RICHMOND, IND., THURSDAY EVENING, JULY 14, 1910.

SINGLE COPY, 2 CENTS.

ROW IN MEDICAL BOARD STIRS IRE OF GOV. MARSHALL

State Executive Expected to Haul Members of Board of Medical Examination Up on the Green Carpet.

"REGULARS" IN FIGHT AGAINST OSTEOPATHS

Tangle in State Department May Result in Wholesale Resignations—Board Has Caused Trouble Before.

(Palladium Special)
Indianapolis, July 14.—The members of the state board of medical examination and registration are about to be called up on the green carpet by Governor Marshall, and the air about the governor's office today is charged with a dynamic expectancy that might break loose at any moment. It appears that the governor's troubles with his state medical board, which he thought he had fixed so that it would stay fixed, continue to rise up again to harass him and keep him in hot water as long as it is made up as it is now. Recently the governor re-appointed two of the old members of the board, at the request of the school members were made under circumstances which caused him to think they would be pacificatory.

But in the very first meeting the board held after the reappointments, which was since the semi-annual examinations, held this week, the old fight against the osteopaths broke out afresh, and it is not at all unlikely that the board will be called before the governor and given an official currying that will cause them to wish they had allowed the osteopaths to go their way unmolested. Charges and countercharges are being made until the governor has wearied of the entire affair and would give a good deal to have the entire board off his hands.

Object to Osteopaths.
The trouble began this week when 41 members of the class applying for license to practice medicine in this state signed a petition asking that they be examined in all subjects by some one other than Dr. John F. Spaulhurst, representative on the board of the osteopaths, setting forth as their reason that the state board of Michigan was on the point of breaking the relationship whereby a certificate granted in Indiana entitles the holder to practice medicine in Michigan without another examination, because Spaulhurst was a member of the board, and that other states were preparing to take similar steps. The members of the board opposed to the osteopathic school outvoted Spaulhurst, and his one friend on the board and granted the petition, thereby delivering a well directed slap at the osteopathic school as well as depriving Spaulhurst of something like \$150 of the revenue derived from the preparation of questions and the grading of manuscripts.

The action of the board almost stunned the governor. Before acting on the petition the state board had shown it to the governor and had asked him what it should do about it. The governor declined officially to interfere, but sent word that personally he did not think the petition well grounded. He thought it was a frame up against the school of osteopathy, which the law gives representation on the board, and that evidently the signers had been induced to sign it by some influence that was opposed to the osteopaths, and that if they were not so induced they were not warranted in arriving at the conclusion which they had reached concerning Spaulhurst. This, the governor thought, would be sufficient to cause the board to halt in any steps contemplated to carry the petition into effect, but there was no halting. When presented in a business meeting.

★ DO THE BUSINESS

"We have heard arguments that copy written briefly is the most effective. We have also heard that the copy must be written so that it is easy to understand. I believe that if you can make your copy interesting, make it as long as you want it. It is also my belief that it is better to make the copy difficult to understand. Copy written briefly and simply makes a flash, while the copy written so that it is lengthy and difficult to understand, if it is interesting, will make an indelible impression upon the reader's mind."

"The average man likes to argue. Get him into an argument, if only mentally, while reading your copy. I have found that the best advertising effects produced are by touching the tender spots of the reader. Pluck and daring are highly essential for successful advertising. If the small ad does not do the business, use a big ad.—E. Leroy Pelletier, Advertising Manager E. M. F. Automobile Co., Detroit."

"If the small ad does not do the business, use a big ad." But put it where it will do the most good. The Palladium has the most effective advertising space in this trade district.

YALE MAN MAY HEAD GOVERNMENT BUREAU

President Arthur Twining Hadley, of Yale, who has been offered the chairmanship of the commission for the investigation of the evil of stock watering, which was provided for in the Railroad Bill passed at the last session of Congress. President Taft recently made the offer, but as yet Mr. Hadley has not accepted. He is seeking to ascertain first if he will be able to discharge the duties that it would entail without interfering with his university work.

AFFINITIES RAMPANT

Thirteen New York Wives in One Week Charge Their Affections Were Alienated.

STRICT LAWS POWERLESS.

New York, July 14.—Affinities continue to be a necessary evil in New York, if one were to judge from the frequency with which they have been thrusting themselves into the matrimonial arena of late.

This week Frederick Falding, a wealthy engineer, was charged by his wife in one of the local courts with employing the ingenious plan of legally adopting a 25-year-old nurse as his daughter in order that she might have a legal right to reside over his household and be near him all the time. The wife says she was forced out of her home, and that her husband turned over to the woman who displaced her all his valuable patents and rights in inventions he owned.

Thirteen different cases in which wives averred that affinities had threatened them in the affections of their husbands in one week is a record for even so strenuous a town as New York. And this in spite of the law, which makes it an offense punishable by six months' imprisonment to be convicted of being a full-fledged, dyed-in-the-wool affinity.

COLLAR BONE BROKEN.

James Moss, while riding a motorcycle yesterday afternoon on North Seventh street, ran into a wagon and broke his collarbone and arm. His injuries were dressed at Reid Memorial hospital.

LIKE FATHER, LIKE SON.

Eaton, O., July 14.—A dozen or more race fights, occasioned by the feeling engendered by the big Jeff-Johnson fight at Reno, have taken place at the County Children's home. Numbered among the thirty-five inmates in this institution are two small colored boys, who have been made the victims of the "scrappy" tendencies of the white boys. Superintendent G. W. Hardin has been equal to the uprising, however, and has succeeded in quelling the near-riotous feeling.

ENGLAND SHOCKED BY AWFUL CRIME AMERICAN DENTIST

Scotland Yard Detectives Are Working on Case Which Seems to Show Existence of a Modern Bluebeard.

ACCUSED MAN RECEIVED EDUCATION IN INDIANA

Police the World Over Directed to Watch Out for Dr. Crippin, Who Has Disappeared With His Pretty Typist.

London, July 14.—The finding of the body of a woman, or possibly the bodies of two women in the basement of the home of Dr. Hawley Crippin, an American dentist, aged fifty, in the beautiful suburb of North London, has developed what the police authorities pronounce a baffling murder mystery. Crippin has mysteriously disappeared and the police are also searching for his pretty young typist, Miss Ethel Leneve, who is thought to have accompanied him in his flight.

Much secrecy is being maintained regarding the facts in the case, but two coffins were sent to Crippin's home today, which led to the belief that two bodies were found instead of one as was first reported.

Crippin married Kunigunde Makomaski, an American actress, known on the stage as Bell Elmore, in Philadelphia some time ago. She was born in Brooklyn. When she married Dr. Crippin, in accordance with a provision of her grandfather's will he took the title of Baron Makomaski. The couple then came to London where the woman continued her stage career and acted as an official of the Music Hall artists' guild. They went to live at 39 Hilldrop Crescent, North London.

She disappeared last February and Crippin reported her as having died while on a trip to the continent. Shortly afterwards a second Mrs. Crippin was introduced and was seen as recently as last Saturday at the Crippin home.

Crippin has been officially charged with murder and mutilation and police authorities all over the world have been requested to watch for him especially in the United States.

Born in Michigan.
Crippin was born at Coldwater, Mich., was educated in Indiana, and had subsequently received degrees from several colleges, including Ann Arbor. He had practiced in several American cities as an eye and ear specialist and at one time was representative of the Munyon Homeopathic Remedy company at Philadelphia.

The Scotland Yard detectives' theory is that both the first and second Mrs. Crippins were murdered and that Crippin disappeared with his pretty stenographer. All the women concerned were much younger than Crippin. The case is more mysterious than the Porter Charlton tragedy.

Description of Crippin.
Here is the description of the missing man:

"Hawley Harney Crippin, alias Peter Crippin, and Frankell Crippin, an American doctor; aged 50 years; five feet three inches; complexion fresh; hair light brown, inclined to be sandy and scanty; bald on top, rather long moustache; mark on bridge of nose; wears false teeth and gold rimmed spectacles; speaks with slight American accent; wears hat on back of head."

Sir Melville MacNaughton the chief of the Scotland Yard criminal investigating department, who is directing the big force of detectives handling the case, today made another daylight examination of the premises, especially the cellar where the bones were found, which was photographed by flashlight last night after the mystery had been discovered.

The bones which today were given to experts for minute examination, are apparently, according to the police first statements those of a woman of 27 years. Bell Elmore was 33. Barring a mistake here is one of the most baffling phases of the case.

If Bell Elmore was not the victim, who was? Where is Crippin? And where is his pretty wife?

Every route leading from London today is under close guard, and all ships that have sailed for America in the last few days have been communicated with, if possible by wireless, police taking the same precautions as they did in the hunt for Porter Charlton, the young American now under arrest in New Jersey, confessed slayer of his beautiful wife, Mary Scott Castle Charlton.

Bell Elmore's maiden name was Kunigunde Makomaski. She was born in Brooklyn, N. Y., and took the name of Bell Elmore after going on the stage where she gained a reputation as a soprano singer.

Before 1889 the department of agriculture was simply a bureau. Before the fiftieth congress adjourned it passed a bill making the bureau a department and the commissioner of agriculture a secretary and a member of the cabinet.

INSANE PATIENT KILLED BY TRAIN

Mrs. Mary Saunders, Inmate of Easthaven, Hurls Self Before a Train.

SHE MEETS INSTANT DEATH

WOMAN HAD THRICE BEFORE TRIED TO TAKE HER OWN LIFE — WAS THOUGHT TO BE RECOVERING FROM HER DISORDER.

After thrice attempting suicide Mrs. Mary Saunders, of Anderson, an inmate of Easthaven, succeeded this morning, when she threw herself in front of east bound Pennsylvania train No. 14, due in Richmond at 9:55. She was instantly killed, but the body was not badly mangled. There was a wound on the side of her head, thought to be a fracture of the skull. The unfortunate woman was walking with a number of inmates on the lawn near the east end of the grounds. She dashed for the track as the train approached and the guard was unable to save her. The train was moving at a high speed and the pilot struck the woman a glancing blow, hurling her to one side.

Easthaven authorities state that the woman attempted suicide three times before being brought to Easthaven in 1907, but after she had been in the asylum several months she improved greatly and was released. She was returned here in April because relatives were forced to keep a constant watch to prevent self-destruction. It was stated at Easthaven that a guard was kept near the woman at all times because it was feared she would attempt suicide. However, her condition seemed to be improving and she would probably have been released in a few months. She was not classed as violent.

The deceased was 53 years of age and made her home with a son at Anderson previous to being brought to Richmond. Mrs. C. C. Cain of 308 Kinsey street, is a sister. The body will be taken to Anderson this evening for burial.

TAG DAYS UNDER BAN

Mayor Gaynor, of New York, Says They Are Not Nice For Young Ladies.

NEVER TRIED IN GOTHAM

New York, July 14.—"Tag Days" may be all right for the seashore or the country resort, but Mayor Gaynor thinks it is no proper diversification for a woman or a young girl in New York, even though it be inspired by such a praiseworthy object as raising money for a charitable purpose.

In taboing a resolution of the board of aldermen designed to allow it in one of the boroughs, in aid of a hospital fund, the mayor said "the authorization sought was of doubtful legality and more than doubtful propriety. The practice of allowing women and young girls to accost strangers on the street and extract money from them, no matter how worthy the cause, should not be permitted."

"Tag Days" have never been tried in New York, but have proved successful mediums for the collection of money in a number of small outlying cities.

ANOTHER DIVORCE SUIT.

Alleging that she has been abandoned and treated in a cruel and inhuman manner, Phoebe A. Marling has filed suit in the circuit court for divorce from her husband, Charles Marling. He is charged with striking her and using profane language in her presence, also with charging her with violation of the marriage vows. They were married on May 15, 1902 at Muncie and the woman says he left her on March 8, 1910.

THE OUTLOOK 287 Fifth Ave., New York.

Office of Theodore Roosevelt.

My dear Mr. Harris:
I find it will be a simple impossibility for me to accept Wayne County's invitation, much though I should like to please not only you and your fellow committeemen, but my friend Foulke. I have to make one speech in Indiana, and I cannot undertake to make another. I am very sorry.

Faithfully yours,
Theodore Roosevelt.
Mr. E. H. Harris,
Richmond, Indiana.

PREBLE FARMERS LEAD THE STATE

According to Statistics, County Has Greatest Wealth Per Capita in Ohio.

LAND HAS A LARGE YIELD

HALF MILLION BUSHELS WHEAT, THREE MILLION OF CORN AND SIX MILLION POUNDS OF TOBACCO GROWN IN 1909.

Eaton, O., July 14.—In comparison with the other eighty-eight counties in Ohio, Preble county ranks the wealthiest per capita in the state, according to the agricultural statistics compiled in the office of Auditor Randall.

The report shows that in 1910 42,390 acres were sown to wheat. The acreage given this crop in 1909 was 34,888 acres, from which was harvested 432,005 bushels. The corn acreage for this year is estimated at 57,740 acres, while in 1909 60,267 were planted and the total production in bushels was 2,850,029. About 9,396 acres have been planted in oats. The acreage of this crop in the preceding year was 13,796 and a harvest of 411,718 bushels was made.

One hundred and twenty-six acres of tomatoes were planted in 1910, producing 12,033 bushels; 455 acres of Irish potatoes, producing 40,880 bushels, were planted in 1909, while only 390 acres have been planted this year; 12,201 acres of hay produced 12,389 tons last year; 13,161 acres of clover in 1909 produced 6,210 tons of hay and 547 bushels of seed; 15,291 acres were plowed under for soil enrichment.

Last year 591 acres of alfalfa produced 1,201 tons of hay; 8,850 acres produced 6,114,550 pounds of tobacco; 284,520 gallons of milk, produced in home dairies 599,417 pounds of butter while 207,383 pounds were manufactured in the creameries of the county; 692,115 dozens of eggs is representative of the work of Preble county hens in 1909.

The sorghum crop covered only 53 acres, but from this were produced 3,195 gallons of syrup; 5,117 sugar trees produced 1,064 gallons of molasses; 478 apiaries in 1909 produced 2,040 pounds of honey at an estimated cost of \$677.70; 6,062,876 pounds of commercial fertilizer was used in 1909 and for this year 5,518,810 pounds have been used; 229,723 acres of land were under cultivation last year and 6,654 acres were in waste; 57,162 was the pasture acreage; 317,297 the total acreage sown for last year. There were 10,273 horses and 9,407 head of milk cows, while 535 were for beef.

Judge Henry C. Fox and members of the county council visited the county infirmary today. Their visit was prompted by the special meeting of the county council which will be held on Monday to consider the matter of increasing the appropriation for improvements at the infirmary and the county jail.

The improvements at the county farm, it is believed, will demand an appropriation of \$15,000 which is \$5,000 more than the amount originally set aside for this purpose. The detention ward for insane at the county jail will necessitate an appropriation of \$5,000 instead of \$3,000.

DISCUSS MEANS OF APPLYING VEHICLE TAX IN RICHMOND

Board of Public Works Will Model Working Out of New Ordinance After Plan Adopted in Other Cities.

TAGS IN COLORS TO DENOTE THE LICENSE

Mayor Zimmerman Believes in Using a Simple System—Stoddard-Dayton Employees Will Visit Glen This Month.

The best method of applying the vehicle ordinance was discussed at a meeting of the board of works this morning and sample forms for application blanks, receipts and license tags obtained from other cities were considered. The Greenfield council recently passed an ordinance doing away with the application blank as it was found to entail needless trouble. By the present method employed at Greenfield the money is paid to the city treasurer who writes a combination receipt and license, besides issuing the license tag. The Greenfield authorities change the form of the license tag with every issue, once a year. A letter from Howard Kimball, city clerk of Indianapolis, referred City Clerk Bescher to E. A. Ramsey, city controller of Indianapolis. Mr. Bescher had written to Indianapolis, Dayton, Greenfield and Cincinnati asking for the best methods in applying the vehicle ordinance.

Mayor W. W. Zimmerman spoke in favor of making the system for vehicle taxation in Richmond as simple as possible. He said he believed even a receipt is unnecessary because the license tag would be sufficient. According to the mayor, the license tag should be paid to the city controller, who would keep a record of the licenses issued. Other members of the board are in favor of a simple system but want a receipt issued to the licensee.

Tags in Colors.
The tags will be colored in four different colors representing the four prices paid. This will be convenient for patrolmen in enforcing the ordinance. Some members of the board are in favor of printing the license in pamphlet form. City Attorney A. M. Gardner, H. M. Hammond, president of the board and Mayor Zimmerman will go to Dayton soon and investigate the method employed there. The Dayton ordinance was used as a model for the ordinance passed in Richmond.

Contract for Sewer.
A contract for the construction of a cement alley between North G street and North H street from Eighth to Tenth street was let to Daniel Burkhardt. The contract price was 15 cents a square foot, which was below the estimate. There were two bidders.

George H. Harrison and Bert A. Mackley, of Dayton, representing the Stoddard-Dayton Motor company asked the board for the use of Glen Miller park for the annual picnic of the Stoddard-Dayton company to be held July 30. Mr. Harrison stated that about 1,500 people were expected to attend the picnic. The board granted the use of the park and declared that the picnic party would be welcome. If the committee is able to secure the use of Athletic park for a baseball game with the Maxwell-Briscoe team of New Castle, the picnic will come to Richmond according to Mr. Harrison. Another baseball game will be played with a team from Richmond if the park is secured. Last year the picnic was held at Indianapolis where 2,000 attended. It is held under the auspices of the Stoddard-Dayton Relief Association.

Will Sell a Few Elk.
It was decided to sell a number of the elk at Glen Miller park because these animals are multiplying very fast. There is a herd of about a dozen now and the board wishes to reduce it to four. City Clerk Bescher was instructed to advertise in sporting papers and to write to large parks of the country.

TRANSFER OF C. C. & L.

Formal notice of the transfer of the C. C. & L. railroad to the Chesapeake & Ohio railroad company by Gilbert Cannon and Carl Remington, who purchased the road at the receiver's sale, was filed in the office of the county recorder today. The consideration given was \$5,200,000. The transfer of the property was a mere formality in compliance with the laws as the purchasers were merely representatives of the present owners.

THE WEATHER.

STATE AND LOCAL.—Overcast; weather; thunderstorms tonight and Friday; not much cooler.

TRYING FOR HARMONY

Oyster Bay, July 14.—Col. Roosevelt today strenuously denied that he is trying to run New York state politics. He said he merely wants to engender harmony into the Republican ranks.

POLICE COURT ROUTINE.

Charged with malicious destruction of property and gross indecency, William Norton, a laborer arrested yesterday, was fined \$20 and costs by Mayor W. W. Zimmerman in police court this morning. Mrs. Mary Wyson, 417 North Eleventh street, was the prosecuting witness. Frank White, George Wilson, Walter Horner and James Harney, strangers in Richmond, were arrested yesterday by Patrolman Remmert in Beallview park on a charge of intoxication. The men had been staying in Beallview park for several days. Fines of \$1 and costs were assessed.
