and when it is completed it will be possible to take a journey by rail from Galveston, Tex., to the shores of the Arctic ocean.

Mr. Clark is not building his road on paper, it is declared; he is now having the final surveys made. The money for the entire project has been subscribed. Mr. Clark is a native of Junction City, Kas., but has long been identified with Kansas City affairs.

Opens a Fertile Region.

The work in which W. R. Clark and his brother, B. R. Clark, are engaged is the opening for settlement of the largest unsettled and habitable region on the continent, with a total present population of less than that of any of the smaller states. It is said that less than 5 percent of the lands demonstrated by the Canadian government experimental farms to be arable has been taken up by settlers.

The province of Alberta is one of the few remaining sparsely settled countries on the continent. It is fertile as an agricultural country and produces a quality of wheat and oats which is unequalled.

People Flocking to Country.

People are flocking to the country and a railroad now is a necessity. The road itself has 350 miles of track and will run from Edmonton, a city of 25,000 inhabitants, on the lines of three of the great transcontinental railways, the Canadian Pacific, the Canadian Northern and the Grand Trunk Pacific, almost due north to a place near Fort McMurray. The last mentioned place is near the head of the Athabasca river and the mighty Mackenzie. This, with Lake Athabasca and Great Slave lake, will furnish 3,500 miles of waterways open for six months of the year. Upon this it is proposed to operate a line of packets, giving continuous transportation to the Arctic ocean.

Work Begun Two Years Ago.

"One soon will be able," said Mr. Clark, "to board a train at Galveston and go whizzing over the great North American continent and never set foot on ground from the time he starts till the time he lands upon the shore of the Arctic ocean."

The work was begun nearly two years ago. Mr. Clark saw the opportunity and got busy. A company was organized and incorporated as the Alberta and Great Waterways railway company, with W. R. Clark as president. Then he went to England and France and secured subscriptions for \$14,000,000 from old friends and clients of his father, the late William B. Clark.

With so much done on paper a construction company was organized, known as the Canada West Construction company, limited. This is the organization which is now getting down to the task of building the road, constructing packet lines for river service, and plating and building forty-seven towns and cities. The road is to be built for the heaviest freight and immigrant service.

ARCTIC COLLECTION

Of Paintings by Famous Dane Artists to the United States.

PEARY CLUB WANTS THEM

(By Herbert Temple)

London, Jan. 29.—In the map room of the Royal Geographical society there is at present an exhibition of nearly one hundred paintings by the two Danish painters, Aage Bertelsen and Achton Friis, who took part in the Mylius Eriksen expedition, whose leader lost his life in the northern icefields. The Peary club of New York is negotiating for the transfer of this exhibition to America, and it is to be hoped that it will succeed for not only are the paintings of great artistic value but they also show many views of particular interest to Americans, such as many of the points visited by Peary, and that explorer's vantage at Clarence Wyckoff in Peary's Land, 83 degrees N. L.

Most of these works of art have been painted under the most trying conditions, with the thermometer many degrees below zero, when every bit of paint had to be heated over the flame of a candle to be soft enough to be applied with a brush. More than any pictures ever seen here, the yshow the wonderful beauties of the arctic zones, which are by no means as monotonous and dreary as one ordinarily imagines. The colorings are wonderful and such as one otherwise sees only in pictures from Italy and southern countries. The sky and water are the

deepest blue, the snow sparkles in all the colors of the rainbow, the air is of the most wonderful transparency, and there are pictures painted by candlelight in a magnificent ice cave, which far surpasses in beauty and radiance the famous blue grotto of Capri.

As a result of the exhibition English artists will accompany Lieutenant Scott on his next antarctic trip, and if an antarctic expedition is sent out from the United States, young American painters would do well to follow their example.

One of the two Danish artists, Mr. Achton Friis, who is now in Italy, writes from Rome, the paradise of the painter.

"I can find nothing to paint here. After the wonderful light and radiance of Greenland, with its ever changing play of colors, the skies of Italy seem pale and uninteresting. I painted more in Greenland than during all the rest of my life, and I feel as if I should not care to paint until I return there."

There is no medicine so safe and at the same time so pleasant to take as Dr. Caldwell's Syrup Pepsin, the positive cure for all diseases arising from stomach trouble. The price is very reasonable—50c and \$1.
