COMMONS'

**In Eating
Ice Cream
You Want
The Best**

There are many methods used in making Ice Cream. A great deal of Ice Cream is made in damp and mouldy places. The sweet cream may become sour, or exposed to the air in those surroundings, or the dairy from which the cream is procured may not have passed the sanitary inspection—all these things make impure Ice Cream.

**Commons'
Method**

are the very best. The cream is procured from the most sanitary dairies in the county, all under city inspection. It is never exposed in any way from the time it leaves the farm and is pasteurized here in our factory as soon as it is received. This pasteurization makes it absolutely pure.

Our factory is one of the very best in the state—all the modern machinery and methods being used in producing our Ice Cream.

We invite you to inspect our plant and you will be convinced that our product is absolutely pure.

Ask your dealer for Commons' Ice Cream and get the purest. If he doesn't handle it we will tell you one that does.

MILLINERY At Almost Your Own Price

We must clean our stock of Summer Hats—
everything must go before the Fall season opens
—they will be sacrificed at less than cost.

Come Tomorrow

or any day next week—you certainly should see
these. Hats that sold for \$8 and \$10 to go at
a great deal less than half that price. Every
hat is of the very latest style, not a bad looking
one among them.
