ASSESSMENT ROLLS WERE CONSIDERED

Widening of West Fifth Street Occupies the Attention Of the Board.

STREETS ARE INSPECTED

AFTER EXAMINATION REPORTS MADE TO BOARD RECOMMENDING WIDENING OF OTHER WEST SIDE STREETS.

Assessment rolls of benefits and damages which will be incurred in the widening of West Fifth street were considered at a meeting of the board of works this morning. However, no definite action was taken on the rolls being laid over until the next meeting. The street will be improved from National avenue to the Pennsylvania railroad. It is now a narrow street and the necessity of its widening is increased by street car line. It is a sixty foot street. Damage to property owners will not be great and most of them favor the improvement.

City Engineer Fred Charles and President Hammond of the board of works made an inspection of West Seventh, Eighth and Ninth streets yesterday and recommended at this morning's meeting that these streets also be widened. It was decided to make them fifty foot streets. Engineer Charles was ordered to draw up resolutions for the widening of the streets immediately. The improvement is considered necessary because of the building boom on the West Side.

Obstruction of Streets.

Another matter of importance discussed was the obstruction of the streets and sidewalks of the city with empty store boxes, trash boxes and hitching racks. Mayor Zimmerman declared there should be no regular hitching racks within a square of Main street. At Fourth and Main streets there is being much inconvenience caused because of hitching on the east side and the band concert platform on the west side. It is considered dangerous by the board, as it makes the street very narrow. The board will probably order the concert platform removed, excepting on Saturday night.

A large number of empty boxes are piled on South Sixth street near Main, which greatly impedes traffic. The boxes will be ordered removed by the board.

Elm place has been kept in such a filthy condition that the board has ordered the property owners to clean it up. A cement side walk, which will be built on the north side of Elm Place soon, will greatly improve the street.

Primary assessment rolls of a cement sidewalk on the west side of South Fifteenth street from South D to South E streets was approved by the board. Also the final assessment roll of sewer in the vicinity of South Second and B streets was approved.

Eaton, O., July 28.—Mrs. Mary Bradshaw, wife of Preston Bradshaw, died a few days ago at their home, north of New Paris. Mrs. Bradshaw bore the distinction of being the heaviest female individual in the county, her weight being 444 pounds. The coffin to retain her body measured 3 feet and four inches in width, and was too large to pass through a door of the home. Because of this fact the casket had to be left outside and the body of the woman was carried from the house in a sheet by ten men. The Rev. S. Huddle, of this city, conducted the services.
